Advanced Structural Analysis is a textbook that essentially covers matrix analysis of structures, presented in a fresh and insightful way. This book is an extension of the author's basic book on Structural Analysis. The initial three chapters review the basic concepts in structural analysis and matrix algebra, and show how the latter provides an excellent mathematical framework for the former. The next three chapters discuss in detail and demonstrate through many examples how matrix methods can be applied to linear static analysis of skeletal structures (plane and space trusses; beams and grids; plane and

space frames) by the stiffness method. Also, it is shown how simple structures can be conveniently solved using a reduced stiffness formulation, involving far less computational effort. The flexibility method is also discussed. Finally, in the seventh chapter, analysis of elastic instability and second-order response is discussed in detail. The main objective is to enable the student to have a good grasp of all the fundamental issues in these advanced topics in Structural Analysis, besides enjoying the learning process, and developing analytical and intuitive skills. With these strong

fundamentals, the student will be well prepared to explore and understand further topics like Finite Elements Analysis.

Out on the Pampas Ansel Adams

When I was a boy at school, if I remember rightly, our sympathies were generally with the Carthaginians as against the Romans. Why they were so, except that one generally sympathizes with the unfortunate, I do not quite know; certainly we had but a hazy idea as to the merits of the struggle and knew but little of its events, for the Latin and Greek authors, which serve as the ordinary textbooks in schools, do not treat of the Punic wars. That it was a struggle for empire at first, and latterly one for existence on the part of Carthage, that Hannibal was a great and skilful general, that he defeated the Romans at Trebia, Lake

Trasimenus, and Cannae, and all but took Rome, and that the Romans behaved with bad faith and great cruelty at the capture of Carthage, represents, I think, pretty nearly the sum total of our knowledge. I am sure I should have liked to know a great deal more about this struggle for the empire of the world, and as I think that most of you would also like to do so, I have chosen this subject for my story. Fortunately there is no lack of authentic material from which to glean the incidents of the struggle. Polybius visited all the passes of the Alps some forty years after the event, and conversed with tribesmen who had witnessed the passage of Hannibal, and there can be no doubt that his descriptions are far more accurate than those of Livy, who wrote somewhat later and had no personal knowledge of the affair. Numbers of books have been written as to the identity of the passes traversed by Hannibal. The whole of these have been discussed and summarized by Mr. W. J. Law, and as it appears to me that his arguments are quite

conclusive I have adopted the line which he lays down as that followed by Hannibal. In regard to the general history of the expedition, and of the manners, customs, religion, and politics of Carthage, I have followed M. Hennebert in his most exhaustive and important work on the subject. I think that when you have read to the end you will perceive that although our sympathies may remain with Hannibal and the Carthaginians, it was nevertheless for the good of the world that Rome was the conqueror in the great struggle for empire. At the time the war began Carthage was already corrupt to the core, and although she might have enslaved many nations she would never have civilized them. Rome gave free institutions to the people she conquered, she subdued but she never enslaved them, but rather strove to plant her civilization among them and to raise them to her own level. Carthage, on the contrary, was from the first a cruel mistress to the people she conquered. Consequently while all the peoples of Italy rallied

round Rome in the days of her distress, the tribes subject to Carthage rose in insurrection against her as soon as the presence of a Roman army gave them a hope of escape from their bondage. Had Carthage conquered Rome in the struggle she could never have extended her power over the known world as Rome afterwards did, but would have fallen to pieces again from the weakness of her institutions and the corruption of her people. Thus then, although we may feel sympathy for the failure and fate of the noble and chivalrous Hannibal himself, we cannot regret that Rome came out conqueror in the strife, and was left free to carry out her great work of civilization.

The Ortho Problem Solver CIUS Press Pp. 283-297, "Mykhailo Drahomanov and the Problem of Ukrainian-Jewish Relations", discuss the views of the Russian nationalist as expressed in two articles. In the first (1875) he opposed legal discrimination against Jews, as it was based on medieval prejudice and did not achieve its aim of safeguarding the peasants' interests. The second was a response to the pogroms of 1881-82. He blamed the Russian policy of concentrating the Jews in the Pale of Settlement for Ukrainian-Jewish tensions. He also criticized the Jews as a parasitic class which felt no solidarity with the Ukraine. He saw the solution in a Jewish socialist movement and a

federation of Russia and Austro-Hungary, in which Jews would enjoy equal rights. Pp. 299-313, "The Problem of Ukrainian-Jewish Relations in Nineteenth-Century Ukrainian Political Thought, " discuss the approaches of three Ukrainian thinkers to the "Jewish question": Mykola Kostomarov, Mykhailo Drahomanov, and Ivan Franko. Kostomarov published an article in 1862 in "Osnova" to counter accusations in the Jewish journal "Sion" against the Ukrainian cultural movement. He supported Jewish emancipation, but accused the Jews of clannishness, indifference to the fate of their country, and acting as instruments of Polish oppression and exploiters of the peasants. Franko was a disciple of Drahomanov; he adopted the idea of Ukrainian independence and advocated Jewish-Ukrainian cooperation.

Pictures are representations that depict their objects. Although depiction plays as important a role as language in contemporary culture and communication, its function is relatively poorly understood. This volume of specially written essays by leading philosophers offers to set the agenda for the philosophy of depiction. It addresses a wide range of philosophical issues, concerning the nature and value of depiction, the role of our perceptual processes in interpreting pictures, and the role of depiction in everyday communication.

Learn how to live a healthy life and leave a legacy of wellness by looking both to the past and to the future. *You Are What Your Grandparents Ate* takes conventional wisdom about the origins of chronic disease and turns it upside down. Rooted in the work of the late epidemiologist Dr. David Barker, it highlights the exciting research showing that heredity involves much more than the genes your parents passed on to you. Thanks to the relatively new science of epigenetics, we now know that the experiences of previous generations may show up in your health and well-being. Many of the risks for chronic diseases -- including obesity, type 2 diabetes, high blood pressure, heart disease and dementia -- can be traced back to your first 1,000 days of existence, from the moment you were

conceived. The roots of these vulnerabilities may extend back even further, to experiences your parents and grandparents had -- and perhaps even beyond. Similarly, what happens to you will affect your children and grandchildren. That's why it's so important to make good dietary choices, get a suitable amount of exercise and be cautious about exposure to toxins. Positive lifestyle changes have been shown to spark epigenetic adjustments that can lead to better health, not only for yourself, your offspring and their children, but also for generations to come. This book makes hard science accessible. It is a call to action for social as well as personal change, delivering the message that by changing our own health, we can also influence the future of the world.
