FEATURING: IAN BOGOST - LEIGH ALEXANDER - ZOE QUINN - ANITA SARKEESIAN & KATHERINE CROSS - IAN SHANAHAN - ANNA ANTHROPY - EVAN NARCISSE - HUSSEIN IBRAHIM - CARA ELLISON & BRENDAN KEOGH - DAN GOLDING - DAVID JOHNSTON - WILLIAM KNOBLAUCH - MERRITT KOPAS - OLA WIKANDER The State of Play is a call to consider the high stakes of video game culture and how our digital and real lives collide. Here, video games are not hobbies or pure recreation; they are vehicles for art, sex, and race and class politics. The sixteen contributors are entrenched—they are the video game creators themselves, media critics, and Internet celebrities. They share one thing: they are all

players at heart, handpicked to form a superstar roster by Daniel Goldberg and Linus Larsson, the authors of the bestselling Minecraft: The Unlikely Tale of Markus "Notch" Persson and the Game that Changed Everything. The State of Play is essential reading for anyone interested in what may well be the defining form of cultural expression of our time. "If you want to explain to anyone why videogames are worth caring about, this is a single volume primer on where we are, how we got here and where we're going next. In every way, this is the state of play." —Kieron Gillen, author of The Wicked + the Divine, co-founder of Rock Paper Shotgun
Letting Go of the Words CRC Press

The purpose of the Second Symposium on Empirical Foundations of Information and Software Science (EFISS) was, in essence, the same as that of the First Symposium in this series, i. e. to explore subjects and methods of scientific inquiry which are of fundamental and common interest to information and software sciences, and to map directions of research that will benefit from the mutual interaction of these two fields. In fact, one of the most important results of the First EFISS Symposium was the conclusion that the commonality of these two sciences is much more than just the commonality of their objects of study, namely, the study of informative and prescriptive properties of texts in all kinds of sign systems (such as natural or artificial languages). Rather, the most challenging problems appear to be in the areas in which both these sciences overlap, such as, for instance, the problem of trade-offs between informative and prescriptive uses of texts. This problem can be formulated in generic terms as follows: given a certain kind of action or activity which has been prescribed to some agent, i. e. which is required to be implemented or carried out, what kind of information should be provided to the agent, in what form, and how should it be distributed over the contextual structure of the prescriptive text to enable the agent to carry out the action or activity most effectively and efficiently.

New Trends in Medical and Service Robots Jones & Bartlett Publishers

The work of the Council of Europe for democracy is strongly based on education: education in schools, and education as a lifelong learning process of practising democracy, such as in non-formal learning activities. Human rights education and education for democratic citizenship form an integral part of what we have to secure to make democracy sustainable. Hate speech is one of the most worrying forms of racism and discrimination prevailing across Europe and amplified by the Internet and social media. Hate speech online is the visible tip of the iceberg of intolerance and ethnocentrism. Young people are directly concerned as agents and victims of online abuse of human rights; Europe needs young people to care and look after human rights, the life insurance for democracy. Bookmarks is published to support the No Hate Speech Movement youth campaign of the Council of Europe for human rights online. Bookmarks is useful for educators wanting to address hate speech online from a human rights perspective, both inside and outside the formal education system. The manual is designed for working with learners aged 13 to 18 but the activities can be adapted to other age ranges.

Protective Relaying Council of Europe

Architecture can inspire young children; the very shape and form of a daycare center can not only stimulate their imagination but can help children form strong relationships and help promote development. This design guide presents all the elements of building design that combine to create the very best environment for young children and the people who work with them, including building materials, multi-functional spaces and design scaled to suit small children.

"Redish has done her homework and created a thorough overview of the issues in writing for the Web. Ironically, I must recommend that you read her every word so that you can find out why your customers won't read very many words on your website -- and what to do about it."-- Jakob Nielsen, Principal, Nielsen Norman Group " There are at least twelve billion

web pages out there. Twelve billion voices talking, but saying mostly nothing. If just 1% of those pages followed Ginny's practical, clear advice, the world would be a better place. Fortunately, you can follow her advice for 100% of your own site's pages, so pick up a copy of Letting Go of the Words and start communicating effectively today. --Lou Rosenfeld, co-author, Information Architecture for the World Wide Web On the web, whether on the job or at home, we usually want to grab information and use it quickly. We go to the web to get answers to questions or to complete tasks – to gather information, reading only what we need. We are all too busy to read much on the web. This book helps you write successfully for web users. It offers strategy, process, and tactics for creating or revising content for the web. It helps you plan, organize, write, design, and test web content that will make web users come back again and again to your site. Learn how to create usable and useful content for the web from the master – Ginny Redish. Ginny has taught and mentored hundreds of writers, information designers, and content owners in the principles and secrets of creating web information that is easy to scan, easy to read, and easy to use. This practical, informative book will help anyone creating web content do it better. Features* Clearly-explained guidelines with full color illustrations and examples from actual web sites throughout the book. * Written in easy-to-read style with many "befores" and "afters."* Specific guidelines for web-based press releases, legal notices, and other documents.* Tips on making web content accessible for people with special needs. Janice (Ginny) Redish has been helping clients and colleagues communicate clearly for more than 20 years. For the past ten years, her focus has been helping people create usable and useful web sites. She is co-author of two classic books on usability: A Practical Guide to Usability Testing (with Joseph Dumas), and User and Task Analysis for Interface Design (with JoAnn Hackos), and is the recipient of many awards. * Clearly-explained guidelines with full color illustrations and examples from actual web sites throughout the book.* Written in easy-to-read style with many "befores" and "afters."* Specific guidelines for web-based press releases, legal notices, and other documents. * Tips on making web content accessible for people with special needs.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts. Orthomolecular Medicine for Everyone (Easyread Edition) Que Publishing Play for Health Across the Lifespan uses case studies to explore the impact of play and creativity on health and wellbeing throughout the lifecycle. While play at the start of life influences future development, the authors show play also has a role in improving prospects for health and wellbeing in adulthood and later life. A relational approach to health and wellbeing emphasizes the dynamic, mutually influential relationship between individual development and the changing contexts

of our lives. Our personal play history is one feature of this dynamic process, and this book explores how the experience of play throughout the life course sculpts and resculpts the shape of our lives: our physical health, our mental wellbeing, and our relationship to the people and the world around us. Storytelling has been used since the beginning of time to communicate important life lessons in an engaging way. Taking inspiration from Shakespeare's 'Seven Ages of Man', the book uses a case-story approach to differentiate the stages of development and to present evidence for how play and playful experiences impact on health and wellbeing from birth to the end of life in the context of temporal and situational change. Each chapter in *Play for Health Across the Lifespan* introduces relevant evidence-based research on play and health, before presenting several narrative 'case stories', which illustrate the application of play theory and the neuroscience of play as they relate to each life stage. With contributions from specialists in health and education, community organizations and the creative and performing arts, this book will appeal to academics, students, and practitioners who are interested in exploring the role of play in addressing contemporary challenges to our physical, mental, and social health.

This volume describes new frontiers in medical and service robotics in the light of recent developments in technology to advance robot design and implementation. In particular, the work looks at advances in design, development and implementation of contemporary surgical, rehabilitation and biorobots. Surgical robots allow surgeons greater access to areas under operation using more precise and less invasive methods. Rehabilitation robots facilitate and support the lives of the infirm, elderly people, or those with

dysfunction of body parts affecting movement. These robots are also used for rehabilitation and related procedures, such as training and therapy. Biorobots are designed to imitate the cognition of humans and animals. The need to substitute humans working on delicate, tiresome and monotonous tasks, or working with potentially health-damaging toxic materials, requires intelligent, high-performance service robots with the ability to cooperate, advanced communication and sophisticated perception and cognitive capabilities. Progress in this field is fast and results need to be disseminated to stimulate both practical applications and further research. Thus, these papers are a valuable addition to existing literature.
