---

A POGIL activity is designed to be used with self-managed teams that employ the instructor as a facilitator of learning rather than as a source of information. A POGIL activity guides students through an exploration to construct, deepen, refine, and/or integrate understanding of relevant disciplinary content.

[POGIL | Home](#)

Solutions, which are homogeneous mixtures, have properties that are altered from the properties of their individual components. An understanding of the processes by which solutions form and how their properties differ is useful in many real-life applications of materials. Learning Objectives • Understand the processes by which solutions form
