Container loads are loads that are rigged for airdrop in airdrop containers such as the A-7A cargo sling, the A-21 cargo bag, and the A-22 cargo bag. In addition, flat steel strapping is used to rig container loads. The containers are packed with supplies, disassembled equipment, or small items of ready-to-use equipment prepared for airdrop. The container load requires cushioning material such as honeycomb, felt, or cellulose wadding, depending on the load requirements and the method of airdrop. The number and types of parachutes required to stabilize and retard

the descent of the load depends on the type of container used, the weight of the load, and the type of airdrop.

Addressing Challenging Moments in Psychotherapy

Haynes Manuals N. America, Incorporated

"This practical and helpful volume details how clinicians can work through various and common challenges inherent to

psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Challenging Moments in Psychotherapy* is

essential reading for all clinicians, teachers, and supervisors of psychotherapy"--
