The story of the song that foretold a movement and the Lady who dared sing it. Billie Holiday's signature tune, 'Strange Fruit', with its graphic and heart-wrenching portrayal of a lynching in the South, brought home the evils of racism as well as being an inspiring mark of resistance. The song's powerful, evocative lyrics - written by a Jewish communist schoolteacher - portray the lynching of a black man in the South. In 1939, its performance sparked controversy (and sometimes violence) wherever Billie Holiday went. Not until sixteen years later did Rosa Parks refuse to yield her seat on a Montgomery, Alabama bus. Yet 'Strange Fruit' lived on, and Margolick chronicles its effect on those who experienced it first-hand: musicians, artists, journalists, intellectuals, students, budding activists, even the waitresses and bartenders who worked the clubs.

Miranda Woodruff has it all. At least, that's how it looks when she's starring in her homebuilding television show, *From the Ground Up*. So when her network begins to talk about making cuts, she'll do anything to boost ratings and save her show--even if it means pretending to be married to a man who's definitely not the fiance who ran out on her three years ago. When a handsome reporter starts shadowing Miranda's every move, all his digging into her personal life brings him a little too close to the truth--and to her. Can the girl whose entire identity is wrapped up in her on-screen persona finally find the nerve to set the record straight? And if she does, will the life she's built come crashing down just as she's found a love to last? "Sweet, fun, and faith-filled, Melissa Tagg's *Made To Last* is a story made to delight lovers of romance and behind-the-scenes reality TV. Pull up an armchair and enjoy!"--Lisa Wingate, National Bestselling Author of *Blue Moon Bay*, one of *Booklist's* Top 10 of 2012 "Clever plot. Engaging, funny, fresh writing. A winning voice with deeper layers that touch the heart. Melissa Tagg is the whole package. A delight for CBA readers."--Rachel Hauck, award-winning and bestselling author of *Once Upon a Prince* "If there is such thing as a perfect story, Melissa Tagg has written it with this first novel. Laugh-out-loud

funny, a delightful premise, hunky heroes, surprising plot twists and poignant, heart-tugging moments, all wound together with beautiful writing. *Made to Last* is a keeper that will charm its way onto your shelf, and into your heart."--Susan May Warren, RITA Award winner and bestselling author of *Take a Chance on Me* "Made to Last is a fun romantic comedy that will have you turning the pages. Melissa Tagg is a fresh voice to watch."--Jenny B. Jones, award-winning author of *Save the Date* and *There You'll Find Me* "Melissa Tagg has written a fun, fast-paced romance. Her first novel will certainly not be her last."--Kristin Billerbeck, author of *The Scent of Rain* "A must for fans of romantic comedy! Melissa Tagg's endearing characters charmed me and their story line captured my imagination. Reading *Made To Last* was like eating a hot fudge brownie sundae with girlfriends. Fun. Delicious. Completely entertaining."--Becky Wade, author of *My Stubborn Heart* and *Undeniably Yours* "With witty dialogue, lovable characters, and an entertaining plot, Melissa Tagg is sure to become a new favorite among fans of Christian romance. *Made to Last* reminds us all that we are more than the roles we play. At our core, beneath our failures and hang-ups, we are loved and cherished by a faithful God."--Katie Ganshert, author of *Wildflowers From Winter* and

Wishing on Willows "Readers are going to fall in love with Melissa Tagg's novels! She writes vivid stories filled with true-to-life characters who wrestle with questions about life, faith and romance. Melissa's writing is equal parts laugh out loud humor and moments that touch your heart. I can't wait for others to discover this talented new author!"--Beth K. Vogt, author of *Wish You Were Here* and *Catch a Falling Star*

"What happens when a harmless lie you didn't intend to tell takes on a life of its own? When you're Miranda Woodruff, star of a home improvement show, you learn how to let go and become who God called you to be because nothing else is left. A great story with life-impacting truth surrounded by romance to make you swoon."--Cara Putman, award-winning author of *A Wedding Transpires on Mackinac Island*

"Reading *Made to Last*, Melissa Tagg's debut novel, was like meeting new friends whom I wanted to continue hanging out with long after the book ended. Melissa's fresh voice and ability to craft a well-written story hooked me with the opening line and held my attention to the very end. Her flawed characters, LOL moments and spiritual truth provided a foundation for a stellar debut novel. I even had to dab my teary eyes a couple of times. Melissa Tagg is an author to watch and one whose books I want to fill my shelves."--Lisa Jordan, award-winning author of *Lakeside Reunion* and *Lakeside Family*

Jenna Fischer's Hollywood journey began at the age of 22 when she moved to Los Angeles from her hometown of St. Louis. With a theater degree in hand, she was determined, she was confident, she was ready to work hard. So, what could go wrong? Uh, basically everything. The path to being a

professional actor was so much more vast and competitive than she'd imagined. It would be eight long years before she landed her iconic role on *The Office*, nearly a decade of frustration, struggle, rejection and doubt. If only she'd had a handbook for the aspiring actor. Or, better yet, someone to show her the way—an established actor who could educate her about the business, manage her expectations, and reassure her in those moments of despair. Jenna wants to be that person for you. With amusing candor and wit, Fischer spells out the nuts and bolts of getting established in the profession, based on her own memorable and hilarious experiences. She tells you how to get the right headshot, what to look for in representation, and the importance of joining forces with other like-minded artists and creating your own work—invaluable advice personally acquired from her many years of struggle. She provides helpful hints on how to be gutsy and take risks, the tricks to good auditioning and callbacks, and how not to fall for certain scams (auditions in a guy's apartment are probably not legit—or at least not for the kind of part you're looking for!). Her inspiring, helpful guidance feels like a trusted friend who's made the journey, and has now returned to walk beside you, pointing out the pitfalls as you blaze your own path towards the life of a professional actor.

Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “ immortal ” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb ’ s effects; helped lead to important advances like in vitro fertilization,

cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta ’ s family did not learn of her “ immortality ” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta ’ s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn ’ t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

She didn't know how fast the current was moving her. It could take many more hours yet, perhaps more hours than she had the strength for. But she must not stop. She must keep going. She must try to catch the river boy, even though she was frightened at the thought of what he was. Jess's beloved grandfather has just had a serious heart attack, but he insists that the family travel as planned to his boyhood home on the river so that he can finish his painting, River Boy. As Jess helps her ailing grandpa with his work, she becomes entranced by the scene he is painting. Then she becomes aware of a strange presence in the river -- a boy who asks for her help and issues a challenge that will stretch her swimming talents to their very limit. Jess knows that Grandpa and the river boy are connected, but how? Can she take up the river boy's challenge before it's too late for Grandpa? Tim Bowler's gripping narrative flows like a river itself -- gentle and calm at times, turbulent and deep at others, always fluid, always alive. Readers will be swept along by the magic of the river and the mysterious river boy -- and changed forever by Jess's unforgettable journey.

A Diary in the Age of Water OUP Oxford

Astrobiology is the study of the origin, evolution, distribution, and future of life in the universe. It is an inherently interdisciplinary field that encompasses astronomy, biology, geology, heliophysics, and planetary science, including complementary

laboratory activities and field studies conducted in a wide range of terrestrial environments. Combining inherent scientific interest and public appeal, the search for life in the solar system and beyond provides a scientific rationale for many current and future activities carried out by the National Aeronautics and Science Administration (NASA) and other national and international agencies and organizations. Requested by NASA, this study offers a science strategy for astrobiology that outlines key scientific questions, identifies the most promising research in the field, and indicates the extent to which the mission priorities in existing decadal surveys address the search for life's origin, evolution, distribution, and future in the universe. This report makes recommendations for advancing the research, obtaining the measurements, and realizing NASA's goal to search for signs of life in the universe.

Literacy? That's someone else's job, isn't it? This is a book for all teachers on how to make explicit to students those things we can do implicitly. In the Teachers' Standards it states that all teachers must demonstrate an understanding of, and take responsibility for, promoting high standards of literacy, articulacy, and the correct use of standard English, whatever the teacher's specialist subject. In The Secret of Literacy, David Didau inspires teachers to embrace the challenge of improving students' life chances through improving their literacy.

In Living the Sermon on the Mount, theologian and award-winning author Glen H. Stassen helps us to see that the revolutionary ideas in the Sermon on the Mount about loving and caring for each other, living in peace, and acting justly are not unattainable ideals but a recipe for wholeness and healing in our human relationships and deliverance from the vicious cycles that we get stuck in.

An award-winning scientist offers his unorthodox approach to childrearing:

"Parentology is brilliant, jaw-droppingly funny, and full of wisdom... bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise

your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession.

Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
