Mighty, Mighty Construction Site Houghton Mifflin Harcourt

A tree that sheds poison daggers; a glistening red seed that stops the heart; a shrub that causes paralysis; a vine that strangles; and a leaf that triggered a war. In *Wicked Plants*, Stewart takes on over two hundred of Mother Nature's most appalling creations. It's an A to Z of plants that kill, maim, intoxicate, and otherwise offend. You'll learn which plants to avoid (like exploding shrubs), which plants make themselves exceedingly unwelcome (like the vine that ate the South), and which ones have been killing for centuries (like the weed that killed Abraham Lincoln's mother). Menacing botanical illustrations and splendidly ghastly drawings create a fascinating portrait of the evildoers that may be lurking in your own backyard. Drawing on history, medicine, science, and legend, this compendium of bloodcurdling botany will entertain, alarm, and enlighten even the most intrepid gardeners and nature lovers.

Nuts to You! Simon and Schuster

The top cat in a household is reluctant to accept the arrival of a new kitten but decides to share various survival secrets with it.

Eating the Alphabet Simon and Schuster A first garden story board book that reveals how plants grow with lift-the-flaps and a pullout height chart. Teach your child how a tiny seed grows into a flower in this fascinating lift-the-flap garden story. A pullout height chart ends the book--a great way for children to remember how a sunflower grows, and to measure how fast your child grows, too! Through illustrations, photography, and flaps, sixteen delightful board

book pages reveal the wonder of how plants grow as you follow the story of a mystery seed. How was it planted? What does it need? What will it become? As days go by, it's hard to imagine the tiny shoot will ever grow into a big, strong plant. Could it magically become the tallest of all the garden flowers? Flaps unfold to show plants growing, creatures hiding, and what's happening underground. The book includes very simple gardening projects and facts about garden creatures (which ones are good for plants, and which ones are bad), and children will find out what a pollinator is, and how to attract pollinators to the garden. The perfect gift for aspiring gardeners, complete with a height chart.
