Using Lady Morgan's *The Wild Irish Girl* as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.

With this masterful work, Louis A. Perez Jr. transforms the way we view Cuba and its relationship with the United States. On Becoming Cuban is a sweeping cultural history of the sustained encounter between the peoples of the two countries and of the ways that this encounter helped shape Cubans' identity, nationality, and sense of modernity from the early 1850s until the revolution of 1959. Using an enormous range of Cuban and U.S. sources--from archival records and oral interviews to popular magazines, novels, and motion pictures--Perez reveals a powerful web of everyday, bilateral connections between the United States and Cuba and shows how U.S. cultural forms had a critical influence on the development of Cubans' sense of themselves as a people and as a nation. He also articulates the cultural context for the revolution that erupted in Cuba in 1959. In the middle of the twentieth century, Perez argues, when economic hard times and political crises combined to make Cubans painfully aware that their American-influenced expectations of prosperity and modernity would not be realized, the stage was set for revolution.

The text also examines lower level data types with an emphasis on memory and understanding how and why different data types are used.

'Nations under God: The Geopolitics of Faith in the Twenty-First Century' is a timely contribution to the on-going discussion on religion and politics. The volume brings together over thirty leading scholars from a variety of disciplines such as political science, international relations theory, sociology, theology, anthropology, and geography. Utilising case studies, empirical investigations, and theoretical examinations, this book focuses on the complex roles that religions play in world affairs. It seeks to move beyond the simplistic narratives and overly impassioned polemics which swamp the discourse on the subject in the media, on the internet, and in popular nonfiction, by acting as a vessel for scholarly research on religion. The book presents a balanced analysis of the multifaceted roles taken on by religions, and religious actors, in global politics. Contributors: Stephen Dawson, Jodok Troy, Gertjan Dijkink, John A.
