How did a sleepy New England fishing village become a gay mecca? In this dynamic history, the author explains why Provincetown, Massachusetts, --alternately known as "Land's End," "Cape-tip," "Cape-end," and, to some, "Queersville, U.S.A."--has meant many things to many people. 36 photos.

John F. Day's stark description of life in the coalfields of Eastern Kentucky in the 1930s is a classic of Appalachian literature, "an eloquent preface," as Thomas D. Clark has written, to what became "a broader state and national concern about Appalachia." Published on the eve of the Second World War, *Bloody Ground* was greeted at first with acclaim-and, in some quarters, indignation-but then was almost forgotten as the nation's attention focused on the war. In the forty years that have passed since the writing of *Bloody Ground*, dramatic changes have swept over Appalachia, but the dilemma that John Day described has not been resolved.

The activist tradition in American literature has long testified to the power of words to change people and the power of people to change the world, yet in recent years many professional humanists have chosen to distract themselves with a postmodern fundamentalism of indeterminacy and instability rather than engage with social and political issues. Throughout her bold and provocative call to action, Elizabeth Ammons argues that the responsibility now facing humanists is urgent: inside and outside academic settings, they need to revive the liberal arts as a progressive cultural force that offers workable ideas and inspiration in the real-world struggle to achieve social and environmental justice. *Brave New Words* challenges present and future literary scholars and teachers to look beyond mere literary critique toward the concrete issue of social change and how to achieve it. Calling for a profound realignment of thought and spirit in the service of positive social change, Ammons argues for the continued importance of multiculturalism in the twenty-first century despite attacks on the concept from both right and left. Concentrating on activist U.S. writers—from ecocritics to feminists to those dedicated to exposing race and class biases, from Jim Wallis and Cornel West to Winona LaDuke and Paula Moya and many others—she calls for all humanists to link their work to the progressive literature of the last half century, to insist on activism in the service of positive change as part of their mission, and to teach the power of hope and

action to their students. As Ammons clearly demonstrates, much of American literature was written to expose injustice and motivate readers to work for social transformation. She challenges today's academic humanists to address the issues of hope and purpose by creating a practical activist pedagogy that gives students the knowledge to connect their theoretical learning to the outside world. By relying on the transformative power of literature and replacing nihilism and powerlessness with conviction and faith, the liberal arts can offer practical, useful inspiration to everyone seeking to create a better world.

¡ Mi Raza Primero! is the first book to examine the Chicano movement's development in one locale—in this case Los Angeles, home of the largest population of people of Mexican descent outside of Mexico City. Ernesto Ch á vez focuses on four organizations that constituted the heart of the movement: The Brown Berets, the Chicano Moratorium Committee, La Raza Unida Party, and the Centro de Acción Social Autónoma, commonly known as CASA. Ch á vez examines and chronicles the ideas and tactics of the insurgency's leaders and their followers who, while differing in their goals and tactics, nonetheless came together as Chicanos and reformers. Deftly combining personal recollection and interviews of movement participants with an array of archival, newspaper, and secondary sources, Ch á vez provides an absorbing account of the events that constituted the Los Angeles-based Chicano movement. At the same time he offers insights into the emergence and the fate of the movement elsewhere. He presents a critical analysis of the concept of Chicano nationalism, an idea shared by all leaders of the insurgency, and places it within a larger global and comparative framework. Examining such variables as gender, class, age, and power relationships, this book offers a sophisticated consideration of how ethnic nationalism and identity functioned in the United States during the 1960s and 1970s.

After three decades of intense research in X-ray and gamma-ray astronomy, the time was ripe to summarize basic knowledge on X-ray and gamma-ray spectroscopy for interested students and researchers ready to become involved in new high-energy missions. This volume exposes both the scientific basics and modern methods of high-energy spectroscopic astrophysics. The emphasis is on physical principles and observing methods rather than a discussion of particular classes of high-energy objects, but many examples and new results are included in the three chapters as well.

This photographic record of Provincetown, Massachusetts captures some of New England's best seascapes and architecture. Here is where the Pilgrim exiles landed in 1620. Provincetown became a whaling port and center for cod fishing and thus, by the late nineteenth century, the richest town in Massachusetts. Many charming eighteenth century Cape Cod houses and splendid Greek Revival homes of the boom years from the 1850's to 1900 remain and are presented here in excellent detailed pictures. Churches, commercial buildings and farm related structures are carefully documented. Sand dunes and dramatic coastal vistas are famous in Provincetown. Author/photographer Ed Gillon found many marvelous scenes at this point of land which caught his artistic eye. Sweeping shorelines and powerful seas are shown as portraits and as a part of the scenery. Provincetown Discovered is an inviting look at this historic place for the stranger, and a nostalgic visual record for those familiar with its special charms.

Between the late 1700s and the 1920s, nearly one-third of the world's Jews emigrated to new lands. Crossing borders and often oceans, they followed paths paved by intrepid peddlers who preceded them. This book is the first to tell the remarkable story of the Jewish men who put packs on their backs and traveled forth, house to house, farm to farm, mining camp to mining camp, to sell their goods to peoples across the world. Persistent and resourceful, these peddlers propelled a mass migration of Jewish families out of central and eastern Europe, north Africa, and the Ottoman Empire to destinations as far-flung as the United States, Great Britain, South Africa, and Latin America. Hasia Diner tells the story of millions of discontented young Jewish men who sought opportunity abroad, leaving parents, wives, and sweethearts behind. Wherever they went, they learned unfamiliar languages and customs, endured loneliness, battled the elements, and proffered goods from the metropolis to people of the hinterlands. In the Irish Midlands, the Adirondacks of New York, the mining camps of New South Wales, and so many other places, these traveling men brought change—to themselves and the families who later followed, to the women whose homes and communities they entered, and ultimately to the geography of Jewish history.

A rich portrait of Black life in South Carolina's Upstate
Encyclopedic in scope, yet intimate in detail, *African American Life in South Carolina's Upper Piedmont, 1780–1900*, delves into the richness of community life in a setting where Black residents were relatively few, notably disadvantaged, but remarkably cohesive. W. J. Megginson shifts the conventional study of African Americans in South Carolina from the much-examined Lowcountry to a part of the state that offered a quite different existence for people of color. In Anderson, Oconee, and Pickens counties—occupying the state's northwest corner—he finds an independent, brave, and stable subculture that persevered for more than a century in the face of political and economic inequities. Drawing on little-used state and county denominational records, privately held research materials, and sources available only in local repositories, Megginson brings to life African American society before, during, and after the Civil War. Orville Vernon Burton, Judge Matthew J. Perry Jr. Distinguished Professor of History at Clemson University and University Distinguished Teacher/Scholar Emeritus at the University of Illinois, provides a new foreword.

With its integrated and cohesive coverage of the current research, *Magmatic Systems* skillfully explores the physical processes, mechanics, and

dynamics of volcanism. The text utilizes a synthesized perspective--theoretical, experimental, and observational--to address the powerful regulatory mechanisms controlling the movement of melts and cooling, with emphasis on mantle plumes, mid-ocean ridges, and intraplate magmatism. Further coverage of subduction zone magmatism includes: Fluid mechanics of mixed magma migration Internal structure of active systems Grain-scale melt flow Rheology of partial melts Numerical simulation of porous media melt migration Nonlinear (chaotic and fractal) processes in magma transport In all, Magmatic Systems will prove invaluable reading to those in search of an interdisciplinary perspective on this active topic. Key Features* Fluid mechanics of magma migration from surface region to eruption site* Internal structure of active magmatic systems* Grain-scale melt flow in mantle plumes and beneath mid-ocean ridges* Physics of magmatic systems and magma dynamics

A sweeping chronicle of Jewish life in the Tar Heel State from colonial times to the present, this beautifully illustrated volume incorporates oral histories, original historical documents, and profiles of fascinating individuals. The first comprehensive social history of its kind, Down Home demonstrates that the story of North Carolina Jews is attuned to the national story of immigrant acculturation but has a southern twist. Keeping in mind the larger southern, American, and Jewish contexts, Leonard Rogoff considers how the North Carolina Jewish experience differs from that of Jews in other southern states. He explores how Jews very often settled in North Carolina's small towns, rather than in its large cities, and he documents the reach and vitality of Jewish North Carolinians' participation in building the New South and the Sunbelt. Many North Carolina Jews were among those at the forefront of a changing South, Rogoff argues, and their experiences challenge stereotypes of a society that was agrarian and Protestant. More than 125 historic and contemporary photographs complement Rogoff's engaging epic, providing a visual panorama of Jewish social, cultural, economic, and religious life in North Carolina. This volume is a treasure to share and to keep. Published in association with the Jewish Heritage Foundation of North Carolina, Down Home is part of a larger documentary project of the same name that will include a film and a traveling museum exhibition, to be launched in June 2010.

Building Provincetown Univ of South Carolina Press

Alarmingly independent, ravishingly beautiful, and surprisingly cosmopolitan, Provincetown already figures in dozens of guide books. But Building Provincetown, which uses architecture to tell social and cultural history, is the most comprehensive yet. More than 1,200 pictures and 650 entries cover everything from the largest national landmarks to the smallest dune shacks -- with three dozen boats in the bargain. Street by street, Building Provincetown takes you under the snug eaves of stout Cape cottages and behind elegant Greek Revival and Queen Anne-style doorways. You'll meet Portuguese fishermen and Yankee whalers, Abstract Expressionists and AIDS activists, early gay pioneers and latter-day buccaneers, drag queens, literary lions, Bohemians, Knights of Columbus, a few town criers, a lot of poets, plus shipwrights, sculptors, and an 87-year-old Avon lady. Working with town residents, David W. Dunlap, who has covered historic preservation for The New York Times since 1981, gathered images and stories that have never before been presented in one place.

If you don't know Provincetown, this is an ideal introduction. If you think you already know Provincetown, you're in for a few happy surprises.

The Paideia Proposal is a system of liberal education intended for all children. It was a response to what Adler characterized as the United States' antidemocratic or undemocratic educational system, a holdover from the 19th century, when the understanding of basic human rights fell short of 20th century expectations. The Paideia Proposal was based upon the following assumptions: 1) All children are educable; 2) Education is never completed in school or higher institutions of learning, but is a lifelong process of maturity for all citizens; 3) The primary cause of learning is the activity of the child's mind, which is not created by, but only assisted by the teacher; 4) Multiple types learning and teaching must be utilized in education, not just teacher lecturing, or telling; and 5) A student's preparation for earning a living is not the primary objective of schooling. Adler stressed that the proposal is much more than just a return to the basic skills of reading, writing and arithmetic. It is not simply a return to the values of classical civilization, but a return to what is of enduring value. It is a democratic proposal intended for the education of all, and not an elitist program as some have alleged.
