As an experienced highly rated PMP Exam preparation course instructor and Subject Matter Expert (SME) to the Project Management Body of Knowledge (PMBOK) 5th & 6th Editions, Daud Nasir PMP continues to update the mock PMP tests as well as develop new questions to make these tests as realistic as possible. This third edition of the Kindle book now contains these highly successful simulated online tests. The overwhelming number of PMP candidates, who have used the mock tests, confirm that these tests compare

well to the actual exam. These practice tests have boosted the candidates' PMP exam score, and they were able to pass the exam on their first try. Content Details This book has three full-length PMP sample tests (a total of 600 questions) with answers and detailed explanations of why the correct choice is the best answer, and the three incorrect choices are wrong. Each 200-questions test not only helps you build the stamina for the actual exam but also provides you a much realistic assessment of your preparation. Each explanation provides a complete reference to the

PMBOK guide section and page number for further review. About 60% of the questions are scenario based to help you grasp the real-life application. Remaining questions will challenge you to test your understanding of the PMBOK concepts. Almost half of the questions are process flow questions to test how project processes are sequenced and performed. About The Author Daud is a Project Management Professional (PMP), Lean Six Sigma Black Belt (LSSBB), Agile Project Management (Cert. APM), and ITIL Foundation certified. He has

extensive experience in project management, process improvement, and related domains. Daud is a passionate instructor who teaches courses in PMP exam preparation, Six Sigma, Change Management, Microsoft Project, Business Analysis, and other topics.

Roughly half of all project managers have to lead customer

projects as profit centers on contractor side with two big objectives: making the customer happy and bringing money home. Customer projects are a high-risk business on both sides, customers and contractors, but the dynamics of this business have so far been mostly ignored in literature. The book is intended to fill this gap. The book helps project managers better understand the dynamics of customer projects under contract from business

development through handover and find solutions for common problems. A central aspect is international contract laws, an often underestimated factor in projects. **The context of natural forest management and FSC certification in Brazil** John Wiley & Sons

Publishing Platform Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts,

there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with

stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production

have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals. **Mind Tools for Managers** Independently Published ****Covers Agile and Hybrid Methods**
