"Helnwein debuts in striking fashion... The writing, especially the dialogue, is magnetic, honest, and brimming with caustic wit... [an] enrapturing take on the intense highs and lows of teenage love." —Booklist (Starred Review)

"Wildly real and bursting with all the romance and pain of coming into oneself." —Kirkus (Starred Review)

"Helnwein frankly conveys the joy, fear, and awkwardness of an all-consuming first love, poignantly depicting Gracie's growth: particularly the hard-won knowledge that she can exist 'just by the sheer force of herself,' and the grace she learns to show herself and others." —Publishers Weekly "One of Eight 2021 YA Books To TBR ASAP" —BookRiot Mercedes Helnwein's Slingshot is an exciting debut contemporary young adult novel perfect for fans of Rainbow Rowell and Mary H. K. Choi "I didn't think it was going to be anything like this when I finally fell in love. I thought it was going to be pretty simple. Like, I'd love someone and they'd love me. I thought that's the way it worked." Grace Welles is stuck at a third-tier boarding school in the swamps of Florida, where her method of survival is a strict, self-imposed loneliness. And it works. Her crap attitude keeps people away because without friends, there are fewer to lose. But when she accidentally saves the new kid, Wade Scholfield, from being beaten up, everything about her precariously balanced loner world collapses and, in order to find her footing again, she has no choice but to discover a completely new way to exist. Because with Wade around, school rules are optional, weird is okay, and conversations about wormholes can lead to make-out sessions that disrupt any logical stream of thought. Nothing's perfect, but that's not the point. When they're together everything seems uncomplicated in a

way that Grace knows is not possible. Except it is. So why does Grace crush Wade's heart into a million pieces? Acidly funny and compulsive readable, this debut is a story about two people finding each other and then screwing it all up. See also: soulmate, stupidity, sex, friendship, bad poetry, very bad decisions and all the indignities of being in love for the first time.

At the turn of the 20th Century, Japanese 'villages' and their exotic occupants delighted and mystified visitors to the Great Exhibitions and Worlds' Fairs. At the beginning of the 21st Century, Japanese tourists have reversed the gaze and now may visit a range of European 'countries', as well as several other cultural worlds, without ever leaving the shores of Japan. This book suggests that these and other exciting Asian theme parks pose a challenge to Western notions of leisure, education, and entertainment. Is this a case of reverse orientalism? Or is it simply a commercial follow-up on the success of Tokyo Disneyland? Is it an appropriation by one rich nation of a whole world of cultural delights from the countries that have influenced its twentieth-century success? Can the parks be seen as political statements about the heritage on which Japan now draws so freely? Or are they new forms of ethnographic museum? Examining Japanese parks in the context of a variety of historical examples of cultural display in Europe, the U.S. and Australia, as well as other Asian examples, the author calls into question the too easy adoption of postmodern theory as an ethnographically Western phenomenon and clearly shows that Japan has given theme parks an entirely new mode of interpretation.

As an integral part of that endeavor, "AU-18, Space Primer", provides to the joint war fighter an unclassified resource for understanding the capabilities, organizations, and operations of space forces. This primer is a useful tool both for individuals who are not "space aware"-unacquainted with space capabilities, organizations, and operations-and for those who are "space aware," especially individuals associated with the space community, but not familiar with space capabilities, organizations, and operations outside their particular areas of expertise. It is your guide and your invitation to all the excitement and opportunity of space. Last published in 1993, this updated version of the Space Primer has been made possible by combined efforts of the Air Command and Staff College's academic year 2008 "Jointspacemindedness" and "Operational Space" research seminars, as well as select members of the academic year 2009 "Advanced Space" research

Maybe you are in a place right now where hope has fled and there is no vision for what is up ahead. I was in that place, a most unlikely circumstance-encountering severe problems with my son Christian's tactility, speech, and vision. It was while providing passive exercises to my autistic son (which he did not accept, agree, or cooperate with at times) that I recognized that so much in my life-instruction, guidance, and many opportunities-were passive input. Like my son, I had no concept or idea how I was being affected by many choices and experiences. There are many things that can affect our soul and spirit that will affect our life-similar to a tear affecting an area in the brain.

In light of the latest research from cognitive and developmental psychology, this key text explores reasoning, rationality, and democracy, considering the unique nature of each and their relationship to each other. Broadening our understanding from the development of reasoning and rationality in individuals to encompass social considerations of argumentation and democracy, the book connects psychological literature to philosophy, law, political science, and educational policy. Based on psychological research, Moshman sets out a system of deliberative democracy that promotes collaborative reasoning, rational institutions such as science and law, education aimed at the promotion of rationality, and intellectual freedom for all. Also including the biological bases of logic, metacognition, and collaborative reasoning, Moshman argues that, despite systematic flaws in human reasoning, there are reasons for a cautiously optimistic assessment of the potential for human rationality and the prospects for democracy. Reasoning, Argumentation, and Deliberative Democracy will be essential reading for all researchers of thinking and reasoning from psychology, philosophy, and education.
