This book presents an integrated framework for risk measurement, capital management and value creation in banks. Moving from the measurement of the risks facing a bank, it defines criteria and rules to support a corporate policy aimed at maximizing shareholders' value. Parts I - IV discuss different risk types (including interest rate, market, credit and

operational risk) and how to assess the amount of capital they absorb by means of up-to-date, robust risk-measurement models. Part V surveys regulatory capital requirements: a special emphasis is given to the Basel II accord, discussing its economic foundations and managerial implications. Part VI presents models and techniques to calibrate the amount of economic capital at risk needed by the bank, to fine-tune its composition, to allocate it to risk-taking units, to

<p>estimate the "fair" return expected by shareholders, to monitor the value creation process. If 75 percent of all mergers fail, what makes the other 25 percent succeed? Mergers, acquisitions, and alliances are more vital today than ever before in driving business success. This indispensable guide

offers proven strategies and sound solutions to the multitude of integration issues that inevitably arise, and shows how to create a combined business that meets its strategic and financial objectives, competes better, and offers personal and organizational enhancements. Dubbed "merger mavens" by Fortune magazine, the authors report lessons learned from their experience in over 100 combinations. Executives, managers, and employees alike—in

all industries and sectors—will find useful examples, strategies, and tools here. Praise for *Joining Forces* "This book will help both M&A veterans and those new to the game. The authors provide great insights into the human, cultural, organizational, and strategic factors that matter in M&A success."—Richard Kovacevich, chairman and CEO emeritus, Wells Fargo & Co. "Don't commit to the merger or acquisition without them! I have personally witnessed how hard it is on everyone—employees, shareholders, communities, and especially executives—to work through an improperly managed merger. I have known Marks and Mirvis for almost twenty-five years and the only mistake our organization made was that we did not consult them soon enough. Their new book reflects unequalled experience and intellect. Don't merge, acquire, or be acquired without it!"—Michael R. Losey, CEO (emeritus), Society for Human Resources

Management (SHRM) "Joining Forces is a terrific resource for managers who want to understand the human dynamics of mergers and acquisitions, and a must-read for those who have to lead their companies through one. It is based on the latest research and provides practical insights and advice from authors who know M&A inside out." —Edward E. Lawler III, Distinguished Professor of Business, Marshall School of Business, University of Southern California

Seventeen-year-old Mike visits his grandmother's bedside and learns a family secret. A divorced father discovers that only love, not bribes, can keep his daughter "his" on Thursdays. A young white boy finds that friendship—and betrayal—can cross racial boundaries. Robert Cormier is one of America's most acclaimed writers for young adults. Here are nine touching and intensely personal stories, that confirm

that these accolades
are deserved. Each
story features a brief
introduction that
explains how the story
came to be, or
something about the
writing. Perhaps not
as dark as some of
Cormier's novels,
these tales still have
his classically
haunting themes, which
will be savored by
readers of all ages.
