The authors trace the emergence of Ataturk and Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire, which led to the introduction of European social models, the establishment of dictatorship and of secularist reforms. This produced in both Turkey and Iran highly

authoritarian, nationalist, and quasi-westernised states, where the personality cult of the leader defined the politics of each country."

"The best parts of you are hidden where you're most afraid to look." --Michael Benner, Fearless Intelligence" Fear is a doorway to understanding yourself better. The secret is to plumb the depth and breadth of your anxiety and confusion in relaxed

levels of expanded awareness. Becoming more self-aware of your anxious feelings reveals the personal wisdom hidden within heartache and upset. "As we understand our self better, we become less alienated and more content -- calmer, happier, and more self-confident. Fewer random thoughts demand our attention. This or that occurs as this and that, and behavior becomes less reflexive -- more appropriate, even-tempered and well reasoned. Soon, defensiveness yields to acceptance, competition surrenders to cooperation -- lines fade, borders dissolve, and your perspective expands to include the 'Wholeness' of life."

With blue, green, and gold foliage and shapes ranging from spiky to weeping, conifers have the

potential to be garden design stars. But they are commonly misused in gardens and landscapes, leading to looming spruces squashed against a house or rows of kettledrum-shaped yews along a sidewalk. When used correctly and creatively, conifers can be star players in creating beautiful, long-lasting plant combinations or serene backyard havens. *Designing with Conifers* shows readers exactly how to choose the best conifers for specific needs. Chapters cover shape, color, and conifers for specific sites and conditions, including front gardens, hedges and screens, topiary, dwarf conifers, shade gardens, Asian-style gardens, bonsai, and miniature railroad gardens. Also includes useful appendices that list of conifers for various problems and conditions, like conifers for areas plagued by deer and the best conifers for Christmas trees and Southern gardens. Each section is enlivened with gorgeous

color photographs. Whatever landscape situation or challenge a gardener designer faces, *Designing with Conifers* shows how to make the best choice from this beautiful, useful, and versatile group of plants.

To metaphorize the world as a theatre has been a common procedure since antiquity, but the use of this trope became particularly prominent and pregnant in early modern times, especially in England. Old and new applications of the “*theatrum mundi*” topos pervaded discourses, often allegorizing the deceitfulness and impermanence of this world as well as the futility of earthly strife. It was frequently woven into arguments against worldly amusements such as the stage: Commercial theatre was declared an undesirable competitor of God’s well-ordered

world drama. Early modern dramatists often reacted to this development by appropriating the metaphor, and in an ingenious twist, some playwrights even appropriated its anti-theatrical impetus: Early modern theatre seemed to discover a denial of its own theatricality at its very core. Drama was found to succeed best when it staged itself as a great unmasking. To investigate the reasons and effects of these developments, the anthology examines the metaphorical uses of theatre in plays, pamphlets, epics, treatises, legal proclamations and other sources.
