Bizarre military history: In 1979, a crack commando unit was established by the most gifted minds within the U.S. Army. Defying all known laws

of physics and accepted military practice, they believed that a soldier could adopt the cloak of invisibility, pass cleanly through walls, and—perhaps most chillingly—kill goats just by staring at them. They were the First Earth Battalion, entrusted with defending America from all known adversaries. And they really weren't joking. What's more, they're back—and they're fighting the War on Terror. An uproarious exploration of American military paranoia: With investigations ranging from the mysterious "Goat Lab," to Uri Geller's covert psychic work with the CIA, to the increasingly bizarre role played by a succession of U.S. presidents, this might just be the funniest, most unsettling book you will ever read—because it is all true and is still happening today.

Apple CarPlay: A Guide for Beginners CRC Press

Apple iPhone users have been able to connect their phones to car navigation systems for years, so one may wonder what is so different about Apple CarPlay. For starters, instead of connecting to a third-party configuration CarPlay launches a display which mimics the features of the iOS user interface that we've become accustomed to. CarPlay condenses your phone's apps into those, which are compatible with the system and enable handsfree handling, which is the primary selling point of the CarPlay application. Handsfree operation enhances safety and CarPlay goes as far as disabling your iPhone screen while it is connected to the system. CarPlay can be controlled using the navigation controls, touchscreen or ideally Siri, which acts as a co-pilot which can tell you what's around you, where to go, make your calls for you, select songs and audio files to play, navigate options

and apps, and send messages while you are on the go so you never have to take your eyes off the road or your hands off the wheel. NAB Legal Guide to Broadcast Law and Regulation Vintage NEW YORK TIMES 10 BEST BOOKS OF THE YEAR • "An epic road trip [that also] captures the unruly intimacies of marriage and parenthood ... This is a novel that daylight's our common humanity, and challenges us to reconcile our differences." —The Washington Post In Valeria Luiselli's fiercely imaginative follow-up to the American Book Award-winning Tell Me How It Ends, an artist couple set out with their two children on a road trip from New York to Arizona in the heat of summer. As the family travels west, the bonds between them begin to fray: a fracture is growing between the parents, one the children can almost feel beneath their feet. Through ephemera such as songs, maps and a Polaroid camera, the children try to make sense of both their family's crisis and the larger one engulfing the news: the stories of thousands of kids trying to cross the southwestern border into the United States but getting detained—or lost in the

This autobiography follows the life of Anna Shaw (1847-1919) from her birth in Newcastle-on-Tyne, England through her presidency of the National American Woman Suffrage Association. Shaw immigrated with her genteel but financially pressed family to America in 1851. They settled first in New Bedford and then in Lawrence, Massachusetts, finally migrating in 1859 to a pioneer farmstead in northern Michigan, where Anna performed much of the subsistence labor during her father's long absences. The first part of her narrative

emphasizes her efforts to gain an education and take up a ministerial career. After two years at Albion College, she attended Boston Theological School (1876-1878) and accepted a pastorate in East Dennis, Cape Cod, after graduation; later she also took temporary charge of the Congregational Church in Dennis. After her ordination had been blocked by members of the New England Conference of the Methodist Episcopal Church opposed to ordaining women, Shaw was ordained by the 1880 Conference of the Methodist Protestant Church in Tarrytown, N.Y.
