What is Trigger in PL/SQL?

TRIGGERS are stored programs that are fired by Oracle engine automatically when DML Statements like insert, update, delete are executed on the table or some events occur. The code to be executed in case of a trigger can be defined as per the requirement. You can choose the event upon which the trigger needs to be fired and the timing of the execution.

Oracle Database 12c: Program with PL/SQL

The best way we learn anything is by practice and exercise questions. We have started this section for those (beginner to intermediate) who are familiar with SQL and Oracle. Exercises are designed to enhance your ability to write well-structured PL/SQL programs. Hope, these exercises help you to improve your PL/SQL query skills.

Sample PL/SQL Programs - Oracle
7 Solved PL/SQL Programs and examples on procedures and functions with output, explanation and source code for beginners. Find basic

PL/SQL programs and blocks on calculating interest, electricity bill, sales, age etc. Useful for all computer science freshers, BCA, BE, BTech, MCA students.

Summary: in this tutorial, you will learn how to develop a PL/SQL function and how to call it in various places such as an assignment statement, a Boolean expression, and an SQL statement.. Creating a PL/SQL function. Similar to a procedure, a PL/SQL function is a reusable program unit stored as a schema object in the Oracle Database. The following illustrates the syntax for creating a function:
