Luxury Arts of the Renaissance sumptuously illustrates the stunningly beautiful objects that were the most prized artworks of their time, restoring to the mainstream materials and items long dismissed as extravagant trinkets. By re-examining the objects themselves and their uses in their day, Belozerskaya demonstrates how these glittering creations constructed both the world and the taste of the Renaissance elites.

For more than two years, John Sherwood roamed Maryland's small towns and city neighborhoods, traveled Appalachian back roads, and sailed the Chesapeake looking for people whose work or way of life recalled the state's rich and varied tradition. Maryland's Vanishing Lives is his vivid account of the people he met on those journeys. Working in a country store or an old-time movie house, on a small tobacco farm or a weathered skipjack, Sherwood's subjects interest us as people, as stubborn survivors who have watched—sometimes defiantly, sometimes wistfully—as the world moved on. These Marylanders' stories poignantly show what happens to family businesses and ordinary folk in the face of new technology, suburban sprawl, franchise outlets, and changing tastes. But Maryland's Vanishing Lives is also an engaging celebration of pride and craft, and the ability to survive. In this collection of sixty-six short profiles, illustrated with memorable photographs by Edwin Remsburg, Sherwood preserves for posterity the lives of Marylanders who hang on to values and skills that are quickly disappearing. *Piping Handbook* CRC Press

Crime analysis has become an increasingly important part of policing and crime prevention, and thousands of specialist crime analysts are now employed by police forces worldwide. This is the first book to set out the principles and practice of crime analysis, and is designed to be used both by crime analysts themselves, by those responsible for the training of crime analysts and teaching its principles, and those teaching this subject as part of broader policing and criminal justice courses. The particular focus of this book is on the adoption of a problem solving approach, showing how crime analysis can be used and developed to support a problem oriented policing approach – based on the idea that the police should concentrate on identifying patterns of crime and anticipating crimes rather than just reacting to crimes once they have been committed. In his foreword to this book, Nick Ross, presenter of BBC Crime Watch, argues passionately that crime analysts are 'the new face of policing', and have a crucial part to play in the increasingly sophisticated police response to crime and its approach to crime prevention – 'You are the brains, the expert, the specialist, the boffin.'
