“More people recognize the importance of Allyship—and that’s great. Unfortunately, many men still don’t know what they need to do to effect change so everyone feels valued and empowered at work. In *Showing Up*, Ray Arata provides clear guidance on how to turn good intentions into action. I strongly recommend it to everyone interested in helping create a more equal and productive workplace.” —Sheryl Sandberg, COO of Facebook and founder of LeanIn.Org and OptionB.Org *Showing Up* is a revolutionary step-by-step guide—by and for men—to end toxic masculinity and enact heart-based leadership, increase diversity, bolster the bottom line, and create a workplace culture where everyone wins. *The Time's Up, Me Too, and Black Lives Matter* movements have sounded a wake-up—especially for men. Organizations worldwide now realize the critical importance of diversity, equity, and inclusion (DEI) for underrepresented people. It’s abundantly clear: the default model of masculinity isn’t working for anyone. But for a new and healthier infrastructure, for permanent and transformational shifts, we need a plan that includes men. In *Showing Up*, Ray Arata details the proven methods he's shared with such companies as Verizon, Bloomberg, Moody's, Intel, Toyota, Hearst, and more, teaching men to • Embrace healthy masculinity as a cornerstone of inclusionary leadership; • Identify unhealthy masculine behaviors in the workplace—like mansplaining, maninterrupting,

and monopolizing; • Adopt behavior modifications aligned with being an inclusive leader and ally; • Incorporate specific language to use in healthy discussions; and • Leverage power and position to elevate underrepresented groups.

Whisky: The Manual Random House Books for Young Readers

Electronic Diagrams is a ready reference and general guide to systems and circuit planning and in the preparation of diagrams for both newcomers and the more experienced. This book presents guidelines and logical procedures that the reader can follow and then be equipped to tackle large

complex diagrams by recognition of characteristic 'building blocks' or 'black boxes'. The goal is to break down many of the barriers that often seem to deter students and laymen in learning the art of electronics, especially when they take up electronics as a spare time occupation. This text is comprised of nine chapters; the first of which describes simple current carriers, with emphasis on conductors, connections, and terminals. Attention then turns to 'passive' circuit symbols, that is, those that do not require a power source to activate them, but operate under the influence of applied signals or voltages. The next chapter is devoted to the interpretation of electromechanical devices such as switches, relays, switching jacks, and batteries. This book also shows how various semiconductors are depicted in circuit diagrams by grouping according to three main classes: diodes (non-thermionic), thyristors, and transistors. The remaining chapters focus on graphical representations of thermionic valves and cold cathode tubes; integrated circuit functions; transducers and miscellaneous symbols; and black boxes and block diagrams. A chapter on circuit diagram layouts concludes the book. This book will be useful to students and hobbyists who regularly follow the technical journals on graphical representation of circuits.

"The fetching spell must have goofed this time...or did it? Elorie Shaw, steeped in the traditions of the Nova Scotia witching community, but not a witch. Travel to Fisher's Cove, where Moira is matriarch and the old ways are nurtured and passed to the next generation. Where a crotchety old witch makes small children cry and builds walls around the silent pain in his heart. And where Elorie - sea-glass artist, inn owner, and Moira's granddaughter - makes her home. The old magics are strong here. Which is all fine and good until the fetching spell pulls Elorie into Witches' Chat. Because she's not a witch. Or

at least not any kind of witch the old ways recognize..." -- Back cover.

Bestselling Author Lori Foster Playing Doctor Attitude makes a huge difference in bed. It could be Axel Dean's motto. The sexy physician likes his women with sensual moxie, and Libby Preston definitely seems to fit that bill. There's that naughty grin. That hot bod. Her eager kisses and cheeky insults. Her. . .admitted virginity. Whoa. Okay, cue cold shower. Axel may not be an honorable man, but he has his limits. Except Libby won't take no for an answer. She's determined to have someone show her what she's been missing, and suddenly, Axel can't bear to think of Libby playing doctor with anyone else. . . USA Today
Bestselling Author Erin McCarthy The Lady of the Lake Pro baseball player Dylan Diaz is pretty sure he's going to hell. When you rescue a drowning woman from a lake your first thought should be, "Are you okay?" not, "Can I make mad, passionate love to you?" But the minute sputtering kindergarten teacher Violet Caruthers is on Dylan's boat, that's all he can think about. Maybe it's the potent combo of a nun's personality inside a stripper's body. Maybe it's the way she drives him crazy with desire and laughter. Or maybe, Dylan's finally found what's been missing in his life, and he's not about to let go. . .

A Hidden Witch OECD Publishing

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and

references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Can I Taste It? DK Publishing (Dorling Kindersley)

Written by leading market risk academic, Professor Carol Alexander, *Practical Financial Econometrics* forms part two of the *Market Risk Analysis* four volume set. It introduces the econometric techniques that are commonly applied to finance with a critical and selective exposition, emphasising the areas of econometrics, such as GARCH, cointegration and copulas that are required for resolving problems in market risk analysis. The book covers material for a one-semester graduate course in applied financial econometrics in a very pedagogical fashion as each time a concept is introduced an empirical example is given, and whenever possible this is illustrated with an Excel spreadsheet. All together, the *Market Risk Analysis* four volume set illustrates virtually every concept or formula with a practical, numerical example or a longer, empirical case study. Across all four volumes there are approximately 300 numerical and empirical examples, 400 graphs and figures and 30 case studies many of which are contained in interactive Excel spreadsheets available from the the accompanying CD-ROM . Empirical examples and case studies specific to this volume include: Factor analysis with orthogonal regressions

and using principal component factors;
Estimation of symmetric and asymmetric, normal
and Student t GARCH and E-GARCH parameters;
Normal, Student t, Gumbel, Clayton, normal
mixture copula densities, and simulations from
these copulas with application to VaR and
portfolio optimization; Principal component
analysis of yield curves with applications to
portfolio immunization and asset/liability
management; Simulation of normal mixture and
Markov switching GARCH returns; Cointegration
based index tracking and pairs trading, with
error correction and impulse response
modelling; Markov switching regression models
(Eviews code); GARCH term structure
forecasting with volatility targeting; Non-
linear quantile regressions with applications
to hedging.
