From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

The Golden Age of snowmobile manufacturing was from 1968-1976 with a gradual slow down leading to 1982. During this time literally hundreds of snowmobile manufacturers sprung up and then disappeared. This book is a look at all the most interesting, rare, or

collectible snowmobiles from that time period. The big names like Arctic Cat, Polaris, Ski-Doo, Yamaha, John Deere, Scorpion, Snow-Jet, Mercury, Rupp, Moto-Ski, to the many small-company brands like Allied, Boa Ski, Chaparral, Evinrude, Harley Davidson, Johnson, Polaron, Sears, Skiroule, Sno Prince, Viking, and even includes a chapter of collectible racing snowmobiles in the hobby, like the 1977 Arctic Cat Z that turned Arctic Cats racing program around, and treasures like a 1973 Chaparral grass drag sled or a 1974 Roll-O-Flex called The Wild One. This book would be a benefit to anyone interested in sleds from this time period or looking to buy a more collectible sled from this era.

 Tens of thousands of mechanical  
 engineers are engaged in the  
 design, building, upgrading, and  
 optimization of various material  
 handling facilities. The  
 peculiarity of material handling  
 is that there are numerous  
 technical solutions to any  
 problem. The engineer's personal

selection of the optimal solution  
 is as critical as the technical  
 component. Michael Rivkin, Ph.D.,  
 draws on his decades of experience  
 in design, construction, upgrading,  
 optimization, troubleshooting, and  
 maintenance throughout the world,  
 to highlight topics such as: •  
 physical principles of various  
 material handling systems; •  
 considerations in selecting  
 technically efficient and  
 environmentally friendly equipment;  
 • best practices in upgrading and  
 optimizing existing bulk material  
 handling facilities; • strategies  
 to select proper equipment in the  
 early phases of a new project.  
 Filled with graphs, charts, and  
 case studies, the book also  
 includes bulleted summaries to help  
 mechanical engineers without a  
 special background in material  
 handling find optimal solutions to  
 everyday problems.

What drives young women and what drives them mad?  
Twentysomething women talk about their feminism. What they do, how they do it and why they choose to do it as feminists. Exploring a range of personal and political experiences, this collection defines the landscape in which young women stake their claim to feminism. The private collides with the public, anger with humour, desire with ideals. Writing themselves into the debate,

these young women are 'talking up'. Covering a diversity of themes including relationships between older and younger women (and feminists), experiences of young migrant women, feminist activism, the marginalisation of non-white and lesbian women, the emerging role of young women in corporate, legal and educational institutions. Although young women have been publicly silent, they are neither indifferent, nor dispassionate about feminism. This book shows the diversity and depth of young women's ideas.

As the mother of hip-hop superstar Kanye West, Donda West has watched her son grow from a brilliant baby boy with all the intimations of fame and fortune to one of the hottest rappers on the music scene. And she has every right to be proud: she raised her son with strong moral values, teaching him right from wrong and helping him become the man he is today. In *Raising Kanye*, Donda not only pays homage to her famous son but reflects on all the things she learned about being his mother along the way. Featuring never-before-seen photos and compelling personal anecdotes, Donda's powerful and inspiring memoir reveals everything from the difficulties she faced as a single mother in the African-American community to her later experiences as Kanye's manager as he rose to superstardom. Speaking frankly

---

about her son's reputation as a "Mama's Boy," and his memorable public outbursts about gay rights and President George W. Bush, Donda supports her son without exception, and here she shares the invaluable wisdom she has taken away from each experience -- passion, tolerance, patience, and above all, always telling the truth. Ultimately, she not only expresses what her famously talented son has meant to her but what he has meant to music and an entire generation.
