This pipe volume calculator estimates the volume of a pipe as well as the mass of a liquid which flows through it. This calculator is a helpful tool for everyone who needs to know the exact volume of water in a pipe. It will be helpful to you if you're, for example, designing an irrigation system for your garden.

It is expressed in this Manual in Newton per square meter ($\text{N}/\text{m}^2 = \text{Pa}$). $1 \text{ bar} = 10^5 = 10^5 \text{ Pa}$ Atmospheric pressure is the force exerted on a unit area by the weight of the atmosphere. It depends on the height above sea level (see Fig. 8). At sea level the absolute pressure is approximately $1 \text{ bar} = 10^5 \text{ N} / \text{m}^2$.
