“Three Years with the Rat is a mind-warping thriller that will make you question reality as you conceive of it. One of the most assured and haunting debuts I’ve read in recent memory.” —Blake Crouch, author of Dark Matter After several years of drifting between school and go-nowhere jobs, a young man is drawn back into the big city of his youth. The magnet is his beloved older sister, Grace: always smart and charismatic even when she was rebelling, and always his hero. Now she is a promising graduate student in psychophysics and the center of a group of friends who take “Little Brother” into their fold, where he finds camaraderie, romance, and even a decent job. But it soon becomes clear that things are not well with Grace. Always acerbic, she now veers into sudden rages that are increasingly directed at her adoring boyfriend, John, who is also her fellow researcher. When Grace disappears, and John shortly thereafter, the narrator makes an astonishing discovery in their apartment: a box big enough to crawl inside, a lab rat, and a note that says This is the only way back for us. Soon he embarks on a mission to discover the truth, a pursuit that forces him to question time and space itself, and ultimately toward a perilous confrontation at the very limits of imagination. This kinetic novel catapults the classic noir plot of a woman gone missing into the twenty-first-century city, where so-called reality crashes into speculative science. Jay Hosking’s Three Years with the Rat is simultaneously a mind-twisting mystery that plays with the very nature of time and the story of a young man who must face the dangerously destructive forces we all carry within ourselves.

"On every level, Cold Storage is pure, unadulterated entertainment."

—Douglas Preston, The New York Times Book Review For fans of The Martian, Dark Matter, and Before the Fall comes an astonishing debut thriller by the screenwriter of Jurassic Park: a wild and terrifying bioterrorism adventure about three strangers who must work together to contain a highly contagious, deadly organism that could destroy all of humanity. They thought it was contained. They were wrong. When Pentagon bioterror operative Roberto Diaz was sent to investigate a suspected biochemical attack, he found something far worse: a highly mutative organism capable of extinction-level destruction. He contained it and buried it in cold storage deep beneath a little-used military repository. Now, after decades of festering in a forgotten sub-basement, the specimen has found its way out and is on a lethal feeding frenzy. Only Diaz knows how to stop it. He races across the country to help two unwitting security guards—one an ex-con, the other a single mother. Over one harrowing night, the unlikely trio must figure out how to quarantine this horror again. All they have is luck, fearlessness, and a mordant sense of humor. Will that be enough to save all of humanity?
