Dispose of cup. When done playing with polymer, store in plastic bag. If you plan to keep it awhile, store in the refrigerator. Have students play with the material—see if it has the “polymer” characteristics discussed earlier: flows, stretches; is flexible, durable. Try pulling apart chunk quickly.

Polymer Lab Answer Key - BetterLesson

Another problem with synthetic polymers loose in the environment is that they could have been recycled or reused, which would have spared that much more oil having to be made into new polymers. Polymers can be burned, and energy recovered, but not in a home furnace; it takes a pretty fancy combustion device.

Teach Kids About Reactions & Polymers | PreK - Grade 4

It's the properties of polymers, certain kinds of large molecules, that make these products bouncy, slimy, stretchy, breakable, hard, soft, sticky, moldable—and just plain fun to play with ...

Playing with Polymers Teacher Notes - Science Spot

Not all polymers are bad. In fact humans are made up of polymers. But polymers from sources such as crude oil synthesized into plastics release toxins as they break down. When you burn plastics ...

[Polymers Flashcards | Quizlet](#)

A) Both addition polymers and condensation polymers contain all of the atoms of the monomers. B) Both addition polymers and condensation polymers lose some atoms from the original monomers when the polymer is formed. C) Addition polymers contain all of the atoms of the original monomers, but condensation polymers do not.
