This open access book presents original contributions and thought leadership on academic integrity from a variety of Canadian scholars. It showcases how our understanding and support for academic integrity have progressed, while pointing out areas urgently requiring more attention. Firmly grounded in the scholarly literature globally, it engages with the experience of local practitioners. It presents aspects of academic integrity that is specific to Canada, such as the existence of an "honour culture", rather than relying on an "honour code". It also includes Indigenous voices and perspectives that challenge traditional understandings of intellectual property, as well as new understandings that have arisen as a consequence of Covid-19 and the significant shift to online and remote learning. This book will be of interest to senior university and college administrators who are interested in ensuring the integrity of their institutions. It will also be of interest to those implementing university and college policy, as well as those who support students in their scholarly work.

Online social media have transformed the

face of human interaction in the 21st century. Wikis, blogs, online groups and forums, podcasts, virtual worlds, and social tagging are but a few of the applications enabling innovative behaviors that support acquisition, access, manipulation, retrieval, and visualization of information. It is, therefore, no surprise that educational practitioners and theorists have begun to explore how social media can be harnessed to describe and implement new paradigms for communication, learning, and education. The editors' goal in publishing this book was to identify original research on the application of online social media and related technologies in education as well as emerging applications in Web technologies that could provide and shape future educational platforms. The selected contributions deal with questions such as how social media can truly enrich and enhance learning and teaching experiences in ways not otherwise possible; how learning can be integrated in a distributed and ubiquitous social computing environment; or what theories, paradigms, and models are applicable for the support of social computing in education. Researchers in education or educational software will find interesting and sometimes provocative chapters on paradigms and methodologies, virtual and mobile learning spaces, and assessment and social factors. Practitioners in these fields will benefit from an additional section devoted to case studies and first experience reports.

This book, written by two nationally renowned scholars in the area of ethics in higher education, is intended to help teachers and administrators understand and handle problems of academic dishonesty. Chock-full of practical advice, the book is divided into three parts. Part I reviews the existing published literature about academic dishonesty among college and university students and how faculty members respond to the problem. Part II presents practical advice designed to help college and university instructors and administrators deal proactively and effectively with academic dishonesty. Part III considers the broader question of academic integrity as a system-wide issue within institutions of higher education.

Challenges of Information Technology Management in the 21st Century SAGE Publications A guidebook for teachers and tutors on detecting and handling plagiarism, which discusses administrative issues and constructing assignments to prevent plagiarism, and provides Web addresses for term paper mills, and quizzes and activities that teach about plagiarism.

Educational Technology and Narrative SAGE Publications This book aims to assess the

experience of education during COVID-19 pandemic and explore the future of application of technologies and artificial intelligence in education. Education delivery requires the support of new technologies such as artificial intelligence (AI), the Internet of Things (IoT), big data, and machine learning to fight and aspire to new diseases. The academic community and those interested in education agree that education after the corona pandemic will not be the same as before. The book also questions the role of accreditation bodies (e.g., AACSB, etc.) to ensure the effectiveness and efficiency of technology tools in achieving distinguished education in times of crisis.

Two for the Road NewFoundations Since America's founding, the nation's capital has experienced more than its share of scandals; thankfully, Washington Babylon explores some of the dirtiest secrets that have occurred throughout US history. Some are from the earliest days of America's founding and include the most famous people in history, like George Washington. Others are still fresh in our minds, as the dust has not even settled. In between, US history is

littered with scandals from nearly all walks of life that were the most talked-about stories at the time. Many past scandals remain infamous, such as Watergate, Chappaquiddick, and Abscam. Other scandals that were once the biggest stories of the day have faded into obscurity. Washington Babylon reveals new details in some scandals that were not known when the story first broke, offering a whole new perspective for discussion. This is the most comprehensive collection of American scandals that will educate, entertain, shock, and perhaps, even titillate the reader.

The experience of colonization and the challenges of a post-colonial world have produced an explosion of new writing in English. This diverse and powerful body of literature has established a specific practice of post-colonial writing in cultures as various as India, Australia, the West Indies and Canada, and has challenged both the traditional canon and dominant ideas of literature and culture. The Empire Writes Back was the first major theoretical account of a wide range of post-colonial texts and their relation to the larger issues of post-colonial culture, and remains one of the most significant works published in this field. The authors, three leading figures in post-colonial studies, open up debates about the interrelationships of post-colonial literatures, investigate the powerful forces acting on language in the post-colonial text, and show how these texts constitute a radical critique of Eurocentric notions of literature and language. This book is brilliant not only for its incisive analysis, but for its accessibility for readers new to the

field. Now with an additional chapter and an updated bibliography, *The Empire Writes Back* is essential for contemporary post-colonial studies. The Empire Writes Back Libraries Unltd Incorporated

*Designing Experiments for the Social Sciences: How to Plan, Create, and Execute Research Using Experiments* is a practical, applied text for courses in experimental design. The text assumes that students have just a basic knowledge of the scientific method, and no statistics background is required. With its focus on how to effectively design experiments, rather than how to analyze them, the book concentrates on the stage where researchers are making decisions about procedural aspects of the experiment before interventions and treatments are given. Renita Coleman walks readers step-by-step on how to plan and execute experiments from the beginning by discussing choosing and collecting a sample, creating the stimuli and questionnaire, doing a manipulation check or pre-test, analyzing the data, and understanding and interpreting the results. Guidelines for deciding which elements are best used in the creation of a particular kind of experiment are also given. This title offers rich pedagogy, ethical considerations, and examples pertinent to all social science disciplines. *The Nurse Educator's Guide to Assessing Learning Outcomes* Lexington Books

This practical guide is designed to help college teachers plan their undergraduate courses and deliver high-quality instruction. The book's theme is that teaching is a creative, decision-making, idea-testing enterprise whose purpose is to facilitate student learning in all of its facets. Its goal is to help instructors understand the multiple kinds of learning taking place in their courses so that they can select, devise, evaluate, and modify teaching techniques to improve their effectiveness. Based on research on human learning, memory, thinking, and problem solving, as well as studies of teaching and less-formal reports of teaching practices, the book offers concrete advice about all aspects of college teaching. \*Part I is devoted to course planning. It outlines the many decisions instructors face in defining a course as their own and discusses the larger issues that shape a course and constrain some specific choices. Selecting course content, choosing learning goals, deciding how to pace a course, and scheduling tests are some of these issues. A workable timetable for preparing a course is included. \*Part II is a mini-course on human learning, memory, and thinking. It provides the conceptual foundation for making teaching decisions, for selecting instructional strategies, and especially for inventing new techniques that might particularly fit a specific course. \*Part III

deals with the "nitty-gritty" of college teaching, including how to choose a textbook; lecturing and conducting classroom discussions; types and purposes of writing assignments, and how to structure and evaluate them; dealing with plagiarism; strengths and weaknesses of different types of tests, the relation of tests to learning goals, and guidelines for constructing good tests; and grading systems. \*Part IV addresses professional and ethical issues of importance and consequence to instructors. New college instructors, more experienced faculty who would like to reflect on their teaching practices and consider making some changes, and teaching assistants will all find this book relevant and useful.

*Language, while seemingly static, is dynamic and ever-changing, necessitating adaptability in various fields of language studies. It is especially true in a globalized world and an information age. In the field of language and its applications, it is essential to reconsider and redefine existing issues and envision how the changes may have impacts on human beings and on the entire globe. Redefining the Role of Language in a Globalized World* is an essential scholarly publication that explores the role language will play in a globalized world and how language changes over time through its interdependent relationship with technology. Featuring a wide range of topics such as bilingualism, native speaker prejudice, and social inequality, this book is essential for educators, linguists, researchers, curriculum designers, academicians, policymakers, librarians, and students. *Social Media Tools and Platforms in Learning Environments* Jones & Bartlett Publishers

This book discusses the issue of academic misconduct and publication ethics in general and plagiarism in particular, with a focus on case studies in various universities around the world (notably in Japan, Singapore, Australia, USA, and Canada). We are especially interested in students' and teachers' perception of academic misconduct and their definition and understanding of plagiarism. Most chapters discuss undergraduates' understanding of academic dishonesty and students'

experiences using plagiarism softwares. The book also analyzes teachers' perception of cheating and how they respond to it. Writing is perceived by all of the teachers to be the most important form of assessment that required preventative measures in order to reduce the occurrence of academic dishonesty among students. Each chapter recommends strategies to fight plagiarism, such as establishing guidelines and regulations concerning academic integrity, awareness of the scale of the issue (scandals at all levels in most countries, even including famous scholars, administrators, and elected officials), assessing the damage done to academic reputation and credibility, developing trust and credibility on social media (especially with the recent disturbing growth of fake news and data), minimizing the proliferation of dishonest accreditation, of identity theft, of fake peer-reviews, and fighting the growing number of fake papers, with or without the use of computer-generated academic works.
