Apple iPhone users have been able to connect their phones to car navigation systems for years, so one may wonder what is so different about Apple CarPlay. For starters, instead of connecting to a third-party configuration

CarPlay launches a display which mimics the features of the iOS user interface that we've become accustomed to. CarPlay condenses your phone's apps into those, which are compatible with the system and enable handsfree handling, which is the primary selling point of the CarPlay application. Handsfree operation enhances safety and CarPlay goes as far as disabling your iPhone screen while it is connected to the system. CarPlay can be controlled using the navigation controls, touchscreen or ideally Siri, which acts as a co-pilot which can tell you what's around you, where to go, make your calls for you, select songs and audio files to play, navigate options and apps, and send

messages while you are on the go so you never have to take your eyes off the road or your hands off the wheel.

An authority on the human mind reflects on his intellectual development, his groundbreaking work, and different types of intelligences--including his own. Howard Gardner's *Frames of Mind* was that rare publishing phenomenon--a mind-changer. Widely read by the general public as well as by educators, this influential book laid out Gardner's

theory of multiple intelligences. It debunked the primacy of the IQ test and inspired new approaches to education; entire curricula, schools, museums, and parents' guides were dedicated to the nurturing of the several intelligences. In his new book, *A Synthesizing Mind*, Gardner reflects on his intellectual development and his groundbreaking work, tracing his evolution from bookish child to eager college student to disengaged graduate student to Harvard professor.

Godzilla Stuffed into a Briefcase Columbus takes a vacation to The Bahamas, and discovers the area to be a fun place. He tells all his other adventurous friends about it, and they decide they all need vacations, too. Soon everybody in The Old Country is loading up enough beer to make the trip and sailing to The Bahamas. Hysterical events have surprised us, inventions have made us more comfortable, and recreational pursuits have all but dominated our lives. The story of America is told in a pair of Jekyll & Hyde Timelines. You will meet the good doctor inside. His mean, ugly brother will arrive in 2008. This is a lot more than a pop culture trivia book, although no simpler phrase describes it. Ten timelines tell the story of America's development from the arrival of Columbus to the homeruns of

Barry Bonds and the movie release of The Da Vinci Code. The story is separated into ten topics: events, comforts, cars, toys, movies, television, music, nerds, sports, and gossip. Like any competent trivia book, there is a test at the end, but this tale is about the quest, not the grail. This is a capsule history of the things that have defined us, and Godzilla doesn't like being so tightly restrained.
