A Guide to the Project Management Body of Knowledge (PMBOK® Guide) provides generalized project management guidance applicable to most projects most of the time. In order to apply this generalized guidance to construction projects, the Project Management Institute has developed the Construction Extension to the PMBOK® Guide. This Construction Extension provides construction-specific guidance for the project management practitioner for each of the PMBOK® Guide Knowledge Areas, as well as guidance in these additional areas not found in the PMBOK® Guide: • All project resources, rather than just human resources • Project health, safety, security, and environmental management • Project financial management, in addition to cost • Management of claims in construction This edition of the Construction Extension also follows a new structure, discussing the principles in each of the Knowledge Areas rather than discussing the individual processes. This approach broadens the applicability of the Construction Extension by increasing the focus on the “ what ” and “ why ” of construction project management. This Construction Extension also includes discussion of emerging trends and developments in the construction industry that affect the application of project management to construction projects.

Roughly half of all project managers have to lead customer projects as profit centers on contractor side with two big objectives: making the customer happy and bringing money home. Customer projects are a high-risk business on both sides, customers and contractors, but the dynamics of this business have so far been mostly ignored in literature. The book is intended to fill this gap. The book helps project managers better understand the dynamics of customer projects under contract from business development through handover and find solutions for common problems. A central aspect is international contract laws, an often underestimated factor in projects.

Construction Extension to the PMBOK® Guide Rmc Publications Incorporated

Why do we think what we think? Think we know what we think we know? Believe what we believe? Like what we like? Do what we do? Why do others trust or distrust us? Respect or disrespect us? Listen to or ignore us? Reach out to or neglect us? Like or dislike us? Praise or slander us? Believe or doubt us? That's not all... Why do others follow our lead or stand in our way? Give us opportunities or send them elsewhere? Support our striving for success and appreciate our message or toss it - and us - aside? Decades of cutting-edge (but unheard-of) scientific research presents an answer... Because hidden, little-known secrets of psychology influence everything about us... Neglecting them is swimming upstream. You can't change minds, win allies, or influence people. You can't earn undivided attention or the respect you deserve. You undermine your professional image, stagnate your career, and destroy your confidence until communication makes you anxious. You don't deserve this... And how do I know all this? Because I've been there: I remember wondering... "Why do my ideas never catch on? Why do I face so much professional rejection, stagnating my career? Why can't I influence anyone?" But everything changed when I answered one question... What are the communication habits of highly effective people? It comes down to one secret: Highly effective people speak how the human mind evolved to interpret information. The result? They easily persuade and instantly influence. They turn communication from an obstacle into an opportunity. They enrich their careers, get more done, and advance with stunning speed. They impact and inspire others, rising to positions of leadership. They change their field, excel with ease, and shape the world. They attract others, feel confident, and smash goal after goal. Who are they? Presidents and CEOs; top-performers and respected professionals; leaders and visionaries. And here's my question to you: Will you be one of them? In *How Highly Effective People Speak*, you'll discover 194 communication habits of highly effective people (proven by 57 scientific studies) including: How to get more done with less effort by influencing others to support you How to attract others (instead of turning them away and seeming unfriendly) with the correct type of body language How to make people systematically, predictably, and reliably overweigh your opinion by activating the availability bias How to charge more or pay less (for the same product) and win every negotiation with the anchoring effect How to effortlessly make others want something by activating one little-known cognitive bias (called "essential" by billionaire investor Charlie Munger, partner to Warren Buffet) How to lead with ease and reliably influence teams by using the contrast effect How to effortlessly speak with memorable eloquence by applying 2,000-year-old secrets of powerful language How to ace every interview, meeting, and presentation with ease by activating agent detection bias How to quickly diffuse all objections by activating the little-known (but extremely powerful) zero-risk bias How

to make people believe something even if they think the exact opposite with the illusory truth effect How to appear authoritative, trustworthy, and capable in 10 seconds by activating the halo effect How to combine the science of psychology with the art of communication and create a critical competitive advantage in life

This is an update and expansion upon PMI's popular reference, *The Practice Standard for Project Risk Management*. Risk Management addresses the fact that certain events or conditions may occur with impacts on project, program, and portfolio objectives. This standard will: identify the core principles for risk management; describe the fundamentals of risk management and the environment within which it is carried out; define the risk management life cycle; and apply risk management principles to the portfolio, program, and project domains within the context of an enterprise risk management approach It is primarily written for portfolio, program, and project managers, but is a useful tool for leaders and business consumers of risk management, and other stakeholders.
