As the 21st century begins, we are faced with opportunities and challenges of available technology as well as pressured to create strategic and tactical plans for future technology. Worldwide, IT professionals are sharing and trading concepts and ideas for effective IT management, and this co-operation is what leads to solid IT management practices. This volume is a collection of papers that present IT management perspectives from professionals around the world. The papers seek to offer new ideas, refine old ones, and pose interesting scenarios to help the reader develop company-sensitive management strategies.

STEM, Robotics, Mobile Apps in Early Childhood and Primary Education Psychology Press
BUSINESS COMMUNICATION: PROCESS AND PRODUCT, 8e, is designed to prepare students for success in today's digital workplace. The textbook presents the basics of communicating in the workplace, using social media in a professional environment, working in teams, becoming a good listener, and presenting individual and team presentations. Authors Mary Ellen Guffey and Dana Loewy also offer a wealth of ideas for writing resumes and cover letters, participating in interviews, and completing follow-up activities. Optional grammar coverage in each chapter, including a comprehensive grammar guide in the end-of-book appendix, helps students improve their English language skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Empire Writes Back
Springer

Designed to guide readers through every step of their first educational research project, this updated edition of Mertler's practical text offers balanced coverage of qualitative and quantitative methods, an emphasis on ethics, and a wealth of new examples and concrete applications.

The Plagiarism Handbook
Springer

Online social media have transformed the face of human interaction in the 21st century. Wikis, blogs, online groups and forums, podcasts, virtual worlds, and social tagging are but a few of the applications enabling innovative behaviors that support acquisition, access, manipulation, retrieval, and visualization of information. It is, therefore, no surprise that educational practitioners and theorists have begun to explore how social media can be harnessed to describe and implement new paradigms for communication, learning, and education. The editors' goal in publishing this book was to identify original research on the application of online social media and related technologies in education as well as emerging applications in Web technologies that could provide and shape future educational platforms. The selected contributions deal with questions such as how social media can truly enrich and enhance learning and teaching experiences in ways not otherwise possible; how learning can be integrated in a distributed and ubiquitous social computing environment; or what theories, paradigms, and models are applicable for the support of social computing in education. Researchers in education or educational software will find interesting and sometimes provocative chapters on paradigms and methodologies, virtual and mobile learning spaces, and assessment and social factors. Practitioners in these fields will benefit from an additional section devoted to case studies and first experience reports.

Academic Misconduct and Plagiarism CRC Press

Face it . . . students are overwhelmed by research and

citations. Cite It Right provides students with a "go-to" text for anything from the basics of plagiarism, writing a research paper--to the complex citation process. It carefully explains how to develop strong topics, thesis statements, and paragraphs. Best known for its straightforward compilation of the major writing styles (MLA, APA, CMS, CSE), Cite It Right is the friendliest guide to citing sources in all research fields.

Preventing Plagiarism and Cheating
Routledge

A guidebook for teachers and tutors on detecting and handling plagiarism, which discusses administrative issues and constructing assignments to prevent plagiarism, and provides Web addresses for term paper mills, and quizzes and activities that teach about plagiarism.

Challenges of Information Technology Management in the 21st Century
IGI Global

This book aims to assess the experience of education during COVID-19 pandemic and explore the future of application of technologies and artificial intelligence in education. Education delivery requires the support of new technologies such as artificial intelligence (AI), the Internet of Things (IoT), big data, and machine learning to fight and aspire to new diseases. The academic community and those interested in education agree that education after the corona pandemic will not be the same as before. The book also questions the role of accreditation bodies (e.g., AACSB, etc.) to ensure the effectiveness and efficiency of technology tools in achieving distinguished education in times of crisis.

TECHNOLOGIES, ARTIFICIAL INTELLIGENCE AND THE FUTURE OF LEARNING POST-COVID-19
Springer Nature

This textbook provides a clear, concise, and comprehensive introduction to methodological issues encountered by the various social science disciplines. It emphasizes applications, with detailed examples, so that readers can put these methods to work in their research. Within a unified framework, John Gerring and Dino Christenson integrate a variety of methods - descriptive and causal, observational and experimental, qualitative and quantitative. The text covers a wide range of topics including research design, data-gathering techniques, statistics, theoretical frameworks, and social science writing. It is designed both for those attempting to make sense of social science, as well as those aiming to conduct original research. The text is accompanied by online practice questions, exercises, examples, and additional resources, including related readings and websites. An essential resource for undergraduate and postgraduate programs in communications, criminal justice, economics, business, finance, management, education, environmental policy, international development, law, political science, public health, public policy, social work, sociology, and urban planning.

Research Methods and Society
Lexington Books

This comprehensive Handbook provides an international perspective on contemporary issues and future directions in teaching and learning in tourism. Key topics include assurance of learning, development of skills, learning in the field, work integrated learning, sustainability and critical studies, internationalisation, technology enabled learning, links between teaching and research, and graduate student supervision. Within these topics attention is devoted to the

discussion of curriculum, pedagogy, assessment, students, educators and trends and issues. The Handbook provides a valuable resource for understanding teaching and learning theory and practice in tourism.

Handbook of Teaching and Learning in Tourism
ABC-CLIO

Argues for a change in school culture from one that tolerates cheating to one in which every effort is made to support honesty and offers practical ideas that can be used in the classroom or at home.

Cite it Right Jones & Bartlett Learning

This volume is the result of a 2016 research symposium sponsored by the Association for Educational Communications and Technology (AECT) focused on the growing theoretical areas of integrating story and narrative into educational design. Narrative, or storytelling, is often used as a means for understanding, conveying, and remembering the events of our lives. Our lives become a series of stories as we use narrative to structure our thinking; stories that teach, train, socialize, and create value. The contributions in this volume examine stories and narrative in instructional design and offer a diverse exploration of instructional design and learning environments. Among the topics discussed: The narrative imperative: creating a story telling culture in the classroom. Narrative qualities of design argumentation. Scenario-based workplace training as storytelling. Designing for adult learners' metacognitive development & narrative identity. Using activity theory in designing science inquiry games. Changing the narrative of school: toward a neurocognitive redefinition of learning. Educational Technology and Narrative is an invaluable resource offering application-ready ideas to students of instructional design, instructional design practitioners, and teachers seeking to utilize theories of story and narrative to the ways that they convey and express ideas of instructional design and educational technology.

Teaching Undergraduates
Edward Elgar Publishing

This book brings together a collection of work from around the world in order to consider effective STEM, robotics, mobile apps education from a range of perspectives. It presents valuable perspectives--both practical and theoretical--that enrich the current STEM, robotics, mobile apps education agenda. As such, the book makes a substantial contribution to the literature and outlines the key challenges in research, policy, and practice for STEM education, from early childhood through to the first school age education. The audience for the book includes college students, teachers of young children, college and university faculty, and professionals from fields other than education who are unified by their commitment to the care and education of young children.
