Planning An Information Systems Project

```
In this case, the information
systems that support various
functional units—sales and
marketing, production,
finance, and human
resources—are integrated into
an enterprise resource
planning (ERP) system, the
principal kind of enterprise
system. ERP systems support
the value chain—that is, the
entire sequence of activities
or processes through which a
firm adds value to its
products.
```

Three Information Systems Development Methods Information ...
