The definitive and essential source of reference for all laboratories involved in the analysis of human semen.

Meat Processing Technology for Small- to Medium-scale Producers Food & Agriculture Org.

Pipeline Planning and Construction Field Manual aims to guide engineers and technicians in the processes of planning, designing, and construction of a pipeline system, as well as to provide the necessary tools for cost estimations, specifications, and field maintenance. The text includes understandable pipeline schematics, tables, and DIY checklists. This source is a collaborative work of a team of experts with over 180 years of combined experience throughout the United States and other countries in pipeline planning and construction. Comprised of 21

chapters, the book walks readers through the steps of pipeline construction and management. The comprehensive guide that this source provides enables engineers and technicians to manage routine auditing of technical work output relative to technical input and established expectations and standards, and to assess and estimate the work, including design integrity and product requirements, from its research to completion. Design, piping, civil, mechanical, petroleum, chemical, project production and project reservoir engineers, including novices and students, will find this book invaluable for their engineering practices. Back-of-the-envelope calculations Checklists for maintenance operations Checklists for environmental compliance Simulations, modeling tools and equipment design Guide for pump and pumping station placement

MDPI

"The purpose of this booklet is to highlight the many opportunities and benefits that pigs

can provide to small-scale farmers, reducing their vulnerability and increasing their food and income security as well as providing a high value animal protein for more balanced diets.

The booklet is focused on creating awareness and promoting pigs as a viable diversification enterprise within the context of small-scale farming."--Introduction.

The Tropical Agriculturalist Daya Books

This book aims to typify the extent to which contract farming is helping small farmers to access markets and meet stringent requirements of manufacturers, retailers, exporters and service firms, from both food and non-food sectors such as biofuels

and forestry. It clarifies differences in the functionality of contracts depending on commodity, market, technology, public policies and country circumstances. Conceptual issues are discussed and real-world case study appraisals from developing regions are presented. The issues raised in the case studies and the key messages synthesized in the initial chapter bring new insights and contributions to further enrich knowledge on contract farming as a tool for inclusive market access in developing countries.

Artificial insemination is used instead of natural mating for reproduction purposes

and its chief priority is that the desirable characteristics of a bull or other male livestock animal can be passed on more quickly and to more progeny than if that animal is mated with females in a natural fashion. This book contains under one cover 16 chapters of concise, up-to-date information on artificial insemination in buffalos, ewes, pigs, swine, sheep, goats, pigs and dogs.

Cryopreservation effect on sperm quality and fertility, new method and diagnostic test in semen analysis, management factors affecting fertility after cervical insemination, factors of non-infectious nature

affecting the fertility, fatty acids effects on reproductive performance of ruminants, particularities of bovine artificial insemination, sperm preparation techniques and reproductive endocrinology diseases are described. This book will explain the advantages and disadvantages of using AI, the various methodologies used in different species, and how AI can be used to improve reproductive efficiency in farm animals.

Rhodesia National Bibliography Food & Agriculture Org

This technical guide promotes sustainable small-scale, family based poultry production. It gives a comprehensive review of all aspects of small-scale poultry production in developing countries and includes sections on feeding and nutrition, housing, general husbandry and flock health. Regional differences in production practices are also described. The guide provides the technical and scientific building blocks needed to develop sustainable programmes for small-scale poultry production. It will be of practical value to those keeping or planning to keep poultry and as a valuable technical reference for poultry specialists,

researchers, students and those interested in broader rural development issues.

Contents Chapter 1: Introduction; Chapter 2: Species and Breeds; Chapter 3: Feed Resources; Chapter 4: General Management; Chapter 5: Incubation and Hatching; Chapter 6: Health; Chapter 7: Breed Improvement; Chapter 8: Production Economics; Chapter 9: Marketing; Chapter 10: Research and Development for Family Poultry.

Pipeline Planning and Construction Field Manual CABI

Edible insects have always been a part of human diets, but in some societies there remains a degree of

disdain and disgust for their consumption.

Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as

feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Pigs for Prosperity
Routledge

This guide is intended to help extension workers better understand the concept of risk, the situation where risk occurs and management strategies that can be used to reduce, or at least soften, its effect. It is hoped that the guide will be useful in assisting extension workers to provide farmers with advice on the kind of risk management strategies that they can employ to

deal with risk in their day-to-day operations. In this way extension workers can help farmers recognize and understand the risks that they are likely to face and assist them in making better farm management decisions that reduce the negative effect of the risks encountered in farming.

Security Food & Agriculture Org

This book provides empirical evidence from Kenya, Tanzania and Mozambique and from different production systems of the importance of livestock as an asset to women and their participation in livestock and livestock product markets. It explores the issues of intra-household income management and economic benefits of livestock markets to women, focusing on how types of markets, the types of products and women ' s participation in markets influence their access to livestock income. The book further analyses the role of

livestock ownership, especially women ' s ownership of livestock, in influencing household food security though increasing household dietary diversity and food adequacy.

Additional issues addressed include access to resources, information and financial services to enable women more effectively to participate in livestock production and marketing, and some of the factors that influence this access. Practical strategies for increasing women ' s market participation and access to information and services are discussed. The book ends with recommendations on

how to mainstream gender in livestock research and development if livestock are to serve as a pathway out of poverty for the poor and especially for women.

Edible Insects African swine fever (ASF) detection and diagnosis This manual incorporates all relevant information and principles that are currently used by the Joint Meeting on Pesticide Residues to estimate maximum residue levels, supervised trials median residue values, and dietary risk from pesticide residues.

meat', is an essential source of protein and a generator of income for millions of forest-living communities in tropical and subtropical regions. However, unsustainable harvest rates currently

Global Livestock Production Systems Food & Agriculture Org.

Cover crops slow erosion, improve soil, smother weeds, enhance nutrient and moisture availability, help control many pests and bring a host of other benefits to your farm. At the same time, they can reduce costs, increase profits and even create new sources of income. You will reap dividends on your cover crop investments for years, since their benefits accumulate over the long term. This book will help you find which ones are right for you. Captures farmer and other research

results from the past ten years. The authors verified the info. from the 2nd ed., added new results and updated farmer profiles and research data, and added 2 chap. Includes maps and charts, detailed narratives about individual cover crop species, and chap. about aspects of cover cropping. Farming Systems and Poverty Cambridge University Press Informed livestock sector policy development and priority setting is heavily dependent on a good understanding of livestock production systems. In a collaborative effort between the Food and Agriculture Organization and the International Livestock Research Institute, stock has been taken

of where we have come from in agricultural systems classification and mapping; the current state of the art; and the directions in which research and data collection efforts need to take in the future. The book also addresses issues relating to the intensity and scale of production, moving from what is done to how it is done. The intensification of production is an area of particular importance, for it is in the intensive systems that changes are occurring most rapidly and where most information is needed on the implications that intensification of production may have for livelihoods, poverty alleviation, animal diseases, public health and environmental outcomes. A series of case studies is provided, linking livestock production systems to rural livelihoods and poverty and examples of the application of livestock production system maps are drawn from livestock production, now and in the future; livestock's impact on the global environment; animal and public health; and livestock and livelihoods. This book provides a formal reference to Version 5 of the global livestock production systems map, and to revised estimates of the numbers of rural poor livestock keepers, by country and livestock

production system.

A Pasture Handbook
Food & Agriculture

The domestic pig is perceived as an animal with intelligence and character and yet, in the industrialized world, the majority of people have had little or no contact with them. Pigs are subject to a wide range of environments from the tropics to the sub-arctic, ranging from small-scale, extensive systems to large-scale intensive systems.

They may spend their whole life on one farm or may be subject to long-distance transport multiple times. Not surprisingly, many aspects of their life experiences can impact

their welfare. This book brings together a team of leading pig welfare research scientists to review the natural history of the pig, the welfare of pigs at different stages of life and to indicate what the future holds in terms of pig welfare. The text is aimed at researchers and teachers working in veterinary and animal science together with those working in the pig industry and for governmental and non-governmental animal welfare organizations.
