This book is about two things: tax and power. The processes through which tax law is formulated, involve more than the formal legislative and judicial processes which result in statute and case law. Tax law is an expression of tax policy, which is subjective and a heterogeneous product of states, cultures and politics. Regarding taxation as a branch of either black letter law or orthodox economics ignore, or even deny, this subjectivity. This book explores the complex dynamics of the debates which inform tax policy, the interaction between tax and power and how power relations between various groups in society and between individuals and the state are manifested through tax system. This helps to explain why the rules, procedures and practices are all formulated to suit their interests of the most powerful groups in society. Taxation is a powerful lens through which to analyse relationships between individuals and the state, since history has shown that there is a longstanding power relationship between rulers and subjects, which is articulated through tax regimes. Tax can therefore be seen as a technology which mediates such tensions and relationships and the way that choices are made and conflicts are resolved can give valuable insights into societal power relationships.

'One of the most important books I've read in years' Brian Eno
We are losing the commons. Austerity and neoliberal policies have depleted our shared wealth; our national utilities have been sold off to foreign conglomerates, social housing is almost non-existent, our parks are cordoned off for private events and our national art galleries are sponsored by banks and oil companies. This plunder deprives us all of our common rights, recognized as far back as the Magna Carta and the Charter of the Forest of 1217, to share fairly and equitably in our public wealth. Guy Standing leads us through a new appraisal of the commons, stemming from the medieval concept of common land reserved in ancient law from marauding barons, to his modern reappraisal of the resources we all hold in common - a brilliant new synthesis that crystallises quite how much public wealth has been redirected to the 1% in recent decades through the state-approved exploitation of everything from our land to our state housing, health and benefit systems, to our justice system, schools, newspapers and even the air we breathe. Plunder of the Commons proposes a charter for a new form of commoning, of remembering, guarding and sharing that which belongs to us all, to slash inequality and soothe our current political instability.

From data breaches to disinformation, a look at the digital revolution’s collateral damage with “practical solutions to a wide-range of tech-related woes” (TechCrunch). In this book, a Silicon Valley veteran travels around the world and interviews important decision-makers to paint a picture of how tech has changed our lives—for better and for worse—and what steps we might take, as societies and individuals, to make the future something we can once again look forward to. “A truly important book and the most significant work so far in an emerging body of literature in which technology’s smartest thinkers are raising alarm bells about the state of the Internet, and laying groundwork for how to fix it.”?Fortune “After years of giddiness about the wonders of technology, a new realization is dawning: the future is broken. Andrew Keen was among the first and most insightful to see it. The combination of

Between 279 and 229 B.C., the Aitolian koinon, a federation of mountain cantons in west central Greece, expanded to incorporate many of the neighboring lands and peoples lying between the Adriatic and Aegean Seas. This new political configuration contributed to the development of modern systems of federal democracy based on proportional representation. Despite these institutional advances, the Aitolians and their polity are reviled in the ancient historical tradition, which views them as backward, semi-barbarous brigands. *The Politics of Plunder* is the first English-language book in over a century to examine the political history of the Aitolian koinon in its era of expansion. Joseph Scholten presents a chronological reconstruction of the koinon's course of expansion, synthesizing a number of recent studies covering Aitolian topography, epigraphy, and institutional development that help to compensate for deficiencies in the ancient narrative record. His study is the first to ask how a people and a polity so detested by their contemporaries succeeded in making such fundamental contributions to their regional political culture. Scholten's

careful investigation charts a middle course that neither whitewashes the Aitolians nor credulously accepts the biased ancient tradition. This balanced approach provides a much-needed fresh perspective on the Aitolians and their koinon. Discussing the history of the ancient Aegean Greek world and the political, economic, and social history of the Hellenistic Era, this book will interest anyone concerned with those subjects or fascinated by the development of ancient Greek political institutions and theories, particularly federalism.

Since the early 1990s, a series of major scandals in both the financial and most especially the political world has resulted in close attention being paid to the issue of corruption and its links to political legitimacy and stability. Indeed, in many countries – in both the developed as well as the developing world – corruption seems to have become almost an obsession. Concern about corruption has become a powerful policy narrative: the explanation of last resort for a whole range of failures and disappointments in the fields of politics, economics and culture. In the more established democracies, worries about corruption have become enmeshed in a wider debate about trust in the political class. Corruption remains as widespread today, possibly even more so, as it was when concerted international attention started being devoted to the issue following the end of the Cold War. This Handbook provides a showcase of the most innovative and exciting research being conducted in Europe and North America in the field of political corruption, as well as providing a new point of reference for all who are interested in the topic. The Handbook is structured around four core themes in the study of corruption in the contemporary world: understanding and defining the nature

of corruption; identifying its causes; measuring its extent; and analysing its consequences. Each of these themes is addressed from various perspectives in the first four sections of the Handbook, whilst the fifth section explores new directions that are emerging in corruption research. The contributors are experts in their field, working across a range of different social-science perspectives.

#1 New York Times bestselling author and radio host Mark R. Levin delivers a "bracing meditation" (National Review) on the ways our government has failed the next generation. In modern America, the civil society is being steadily devoured by a ubiquitous federal government. But as the government grows into an increasingly authoritarian and centralized federal Leviathan, many parents continue to tolerate, if not enthusiastically champion, grievous public policies that threaten their children and successive generations with a grim future at the hands of a brazenly expanding and imploding entitlement state poised to burden them with massive debt, mediocre education, waves of immigration, and a deteriorating national defense. Yet tyranny is not inevitable. In *Federalist 51*, James Madison explained with cautionary insight the essential balance between the civil society and governmental restraint: "In framing a government which is to be administered by men over men, the great difficulty lies in this: you must first enable the government to control the governed; and in the next place oblige it to control itself." This essential new book is, against all odds, a likeminded appeal to reason and audacity—one intended for all Americans but particularly the rising generation. Younger people must find the personal strength and will to break through the cycle of statist manipulation, unrelenting emotional overtures, and the pressure of groupthink, which are humbling, dispiriting, and absorbing them; to stand up against the heavy hand of centralized government, which if left unabated will assuredly condemn them to economic and societal calamity. Levin calls for a new civil

rights movement, one that will foster liberty and prosperity and cease the exploitation of young people by statist masterminds. He challenges the rising generation of younger Americans to awaken to the cause of their own salvation, asking: will you acquiesce to a government that overwhelmingly acts without constitutional foundation—or will you stand in your own defense so that yours and future generations can live in freedom?

The kinds of ideas, technologies, identification of genes, even manipulations of life forms that can be owned and exploited for profit by giant corporations is a vital issue for our times. The author argues that this Western-inspired, unprecedented widening of intellectual property concepts does not in fact stimulate human creativity and the generation of knowledge. Instead, it is being exploited by transnational corporations to increase their profits at the expense of the health of ordinary people and of the age-old knowledge and independence of the world's farmers. Intellectual protection is being transformed into corporate plunder. Little wonder popular feeling runs so high against the WTO that polices this new intellectual order, and the pharmaceutical, biotech and other corporations that benefit from it.

When Texas Prison Scams Religion exposes corruption in the Texas Department of Criminal Justice, especially in the abuse of religion. In many ways, this book is a literature review of 1,800-plus works that defends freedom of conscience in prison while exposing the unconstitutionality of the seminary program that "buys faith with favor" from prisoners. The state veritably ordains the prisoner a "Field Minister" that represents the offices of the Governor, TDCJ Director, and wardens throughout the prison. Therein, TDCJ lies about neutrality in a program all about Christian missions and lies again in falsely certifying elementary Bible students as counselors. Why is the director sponsoring psychopaths counseling psychopaths? In fact, TDCJ pays \$314 million a year to UTMB for psychiatric care and receives not a single report of the care given, and worse, for UTMB generates no reports itself. The underbelly TDCJ's executive culture of cover up is exposed. TDCJ has hired the lowest qualified of the applicant pool many times in the last 25 years and regularly destroys statistics on violence. TDCJ Dir. Collier led the prison to model Louisiana Warden Burl Cain, the most scandal-ridden in penal history according to a host of published news stories for 20 years. Therein, Collier led TDCJ to favor the smallest segment of religious society within Evangelical Dominionism. Texas has no business endorsing the truth of any religion over another. We close with a proposal that utilizes the 400,000,000 hours of officer contact over ten years as a definitive influence in contrast to a commissioner that spends less than 10 minutes on each decision. Maness has been lobbying Austin for 15 years to definitively access staff for his "100,000 Mothers' 1% Certainty Parole Texas Constitutional Amendment," which would revolutionize prison culture and save Texans millions of the dollars.

From the 1790s until World War I, Western museums filled their shelves with art and antiquities from around the world. These objects are now widely regarded as stolen from their countries of origin, and demands for their repatriation grow louder by the day. In *The Compensations of Plunder*, Justin M. Jacobs brings to light the historical context of the exodus of cultural treasures from northwestern China. Based on a close analysis of previously neglected archives in English, French, and Chinese, Jacobs finds that many local elites in China acquiesced to the removal of art and antiquities abroad, understanding their trade as currency for a cosmopolitan elite. In the decades after the 1911 Revolution, however, these antiquities went from being "diplomatic capital" to disputed icons of the emerging nation-state. A new generation of Chinese scholars began to criminalize the prior activities of archaeologists, erasing all memory of the pragmatic barter relationship that once existed in China. Recovering the voices of those local officials, scholars, and laborers who shaped the global trade in antiquities, *The Compensations of Plunder* brings historical grounding to a highly contentious topic in modern Chinese history and informs heated debates over cultural restitution throughout the world.

The Complete Guide to Open Scholarship One World
One of The Christian Science Monitor's Ten Best Books of May "A highly original work of history . . . [Saltzman] has written a distinctive study that transcends both art and history and forces us to explore the connections between the two."
—Roger Lowenstein, The Wall Street Journal A captivating study of Napoleon's plundering of Europe's art for the Louvre, told through the story of a Renaissance masterpiece seized from Venice Cynthia Saltzman's *Plunder* recounts the fate of Paolo Veronese's *Wedding Feast at Cana*, a vast, sublime canvas that the French, under the command of the young Napoleon Bonaparte, tore from a wall of the monastery of San Giorgio Maggiore, on an island in Venice, in 1797. Painted in 1563 during the Renaissance, the picture was immediately hailed as a masterpiece. Veronese had filled the scene with some 130 figures, lavishing color on the canvas to build the illusion that the viewers' space opened onto a biblical banquet taking place on a terrace in sixteenth-century Venice. Once pulled from the wall, the Venetian canvas crossed the Mediterranean rolled on a cylinder; soon after, artworks commandeered from Venice and Rome were triumphantly brought into Paris. In 1801, the Veronese went on exhibition at the Louvre, the new public art museum founded during the Revolution in the former palace of the French kings. As Saltzman tells the larger story of Napoleon's looting of Italian art and its role in the creation of the Louvre, she reveals the contradictions of his character: his thirst for greatness—to carry forward the finest aspects of civilization—and his ruthlessness in getting whatever he sought. After Napoleon's 1815 defeat at Waterloo, the Duke of Wellington and the Allies forced the French to return many of the Louvre's plundered paintings and sculptures. Nevertheless, *The Wedding Feast at Cana* remains in Paris to this day, hanging directly across from the *Mona Lisa*. Expertly researched and deftly told, *Plunder* chronicles one of the most spectacular art appropriation campaigns in history, one that sheds light on a seminal historical figure and the complex origins of one of the great museums of the world.

For much of history, the rules of war decreed

that "to the victor go the spoils." The winners in warfare routinely seized for themselves the artistic and cultural treasures of the defeated; plunder constituted a marker of triumph. By the twentieth century, international norms declared the opposite, that cultural monuments should be shielded from destruction or seizure. Prohibiting Plunder traces and explains the emergence of international rules against wartime looting of cultural treasures, and explores how anti-plunder norms have developed over the past 200 years. The book covers highly topical events including the looting of thousands of antiquities from the Iraqi National Museum in Baghdad, and the return of "Holocaust Art" by prominent museums, including the highly publicized return of five Klimt paintings from the Austrian Gallery to a Holocaust survivor. The historical narrative includes first-hand reports, official documents, and archival records. Equally important, the book uncovers the debates and negotiations that produced increasingly clear and well-defined anti-plunder norms. The historical accounts in *Prohibiting Plunder* serve as confirming examples of an important dynamic of international norm change. Rules evolve in cycles; in each cycle, specific actions trigger arguments about the meaning and application of rules, and those arguments in turn modify the rules. International norms evolve through a succession of such cycles, each one drawing on previous developments and each one reshaping the normative context for subsequent actions and disputes. *Prohibiting Plunder* shows how historical episodes interlinked to produce modern, treaty-based rules against wartime plunder of cultural treasures.

Aristotle's "Nicomachean Ethics" is considered to be one of the most important treatises on ethics ever written. In an incredibly detailed study of virtue and vice in man, Aristotle examines one of the most central themes to man, the nature of

goodness itself. In Aristotle's "Nicomachean Ethics," he asserts that virtue is essential to happiness and that man must live in accordance with the "doctrine of the mean" (the balance between excess and deficiency) to achieve such happiness.

Choice Outstanding Academic Title 2023 Offers librarians an authoritative overview of the full spectrum of significant issues and controversies related to open scholarship in a candid and fair-minded manner. There has long been a debate about openness in scholarship, and even the term itself continues to be debated. Openness is a complex and multidimensional concept, and its nature in scholarship continually evolves. One of the hindrances to the transition to greater openness in academia is this lack of clear understanding about how it fits into the practice of scholarly communication. To ensure that librarians as knowledge managers can better educate scholars about the benefits and challenges of open scholarship, Victoria Martin's *The Complete Guide to Open Scholarship* brings clarity to the concept of openness, tests assumptions concerning it, and strikes the right balance between breaking down complex ideas into simpler ones and honoring the reader's intelligence and previous knowledge of the subject. Readers will learn the history of openness in scholarship as well as several ways in which openness can be perceived. Drawing on specific examples, Martin discusses the most prominent scholarly models based on openness, barriers to openness, concerns about openness in scholarship, and the future of open scholarship.

Explore the wonders of wild Mongolia through the eyes of a distinguished field biologist Mongolia became a satellite of the Soviet Union in the mid-1920s, and for nearly seven decades effectively closed its doors to the outside world. Biologist George Schaller initially visited the country in 1989, and was one of the first Western scientists allowed to study and assess the conservation status of Mongolia's many unique, native wildlife species. Schaller made a number of trips from 1989 to 2018 in collaboration with

Mongolian and American scientists, witnessing Mongolia's recovery and transition to a market economy after the collapse of the Soviet Union. This informative and fascinating new book provides a firsthand account of Schaller's time in this little-known and remote country, where he studied and helped develop conservation initiatives for the snow leopard, Gobi bear, wild camel, and Mongolian gazelle, among other species. Featuring magnificent photographs from his travels, the book offers a critical, at times inspiring contribution for those who treasure wildlife, as well as a fresh perspective on the natural beauty of the region, which encompasses steppes, mountains, and the Gobi Desert.

Named a top food & drink book of 2017 by Food Network, Wired, Sprudge, and Booklist This comprehensive but accessible handbook is for the average coffee lover who wants to make better coffee at home. Unlike other coffee books, this one focuses exclusively on coffee—not espresso—and explores multiple pour-over, immersion, and cold-brew techniques on 10 different devices. Thanks to a small but growing number of dedicated farmers, importers, roasters, and baristas, coffee quality is at an all-time high. But for nonprofessionals, achieving café quality at home can seem out of reach. With dozens of equipment options, conflicting information on how to use that equipment, and an industry language that, at times, doesn't seem made for the rest of us, it can be difficult to know where to begin. Craft Coffee: A Manual, written by a coffee enthusiast for coffee enthusiasts, provides all the information readers need to discover what they like in a cup of specialty coffee—and how to replicate the perfect cup day after day. From the science

of extraction and brewing techniques to choosing equipment and deciphering coffee bags, Craft Coffee focuses on the issues—cost, time, taste, and accessibility—that home coffee brewers negotiate and shows that no matter where you are in your coffee journey, you can make a great cup at home.
