Here are some troubleshooting tips for you for the Polaris 180, 280, 380 and 3900 Sport. First, you must have a separate pump plumbed in for the Polaris cleaner or you cannot install this cleaner. It needs it's own pump to work off the pressure (return) side of the pool verse the suction skimmer/side port side.

#### Polaris 380 Troubleshooting Guide

Unplug the cable from the control unit and reinsert the cable. For 9550/P955, 9450/P945 or 9350/P935, make sure that the gap between the cable connector and the receiving end isn ' t larger than the thickness of a nickel because this indicates a poor connection. If

there is a gap, tighten the connection until secure.

#### How to Troubleshoot a 380 Polaris Automatic Pool Cleaner ...

Shorten the Hose Length. One of the first steps in Polaris pool cleaner troubleshooting for tangles is to check the hose length. You do need a little play in the hose so the cleaner can move freely, but a too-long hose will have a hard time swiveling along with the cleaner.

## POLARIS 380 OWNER'S MANUAL Pdf Download | ManualsLib

A Leaky Hose Leaks in the Polaris hose cause the cleaner to lose pressure, allowing it to float above the pool bottom. To check for leaks, turn the system on and pull the hose out of the water one section at a time, looking for bubbles or trickles of water. These may indicate a hole in the hose; if you find any, replace the damaged hose.

### Owner's Manuals | Polaris

The Polaris 380 is a pressure cleaner

which requires a booster pump. There are several models of pressure cleaners offered by Zodiac under the Polaris brand. It is easy to identify each model. If you remove the bag and look down the throat of each unit, you will see small jets.
