NAB Legal Guide to Broadcast Law and Regulation Simon and Schuster

NEW YORK TIMES 10 BEST BOOKS OF THE YEAR • "An epic road trip [that also] captures the unruly intimacies of marriage and parenthood ... This is a novel that daylight our common humanity, and challenges us to reconcile our differences." —The Washington Post In Valeria Luiselli's fiercely imaginative follow-up to the American Book Award-winning Tell Me How It Ends, an artist couple set out with their two children on a road trip from New York to Arizona in the heat of summer. As the family travels west, the bonds between them begin to fray: a fracture is growing between the parents, one the children can almost feel beneath their feet. Through ephemera such as songs, maps and a Polaroid camera, the children try to make sense of both their family's crisis and the larger one engulfing the news: the stories of thousands of kids trying to cross the southwestern border into the United States but getting detained—or lost in the desert along the way. A breath-taking feat of literary virtuosity, *Lost Children* Archive is timely, compassionate, subtly hilarious, and formally inventive—a powerful, urgent story about what it is to be human in an inhuman world.

The Car Hacker's Handbook Christian Faith Publishing, Inc.

(Book). Now in softcover, No Static shows why success in today's corporate-controlled world of radio depends on putting personality and fun back on the air and how to build the creative team to do it. This inspirational handbook by Quincy McCoy offers radio pros and aspiring broadcasters proven strategies for restoring the craft of creative programming. Practical techniques and exercises help develop leadership skills that encourage creativity, motivate staff, increase flexibility and nurture teamwork.

Writing in a personal style, McCoy guides you and your radio station toward more focused branding, stronger programming, more personable DJs, and ultimately higher ratings leading to higher revenue.

Using the Phone Book No Starch Press

Apple iPhone users have been able to connect their phones to car navigation systems for years, so one may wonder what is so different about Apple CarPlay. For starters, instead of connecting to a third-party configuration CarPlay launches a display which mimics the features of the iOS user interface that we've become accustomed to. CarPlay condenses your phone's apps into those, which are compatible with the system and enable handsfree handling, which is the primary selling point of the CarPlay application. Handsfree operation enhances safety and CarPlay goes as far as disabling your iPhone screen while it is connected to the system. CarPlay can be controlled using the navigation controls, touchscreen or ideally Siri, which acts as a co-pilot which can tell you what's around you, where to go, make your calls for you, select songs and audio files to play, navigate options and apps, and send messages while you are on the go so you never have to take your eyes off the road or your hands off the wheel.

Kristin Neff, Ph.D., says that it's time to "stop beating yourself up and leave insecurity behind." *Self-Compassion: Stop Beating Yourself Up and Leave Insecurity Behind* offers expert advice on how to limit self-criticism and offset its negative effects, enabling you to achieve your highest potential and a more contented, fulfilled life. More and more, psychologists are turning away from an emphasis on self-esteem and moving toward self-compassion in the treatment of their patients—and Dr. Neff's extraordinary book offers exercises and action plans for dealing with every emotionally debilitating struggle, be it parenting, weight loss, or any of the numerous trials of everyday living.

No Static Harper Collins

To guide the industry in the 21st century, counsel for the National Association of Broadcasters (NAB) and leading attorneys have prepared the only up-to-date, comprehensive broadcast regulatory publication: *NAB's Legal Guide to Broadcast Law and Regulation*. Known for years as the "voice" for broadcast law, this publication addresses the full range of FCC regulatory issues facing radio and television broadcasters, as well as intellectual property, First Amendment, cable and satellite, and increasingly important online issues. It gives practicing attorneys, in-house counsel, broadcasters and other communications industry professionals practical "how to" advice on topics ranging literally from "a" (advertising) to "z" (zoning). Now in its 6th edition, *NAB's Legal Guide to Broadcast Law and Regulation* is available to keep you current on changes in the law, significant court decisions, FCC rules, agency policies and applied solutions. The National Association of Broadcasters is a nonprofit trade association that advocates on behalf of local radio and television stations and broadcast networks before Congress, the Federal Communications Commission and other federal agencies, and the courts.

Transmission Line Design Manual National Academies Press

Telemedicine—the use of information and telecommunications technologies to provide and support health care when distance separates the participants—is receiving increasing attention not only in remote areas where health care access is troublesome but also in urban and suburban locations. Yet the benefits and costs of this blend of medicine and digital technologies must be better demonstrated before today's cautious decision-makers invest significant funds in its development. Telemedicine presents a framework for evaluating patient care applications of telemedicine. The book identifies managerial, technical, policy, legal, and human factors that must be taken into account in evaluating a telemedicine program. The committee reviews previous efforts to establish evaluation frameworks and reports on results from several completed studies of image transmission, consulting from remote locations, and other telemedicine programs. The committee also examines basic elements of an evaluation and considers relevant issues of quality, accessibility, and cost of health care. Telemedicine will be of immediate interest to anyone with interest in the clinical application of telemedicine.
