Sanger Rainsford is a big-game hunter, who finds himself washed up on an island owned by the eccentric General Zaroff. Zaroff, a big-game hunter himself, has heard of Rainsford's abilities with a gun and organises a hunt. However, they're not after animals – they're after people. When he protests, Rainsford the hunter becomes Rainsford the hunted. Sharing similarities with "The Hunger Games", starring Jennifer Lawrence, this is the story that created the template for pitting man against man. Born in New York, Richard Connell (1893 – 1949) went on to become an acclaimed author, screenwriter, and journalist. He is best remembered for the gripping novel "The Most Dangerous Game" and for receiving an Oscar nomination for the screenplay "Meet John Doe".

One of the best-selling young adult books of all time, written by Pulitzer Prize-winning author Paul Zindel. John Conlan is nicknamed "The Bathroom Bomber" after setting off firecrackers in the boys' bathroom 23 times without ever getting caught. John and his best friend, Lorraine, can never please their parents, and school is a chore. To pass the time, they play pranks on unsuspecting people and it's during one of these pranks that they meet the "Pigman." In spite of themselves, John and Lorraine soon get caught up in Mr. Pignati's zest for life. In fact, they become so involved that they begin to destroy the only corner of the world that has ever mattered to them. Can they stop before it's too late?

One of the greatest challenges for English language arts teachers today is the call to engage students in more complex texts. Tim Gillespie, who has taught in public schools for almost four decades, has found the lenses of literary criticism a powerful tool for helping students tackle challenging literary texts. Tim breaks down the dense language of critical theory into clear, lively, and thorough explanations of many schools of critical thought---reader response, biographical, historical, psychological, archetypal, genre based, moral, philosophical, feminist, political, formalist, and postmodern. Doing Literary Criticism gives each theory its own chapter with a brief, teacher-friendly overview and a history of the approach, along with an in-depth discussion of its benefits and limitations. Each chapter also includes ideas for classroom practices and activities. Using stories from his own English classes--from alternative programs to advance placement and everything in between--Tim provides a wealth of specific classroom-tested suggestions for discussion, essay and research paper topics, recommended texts, exam questions, and more. The accompanying CD offers abbreviated overviews of each theory (designed to be used as classroom handouts, examples of student work, collections of quotes to stimulate discussion and writing, an extended history of women writers, and much more. Ultimately, Doing Literary Criticism offers teachers a rich set of materials and tools to help their students become more confident and able readers, writers, and critical thinkers.

The short tale A Rose for Emily was first published on April 30, 1930, by American author William Faulkner. This narrative is set in Faulkner's fictional city of Jefferson, Mississippi, in his fictional county of Yoknapatawpha County. It was the first time Faulkner's short tale had been published in a national magazine. Emily Grierson, an eccentric spinster, is the subject of A Rose for Emily. The peculiar circumstances of Emily's existence are described by a nameless narrator, as are her strange interactions with her father and her lover, Yankee road worker Homer Barron.

This book explores the paradoxes and unique characteristics of the World Economic Forum, highlighting contemporary issues and debates on global governance, economic development and corporate social responsibility. The Forum is one of the most influential, but least understood, global institutions. Its annual meeting in Davos, Switzerland and its regional summits held around the world attract a significant and powerful audience from the worlds of business, economics, politics and civil society. The participants, who include business and political leaders, representatives of international institutions and civil society organizations, academia and the media, meet to debate issues of global concern and to develop possible solutions. Forum members see the organization as an innovative venue bringing together different types of stakeholders to solve global problems. To its critics, however, the Forum's public face conceals a private venue for making business deals. With clear and concise sections, including boxes containing key ideas and arguments, The World Economic Forum is a much needed introduction to an important and controversial organization and will be of considerable interest to students and practitioners of international business, international political economy, economics, development, international relations, and globalization.

This book is designed to be a practical progression of experimental techniques an investigator may follow when embarking on a biochemical project. The protocols may be performed in the order laid out or may be used independently. The aim of the book is to assist a wide range of researchers. from the novice to the frustrated veteran, in the choice and design of experiments that are to be performed to provide answers to specific questions. The manual describes standard techniques that have been shown to work, as well as some newer ones that are beginning to prove important. By following the prominently numbered steps. you can work your way through any protocol. whether it's a new technique or a task you've done before for which you need a quick review or updated methodology. This manual will assist the experimentalist in designing properly controlled experiments. There will be no advice for dealing with specific pieces of equipment other than encouragement to read the manual, if you can find it. Through out all manipulations try to be objective. Be on the lookout for unexpected findings. You will learn the most from unexpected results. and they are often the beginning of the next project. It is never possible to record too much in your lab notebook. Do not get discouraged. Remember, things will not always run smoothly.

A plane crashes on a desert island and the only survivors, a group of schoolboys, assemble on the beach and wait to be rescued. By day they inhabit a land of bright fantastic birds and dark blue seas, but at night their dreams are haunted by the image of a terrifying beast. As the boys' delicate sense of order fades, so their childish dreams are transformed into something more primitive, and their behaviour starts to take on a murderous, savage significance. "Eight hundred and fifty-three horrifying things had happened to me by the time I was a teenager. That was when I met my Pigman, whose real name was Nonno Frankie." The year Paul Zindel, his sister, Betty, and their mother lived in the town of Travis, Staten Island, New York, was the most important time of his teenage life. It was the year he and Jennifer Wolupopski were best friends. It was the year of the apple tree, the water-head baby, and Cemetery Hill. And it was the year he met Nonno Frankie Vivona, who became his Pigman. Every word of his story is true. And The Pigman & Me has an added bonus--one crucial

piece of information: the secret of life, according to the Pigman.

"Provocative . . . reveals the ability behind exciting and unexpected innovations, turnarounds, or accomplishments that were once considered impossible." —W. Warner Burke, Edward L. Thorndike Professor of Psychology and Education, Teachers College, Columbia University
Appreciative Intelligence provides a new answer to what enables successful people to dream up their extraordinary and innovative ideas; why employees, partners, colleagues, investors, and other stakeholders join them on the path to their goals, and how they achieve these goals despite obstacles and challenges. It is not simple optimism. People with appreciative intelligence are realistic and action oriented—they have the ability not just to identify positive potential, but to devise a course of action to take advantage of it. Drawing on their own original research and recent discoveries in psychology and cognitive neuroscience, Thatchenkery and Metzker outline the evidence for appreciative intelligence, detail its specific characteristics, and show how you can develop this skill and use it in your own life and work. They show how the most successful leaders are able to spread appreciative intelligence throughout an organization, and they offer tools and exercises you can use to increase your own level of appreciative intelligence and so become more creative, resilient, successful, and personally fulfilled. "An inspiring and practical account of how to develop the capacity to see potential within the present and to develop this capacity within oneself and in others." —Jane E. Dutton, William Russell Kelly Professor of Business Administration and Professor of Psychology, Stephen M. Ross School of Business, University of Michigan "A compelling justification for . . . what endows successful leaders with the qualities of persistence, conviction, comfort with uncertainty, and resilience to overcome challenges." —Dr. V. Critical Foundations in Young Adult Literature: Challenging Genres National Academies Press

" Among the darkest corners of Kentucky's past are the grisly feuds that tore apart the hills of Eastern Kentucky from the late nineteenth century until well into the twentieth. Now, from the tangled threads of conflicting testimony, John Ed Pearce, Kentucky's best known journalist, weaves engrossing accounts of six of the most notorious accounts to uncover what really happened and why. His story of those days of darkness brings to light new evidence, questions commonly held beliefs about the feuds, and us and long-running feuds—those in Breathitt, Clay Harlan, Perry, Pike, and Rowan counties. What caused the feuds that left Kentucky with its lingering reputation for violence? Who were the feudists, and what forces—social, political, financial—hurled them at each other? Did Big Jim Howard really kill Governor William Goebel? Did Joe Eversole die trying to protect small mountain landowners from ruthless Eastern mineral exploiters? Did the Hatfield-McCoy fight start over a hog? For years, Pearce has interviewed descendants of feuding families and examined skimpy court records and often fictional newspaper reports to rest some of the more popular legends.

Lord of the Flies Routledge

"At the time it was first published in 1962, it framed such an urgent appeal to the American conscience that it actually prompted the creation of the Appalachian Regional Commission, an agency that has pumped millions of dollars into Appalachia. Caudill's study begins in the violence of the Indian wars and ends in the economic despair of the 1950s and 1960s. Two hundred years ago, the Cumberland Plateau was a land of great promise. Its deep, twisting valleys contained rich bottomlands. The surrounding mountains were teeming with game and covered with valuable timber. The people who came into this land scratched out a living by farming, hunting, and making all the things they need—including whiskey. The quality of life in Appalachia declined during the Civil War and Appalachia remained "in a bad way" for the next century. By the 1940s, 50s, and 60s, Appalachia had become an island of poverty in a national sea of plenty and prosperity. Caudill's book alerted the mainstream world to our problems and their causes. Since then the ARC has provided millions of dollars to strengthen the brick and mortar infrastructure of Appalachia and to help us recover from a century of economic problems that had greatly undermined our quality of life."—Print ed.
