Guide to RISC Processors Brady

These Proceedings are published to give a full
account of the Fifth International Conference
on Atmospheric Electricity held in September
1974 in Garmisch-Partenkirchen in the
Bavarian Alps in Germany. Traditionally, the
Proceedings of these Conferences have
served as reference books updating the
textbooks and monographs on Atmospheric
Electricity. As treated by these Conferences,
Atmospheric Electricity covers all aspects of
this science, including the processes and
problems which reach out into the Earth's

environment as well as analogous processes
on other planets and on the Moon. A history of
these Conferences, an account of their
purpose, and an outline of the scope and the
preparation is to be found at the end of these
Proceedings. There, also the Business
Meetings of the involved organizations are
mentioned. The Proceedings closely follow the
original program and are accordingly organized
into "Sessions". The papers printed in each
"Session" in this book are the ones which were
accepted for the sessions of the Conference
with the same numbers and titles. Only the two
"Special Sessions" have been given different
numbers in the Proceedings, i.e. 2a and 10. In
principle, all papers which were accepted by
the Executive Panel either for full oral
presentation or for printing in the Proceedings
only, have in fact been included in these
Proceedings, whether they were presented or
not. In the latter case, a special note is made to

explain the absence of a discussion.
