Developing a Business Case Ten Speed Press

Packed with tested strategies and practical tips, this book is the essential, life-changing guide for everyone who owns a smartphone. Is your phone the

first thing you reach for in the morning and the last thing you touch before bed? Do you frequently pick it up "just to check," only to look up forty-five minutes later wondering where the time has gone? Do you say you want to spend less time on your phone—but have no idea how to do so without giving it up completely? If so, this book is your solution. Award-winning journalist Catherine Price presents a practical, hands-on plan to break up—and then make up—with your phone. The goal? A long-term relationship that actually feels good. You'll discover how phones and apps are designed to be addictive, and learn how the time we spend on them damages our abilities to focus, think deeply, and form new memories. You'll then make customized changes to your settings, apps, environment, and mindset that will ultimately enable you to take back control of your life.

Retired after thirty-plus years in law enforcement, Tony DiGiusto, newly licensed private investigator, was looking forward to a quiet and uneventful retirement investigating simple everyday civil cases for local attorneys from an office in the sleepy and affluent hamlet of Sausalito, just across the Golden Gate Bridge from San Francisco. Little did Tony know that his first major clients-a pair of twins who had hired his uncle, a well-known San Francisco attorney, to investigate a property ownership dispute-would lead him to investigate the sudden and unexplained death of his uncle in a small Northern California town. Tony becomes entangled in a complex and horrendous investigation that will lead him from San Francisco to the charming and picturesque towns of the Sierra Gold Rush areas. The investigation into his uncle's death leads Tony and his live-in girlfriend, Gina Rosetti, into a nightmarish web of terror and murder involving long-forgotten Nazi activities in California and almost costs Tony and Gina their lives. California's colorful capital, Sacramento, and its legislative bodies play an unwitting part in this fast-paced and intriguing glimpse into a madman's plan for a new Third Reich.

Microsoft's .NET strategy embraces a vision for integrating diverse elements of computing technology and data services. The wireless Internet and mobile devices are core components of that strategy. Visual Studio .NET includes a powerful set of tools the Mobile Internet Toolkit for developing websites and applications that can be accessed from all kinds of mobile devices. .NET Wireless Programming provides the technical details you need to master to develop end-to-end wireless solutions based on .NET technology. You'll learn to take advantage of the Mobile Internet Toolkit's automated deployment capabilities, which enable a single site or application to work with nearly any mobile device. Freed from the task of writing code to accommodate various devices, you'll be able to apply other skills to build a more powerful application: Work with styles and templates. Create custom controls. Read from and write to databases. And use Microsoft's Web Services in support of a distributed architecture. Five case studies, including a mobile intranet, a contacts database, and an online game, illustrate solutions to real problems and techniques for maximizing application flexibility. A set of appendices provide detailed information on the WML language and the Toolkit's classes. This book presents its many code examples in Visual Basic .NET, but the greater emphasis is on Visual Studio .NET and the flexibility it gives developers in choosing the language they want to use.

TWO MONTHS AFTER their disastrous holiday, Orlagh and Jerry are at home in Ireland recovering from their terrifying ordeal. The Belgae Torc is at last on display at the National Museum and Orlagh is under increasing pressure to divide her time between her work at the museum and heading up an archaeological dig in County Meath. She is convinced that an ancient battle between Iron Age tribes took place here and is determined to prove her theory, but as archaeologists begin to unearth the truth, they are faced with some unexpected surprises. Meanwhile, on the other side of the Atlantic, Jack Harrington is making discoveries of his own and finds himself juggling personal and professional commitments. His organisation is still recovering from recent events in the Mediterranean and is loathed to be drawn into another deadly conflict, but like it or not, there are unresolved issues that cannot be avoided. The Phoenix Legion is about to implement the final phase of its master plan and this time Schiffer is convinced that nothing can stop him from realising his goal. With the past merging with the present, the elements of a deadly conclusion are finally coming together. Will history repeat itself or can another worldwide catastrophe be avoided? Also by Kevin Marsh: The Belgae Torc, The Gordian Knot Criminal Procedure: Cases, Materials, and Questions (2015) Harvard Business Press

Mobile communications and ubiquitous computing generate large volumes of data. Mining this data can produce useful knowledge, yet individual privacy is at risk. This book investigates the various scientific and technological issues of mobility data, open problems, and roadmap. The editors manage a research project called GeoPKDD, Geographic Privacy-Aware Knowledge Discovery and Delivery, and this book relates their findings in 13 chapters covering all related subjects.

Provides information on how to upgrade, maintain, and troubleshoot the hardware of personal computers, discussing the differences among them as well as their various configuration options.

Pocket Book of Hospital Care for Children Harvard Business Review Press

The proliferation of mobile media in recent years is an international phenomenon, with billions of devices sold annually. Mobile communications are now moving beyond individualized voice to mass media content--text, voice, sound, images, and even video.

This will create new types of content that allow media companies and users to interact in new ways. There is a strong interest from the media and telecom industries in what manner of applications and content can be distributed in that fashion, and at what cost. To answer these questions, the book provides 18 chapters from internationally renowned authors. They identify likely types of content such as news, entertainment, peer-to-peer, and location-specific information; evaluate the economics, business models, and payment mechanisms necessary to support these media; and cover policy dimensions such as copyright, competitiveness, and access rights for content providers. This volume takes the reader through the various elements that need to be considered in the development of third generation (3G) content, and explains pitfalls and barriers. The result is a volume of interest to business professionals, academics, and policy makers. The book is international in focus and a glossary of terms is provided. There are few publications available which give an overview of this rapidly changing field.

Can an employee-owned company succeed? Here is the inside story of one that

thrived and grew to become a significant force in the nation's scientific and technical markets. In 1969, Dr. J. Robert Beyster founded Science Applications International Corporation (SAIC) with a unique vision of creating an employee-owned organization run according to 12 principles of success that encourage entrepreneurship and accountability. Today, SAIC has grown from a handful of scientists to over 43,000 employees – most of whom hold company equity – and more than \$8 billion in annual revenue, a steadily rising stock price, and top rankings as a contractor to government and business organizations. In this book, Dr. Beyster tells the story of SAIC, and offers valuable lessons to entrepreneurs and managers on how to build a company in which loyalty to values goes hand in hand with success. Dr. J. Robert Beyster (La Jolla, CA) is the founder of Science Applications International Corp. (SAIC). He served as CEO and chairman of the company for 35 years. Beyster continues to promote innovation and employee ownership through his Foundation for Enterprise Development and the Beyster Institute at the Rady School of Management at the University of California, San Diego. Peter Economy (La Jolla, CA) is Associate Editor of Leader to Leader, the award-winning publication for the Leader to Leader Institute, and a bestselling author of titles such as The Management Bible (0-471-70545-4) and Enterprising Nonprofits: A Toolkit for Social Entrepreneurs (0-471-39735-0).

Springer Science & Business Media

The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

Do you lose things? Do you interrupt people? Are you forgetful?

While everyone experiences these problems occasionally, people with attention deficit disorder (ADD) experience these problems and more on a daily basis. This book is for people who have recently been diagnosed with ADD or suspect they may have ADD.

However, even if you have known for quite some time that you have ADD, this book can still provide some solutions for some common frustrations. While this book does not go into great detail about the disorder, I will provide additional resources at the end of each chapter.
