Fluid Power Circuits and Controls: Fundamentals and Applications, Second Edition, is designed for a first course in fluid power for undergraduate engineering students. After an introduction to the design and function of components, students apply what they've learned and consider how the component operating characteristics interact with the rest of the circuit. The Second Edition offers many new worked examples and additional exercises and problems in each chapter. Half of these new problems involve the basic analysis of specific elements, and the rest are design-oriented, emphasizing the analysis of system performance. The envisioned course does not require a controls course as a prerequisite; however, it does lay a foundation for understanding the extraordinary productivity and accuracy that can be achieved when control engineers and fluid power engineers work as a team on a fluid power design problem. A complete solutions manual is available for qualified adopting instructors.

Fluid Power Systems is a text/workbook that covers topics specifically relating to the design, application, and maintenance of hydraulic and pneumatic systems. This new edition has been redesigned and includes expanded content on hydraulic pumps, fluid conductors, connectors, and means of transmission. The text/workbook addresses fluid power systems, components, and devices specific to industrial, commercial, and mobile power equipment applications such as pumps, valves, actuators, electrical controls, and troubleshooting techniques. Each component, device, or system is introduced with descriptions, operation, common applications, system examples, and operating characteristics. Schematic symbols are introduced throughout the textbook to assist the learner with schematic diagram comprehension.The included FluidSIM 4.2 Student Version simulation software provides

the learner with an added tool to create, build, and troubleshoot hydraulic circuits in the form of specific activities in the text/workbook. Instructors can also create their own activities.
