**Space a Visual Encyclopedia**

Wayland

Let's Explore Earth! A beautifully illustrated introduction to Earth and the events that shaped the history of our planet. From the beginnings of the solar system and the formation of Earth to a

closer look at our oceans, life cycles, climates, biomes, natural phenomena and disasters, and more, Encyclopedia of Earth guides us through a comprehensive introductory geological history and the evolution of living things. Utilizing a fun mix of full-color illustrations and photographs along with bite-sized tidbits of information that educate without being overwhelming, this book culminates in a call to action in the fight against climate change as well as helpful information on how we can all pitch in to care for our beautiful planet—giving children the tools they need as they contemplate their own place in this fascinating world of ours. Features: Timelines, charts, full color

---

illustrations, fun infographics, and a two-page quiz at the end to test childrens' knowledge.

#### The Animal Book Ballantine Books

Me and the World is a colorful, eye-popping universe of infographics about global communities. This content-rich book teaches about other kids and cultures around the world, all while stepping back and really seeing the big picture. Me and the World is the perfect introduction for a generation entering an increasingly digitized, data-driven world. • Packed with dynamic illustrated spreads about customs of other countries • Invites readers to see themselves in its pages through a data lens • Guided by a relatable, school-aged narrator Me and the World pairs visual literacy with data literacy, using colorful illustrations and infographics to present information in a way young readers will not only understand, but enjoy. Equal parts educational and entertaining, this makes a great pick for parents and grandparents, as well as

librarians, science teachers, and educators. • Perfect for reluctant readers, especially those who would otherwise gravitate toward numbers-based pursuits like math and science, rather than than reading • The graphs, infographics, and maps are the perfect resource for educators looking for engaging content for children to understand data. • Ideal for children ages 8 to 12 years old • Add it to the shelf with books like The Wondrous Workings of Planet Earth: Understanding Our World and Its Ecosystems by Rachel Ignotofsky, The History Book: Big Ideas Simply Explained by DK, and The Science Book: Big Ideas Simply Explained by DK.

#### An Analysis of Some Key Questions Usborne

A fun, dinosaur-themed book packed with puzzles, quizzes, and, of course, lots and lots of stickers! This colourful children's activity book contains more than 250 stickers. The stickers are reusable and easy-to-peel - perfect for little fingers to

---

add to pages again and again! Kids will love this journey back in time, meeting the different dinosaurs that lived, finding out what they ate, and seeing how they defended themselves. Fascinating facts accompany simple, fun activities such as follow-the-trail, an invent-your-own-dinosaur challenge, and a dinosaur quiz. Children are challenged to find the correct stickers to fill in the blanks in the images, and are encouraged to be creative and create their own scene out of stickers. Meet terrifying T. rex, spiky Stegosaurus, and vicious Velociraptor!

**Being Kind to the World** One World  
Astronomers are discovering more and more information about space, making the subject a very hot topic in schools and

---

out of it. This guide is full of and even how the world map genuine facts, answering all our space-related questions and prompting more along the way. Aimed at children aged nine and over, the pictorial infographics style illustrations provide easily digestible facts in bite-size chunks.

**Dr. Maggie's Grand Tour of the Solar System** Penguin

Fact-hungry kids will love poring over these warped world maps full of unique and weird data. See how many lightning strikes hit parts of our planet, the wind patterns of the whole world, and even how the world map would look if global warming melted the ice caps! Covering everything from Pangea to the world's weirdest natural wonders, this is Earth in all its strange glory. What's Weird on Earth is an entirely new atlas adventure, with maps of UFO sightings, popular foods, every country resized according to population density, and their popularity as holiday destinations. Kids can spot the strangest features on every corner of Earth; from ancient patterns carved in the desert sand to

---

the 29,000 bath toys that sailed the world's ocean currents after a shipwreck. Travel back in time to discover maps from previous centuries or turn the globe upside down - literally. Planet Earth will never seem the same again!

My Infographic Sticker

Activity Book Little Genius Books

Caldecott Honor winner Steve Jenkins introduces By the Numbers infographic readers chock full of incredible infographs and stunning, full-color cut-paper

illustrations. Earth will focus on the fascinating ins-and-outs of earth science. Through infographics, illustrations, facts, and figures, readers will learn about the complex and wonderful place we call home, Earth. Discover some of the most fascinating aspects of our planet through astonishing numbers: the stretch of time from Earth's formation to the present, the misleading way the surface area of a continent can appear on a map, the angle of Earth's axis that creates the seasons, what percentage of Earth's

---

land is covered in deserts or forests or cities, and so much more. With his signature style, Steve Jenkins explores the most fascinating fields of natural science.

**Comfortably Unaware** Wide Eyed Editions

Engineering is what brings machines to life. Little learners can discover more about engineering at home by reading the simple explanations and doing the beautifully illustrated activities on each page. Start a lifelong passion for STEM subjects and inspire children to, one day, contribute an invention of their own to the world.

Me and the World Usborne

Publishing Ltd  
The human body is more sophisticated than even the best computer. But while scientists know more about the human body than perhaps anything else, there are still mysteries that baffle us. When it comes to the human body, the more we know, the more we realise we don't know! The human body is a collection of 100 trillion tiny cells. These are the body's building blocks. Each cell has the same basic structure: an outer skin, a nucleus, and a jelly-like

---

fluid containing floating organelles. There are many different types of cells: fat cells, blood cells, brain cells and more!

**Science and Maths** 50 States  
Absorbing facts about the 11.3 million species on Earth might cause your brain to burst! You need to take in huge timelines (the first life on Earth formed 3.8 billion years ago), huge numbers (your body is made up of trillions of cells), and even huger mysteries (why species go extinct). How can all these big numbers and

concepts make more sense? Infographics! The charts, maps, and illustrations in this book tell a visual story to help you better understand key concepts about life science. Crack open this book to explore mind-boggling questions such as: ? How do organisms evolve over millions of years? ? How does DNA determine what you will look like? ? Why are so many species struggling to survive today? The answers are sure to be life-expanding!

All We Can Save DK Children
