Monetary Economics Reinterpreting Revolution in Twentieth-Century Europe

Saint-Simonians were a group of young engineers and doctors who proposed original solutions to the social and banking crises of the early nineteenth century. Through an examination of the lives, ideals and activities of these men and women, the book analyses the influence of the Saint-Simonians on nineteenth-century French society.

Survival of the Friendliest Routledge

This volume brings together a group of distinguished scholars to engage in a dialogue on key developments in the study of security.

The book provides a comprehensive overview of theoretical, empirical and methodological developments within security studies, whose political and societal importance has grown significantly in recent years. By bringing together scholars who hold differing perspectives on security, this volume provides insights into a variety of approaches and their newest developments, including 'mainstream' as well as heterodox perspectives on security. Thus, it aims to build bridges of communication between different 'camps' by initiating a dialogue on the identity and diversity of security studies. It does so in three parts: The first part of the book includes paradigmatic approaches to security that are closely connected to major debates in International Relations such as realism, institutionalism, constructivism as well as approaches to the culture, ethics of security and critical security studies. The second part places emphasis on the broadening and deepening of the concept of security in recent decades. It discusses key empirical frontiers including the continued centrality of the state, the link between democracy and security, environmental security as well as financial security. The third part of the book presents various methodological approaches to the question of security and peace. It provides an overview of new approaches such as the visual turn, quantifying security and method combinations. This book will be of much interest to students of critical security studies, international relations and research methods.

Policy and its Theoretical Basis Springer

This handbook is the definitive reference text for the study of 'dark tourism', the contemporary commodification of death within international visitor economies. Shining a light on dark tourism and visitor sites of death or disaster allows us to

better understand issues of global tourism mobilities, tourist experiences, the co-creation of touristic meaning, and 'difficult heritage' processes and practices. Adopting multidisciplinary perspectives from authors representing every continent, the book combines 'real-world' viewpoints from both industry and the media with conceptual underpinning, and offers comprehensive and grounded perspectives of 'heritage that hurts'. The handbook adopts a progressive and thematic approach, including critical accounts of dark tourism history, dark tourism philosophy and theory, dark tourism in society and culture, dark tourism and heritage landscapes, the 'dark tourist' experience, and the business of dark tourism. The Palgrave Handbook of Dark Tourism Studies will appeal to students and scholars with an interest in aspects of memorialisation and morality in sociology, death studies, history, geography, cultural studies, philosophy, psychology, business management, museology and heritage tourism studies, politics, religious studies, and anthropology.

This year marks the twentieth anniversary of one of the most momentous general elections this country has ever seen. John Major's defeat in 1997 ended a record eighteen years of Tory government, prompting accusations of failure and ignominy. A controversial leader, Major oversaw numerous crises in international and domestic policy. Between 1990 and 1997, he presided over Britain's participations in the Gulf War, the start of the Northern Ireland peace process, the Maastricht Treaty negotiations and, famously, Black Wednesday and Britain's exit from the ERM. Towards the end, Major's government was split over Europe and ridden with allegations of sleaze. Widely criticised by the media and politicians from all parties, Major went on to be crushed by Tony Blair and New Labour in the 1997 general election. An Unsuccessful Prime Minister? is the first wide-ranging appraisal of John Major's government in nearly two decades. This book reconsiders the role of John Major as Prime Minister and the policy achievements of his government. Major's government faced many more constraints and left behind a more enduring legacy than his critics allowed at the time or since.

Shaping, Adapting and Resisting Policy Developments Palgrave Macmillan

Martyn Lyons offers a fresh interpretation of European history in the half-century following the fall of Napoleon. Instead of seeing the period in traditional terms of Restoration and Reaction, this new account emphasizes the problems of remembering and forgetting the recent revolutionary and Napoleonic past, and of either incorporating or rejecting its legacy. Post-Revolutionary Europe: - makes interesting comparisons and contrasts between the fall of the French Empire in 1815 and the collapse of the Soviet Empire in 1989-91 - examines the new forms of popular participation in political life which developed between the 1830 and 1848 Revolutions, as a broad public sphere of action was created - offers a series of thematic chapters which discuss key topics such as peasants and artisans, the bourgeois family, nationalism, the growth of cities, and European

Jewry - covers a wide geographical context, from Britain to the Balkans and from Portugal to Russia. Illustrated throughout, this clear and engaging text is essential reading for all those with an interest in this important period of European history. Patriarchal Moments Macmillan International Higher Education

This book follows the story of the Second French Republic from its idealistic beginnings in February 1848 to its formal replacement in December 1852 by the Second Empire. Based on original archival research, The Second French Republic gives a detailed account of the internal tensions that irrevocably weakened France's shortest republic. During this short period French political life was buffeted by strong and often contrary forces: universal manhood suffrage, fear of socialism, the President Louis-Napoleon Bonaparte, and the political ambitions of the military high command for the restoration of the monarchy.

What is terrorism? What ought we to do about it? And why is it wrong? We think we have clear answers to these questions. But acts of violence, like U.S. drone strikes that indiscriminately kill civilians, and mass shootings that become terrorist attacks when suspects are identified as Muslim, suggest that definitions of terrorism are always contested. In *Genealogies of Terrorism*, Verena Erlenbusch-Anderson rejects attempts to define what terrorism is in favor of a historico-philosophical investigation into the conditions under which uses of this contested term become meaningful. The result is a powerful critique of the power relations that shape how we understand and theorize political violence. Tracing discourses and practices of terrorism from the French Revolution to late imperial Russia, colonized Algeria, and the post-9/11 United States, Erlenbusch-Anderson examines what we do when we name something terrorism. She offers an important corrective to attempts to develop universal definitions that assure semantic consistency and provide normative certainty, showing that terrorism means many different things and serves a wide range of political purposes. In the tradition of Michel Foucault's genealogies, Erlenbusch-Anderson excavates the history of conceptual and practical uses of terrorism and maps the historically contingent political and material conditions that shape their emergence. She analyzes the power relations that make different modes of understanding terrorism possible and reveals their complicity in justifying the exercise of sovereign power in the name of defending the nation, class, or humanity against the terrorist enemy. Offering an engaged critique of terrorism and the mechanisms of social and political exclusion that it enables, *Genealogies of Terrorism* is an empirically grounded and philosophically rigorous critical history with important political implications.

The Globalization of Corporate Governance Macmillan International Higher Education

Leading scholars take stock of Darwin's ideas about human evolution in the light of modern science In 1871, Charles Darwin published *The Descent of Man*, a companion to *Origin of Species* in which he attempted

to explain human evolution, a topic he called "the highest and most interesting problem for the naturalist." *A Most Interesting Problem* brings together twelve world-class scholars and science communicators to investigate what Darwin got right—and what he got wrong—about the origin, history, and biological variation of humans. Edited by Jeremy DeSilva and with an introduction by acclaimed Darwin biographer Janet Browne, *A Most Interesting Problem* draws on the latest discoveries in fields such as genetics, paleontology, bioarchaeology, anthropology, and primatology. This compelling and accessible book tackles the very subjects Darwin explores in *Descent*, including the evidence for human evolution, our place in the family tree, the origins of civilization, human races, and sex differences. *A Most Interesting Problem* is a testament to how scientific ideas are tested and how evidence helps to structure our narratives about human origins, showing how some of Darwin's ideas have withstood more than a century of scrutiny while others have not. *A Most Interesting Problem* features contributions by Janet Browne, Jeremy DeSilva, Holly Dunsworth, Agustín Fuentes, Ann Gibbons, Yohannes Haile-Selassie, Brian Hare, John Hawks, Suzana Herculano-Houzel, Kristina Killgrove, Alice Roberts, and Michael J. Ryan.

Part of the Modern History for Modern Languages Series France since 1815 provides an accessible overview of the major socio-political changes in France during this period. Designed for area studies students studying French, it presents the historical context necessary for language students to understand the complexities of contemporary French society. Adopting a chronological approach, it surveys nearly two hundred years of French history, with events covered including The French Revolution, The Bourbon Restoration, The Third Republic, Occupied France, The Fourth Republic, The Gaullist Revolution and France after 2003. This revised edition includes new material that focuses on Chirac's second mandate (Iraq war, religion, suburbs and the inability/impossibility of carrying on with reform), an assessment of the controversial Sarkozy presidency, and a final chapter covering the last ten years, culminating in the results of the French presidential elections in 2012. Features include: clear timelines of main events and suggested topics for discussion glossary inserts throughout of key terms and concepts the use of primary documents to re-create and understand the past free access to a website (<http://www.port.ac.uk/special/france1815to2003/>) containing a wealth of complementary material Drawing on the best scholarship, particular emphasis has been given to the role of political memory, the contribution of women and the impact of colonialism and post-colonialism. The relationship between France and her European partners is analysed in greater depth and there are new sections explicitly situating France and the French within a wider transnational/global perspective.

The PSA Yearbook 1999 Biteback Publishing

Examining the compelling and often poignant connection between women and the material culture of death, this collection focuses on the objects women make, the images they keep, the practices they use or are responsible for, and the places they inhabit and construct through ritual and custom. Women's material practices, ranging from wearing mourning jewelry to dressing the dead, stitching memorial samplers to constructing skull boxes, collecting funeral programs to collecting and studying diseased hearts, making and collecting taxidermies, and making sculptures honoring the death, are explored in this collection as well as women's affective responses and sentimental labor that mark their expected and unexpected participation in the social practices surrounding death and the dead. The largely invisible work involved in commemorating and constructing narratives and memorials about the dead—from family members and friends to national figures—calls attention to the role women as memory keepers for families, local communities, and the nation. Women have tended to work collaboratively, making, collecting, and sharing objects that conveyed sentiments about the deceased, whether human or animal, as well as the identity of mourners. Death is about loss, and many of the mourning practices that women have traditionally and are currently engaged in are about dealing with private grief and public loss as well as working to mitigate the more general anxiety that death engenders about the impermanence of life.

Until the dramatic fall of Communist regimes in the East placed the

possibility of revolution on the agenda once again, sudden and decisive political change had appeared a largely anachronistic phenomenon in Europe. Looking back over the twentieth century, it is plausible to argue that the twentieth, rather than the nineteenth, has been the 'most revolutionary of centuries'. In this volume, leading specialists from a variety of disciplines examine the changing and conflicting meanings of revolution in modern and contemporary Europe. Contributions include both broad essays on the global and historical context of European revolution and specific case studies reinterpreting a variety of revolutionary experiences.

New Books on Women and Feminism Routledge

Since the publication of the first edition of this book in 2005, the world of financial investment has experienced an unprecedented boom followed by a spectacular bust. Significant changes have been proposed and in some cases implemented in areas such as the structure of regulation, the organisation of markets, supervision of market participants and the protection of consumers. The second edition takes account of these developments, integrating them into an analytical framework that enables the reader to develop a critical overview of the role of general legal rules and specialised systems of regulation in financial investment. The framework focuses on the role of contract, trusts and regulation as the primary legal influences for financial investment. The first part explores the relationship between investment, law and regulation. The second part examines the nature of investments and investors, both professional and private. The third part discusses the central role of corporate finance and corporate governance in linking investors with enterprises that require external capital. The fourth part examines the nature, operation and regulation of markets and the participants that support the functioning of the markets. The objective remains to provide a broadly-based and critical account of the role of law in financial investment. "MacNeil's eloquent and informative distillation of the regulatory fundamentals of investment law gives his book much international relevance...a timely contribution to help readers decipher the seemingly inextricable maze of financial regulation...Practitioners and legal policy advisers will..welcome it. They should find enlightening the book's careful scrutiny of the trust and contractual foundations of investment law and practice." Benjamin J Richardson *Journal of International Banking Law and Regulation*, Vol 22 Issue 1, 2007 ...a fascinating and informative book...thoroughly recommended as a learned but at the same time very readable introduction to the law of financial investment Gerard McCormack *Banking and Finance Law Review*, Volume 21 No 2, June 2006 ...very informative tool that introduces in a very friendly and accessible manner the nearly inextricable world of financial investment laws. 'Race' and Racism examines the origins and development of racism in North America. It addresses the inception and persistence of the concept of 'race' and discusses the biology of human variance, addressing the fossil record of human evolution, the relationship between creationism and science, population genetics, 'race'-based medicine, and other related issues. The book explores the diverse ways in which people in a variety of cultures have perceived, categorized, and defined one another without reference to any concept of 'race.' It follows the history of American racism through slavery, the perceptions and treatment of Native Americans, Jim Crow laws, attitudes toward Irish and Southern European immigrants, the internment of Japanese Americans during World War II, the civil rights era, and numerous other topics.
