French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, *Yvain*, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. *Yvain* is a courtly romance

with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

In the last 20 years, researchers in the field of celestial mechanics have achieved spectacular results in their effort to understand the structure and evolution of our solar system. Modern Celestial Mechanics uses a solid theoretical basis to describe recent results on solar system dynamics, and it emphasizes the dynamics of

planets and of small bodies. To grasp celestial mechanics, one must comprehend the fundamental concepts of Hamiltonian systems theory, so this volume begins with an explanation of those concepts. Celestial mechanics itself is then considered, including the secular motion of planets and small bodies and mean motion resonances. Graduate students and researchers of astronomy and astrophysics will find *Modern Celestial Mechanics* an essential addition to their bookshelves.

The Myth of the Blitz was nurtured at every level of society. It rested upon the assumed invincibility of an island race distinguished by good humour, understatement and the ability to pluck victory from the jaws of defeat by team work, improvisation and muddling through. In fact, in many ways, the Blitz was not like that. Sixty-thousand people were conscientious objectors; a quarter of London's population fled to the country; Churchill and the royal family were booed while touring the aftermath of air-raids; Britain was not bombed into classless democracy. Angus Calder provides a compelling examination of the events of 1940 and 1941 - when Britain 'stood alone' against the Luftwaffe - and of the Myth which sustained her 'finest hour'.
