It is common for multiple pulleys to be used with a single belt as seen in Figure 2. Figure 2. Assuming that Pulley A is

the power source or input and that it is moving clockwise (CW), which way would the other pulleys rotate, clockwise or counterclockwise (CCW)?

[About Us | PLTW](#)

Activity 5.4 Calculating Properties of Solids Answer Key.

Introduction. Have you ever stopped to think why it is that you are able to float in water?

The reason has to do with the concept of buoyancy. The volume of water that your body displaces has weight. The weight of the displaced water pushes upward on you, while the weight of your body ...

Get Started | PLTW

With PLTW, we don't give kids answers – we only give them problems to solve. In addition, our curriculum becomes a means for students to aspire to accomplish great things. When you tap into that instinct in kids – helping others in need – it makes teaching fun and helps them see beyond the content, giving insight into how they can make ...  
PLTW Gateway | PLTW  
PLTW Launch (PreK-5) taps into students' exploratory nature, engages them in learning that feels like play, and encourages them to keep discovering through activities like designing a car safety belt or building
