AAHA Directory of Members, 1988 Vintage Canada Molecular Associations in Biology provides information pertinent to molecular biology. This book discusses several topics, including DNA replication, calculation of intermolecular energies, and thermodynamic parameters of polynucleotides. Organized into 35 chapters, this book starts with an overview of the specific association of the purine and pyrimidine bases in the nucleic acids, which provides the basis for storage, expression, and transmission of genetic information. This text then explores the secondary structures, interactions, and replication processes of nucleic acids.

Other chapters consider the complex biological process of protein synthesis. This book discusses as well the methods of photodynamic action, which is significant in detecting energy transfer from dye to the biomolecule and identifying the free radicals produced. The final chapter deals with the macroscopic properties of molecular systems, which refer to such concepts as volume, mass, pressure, temperature, and pH. This book is a valuable resource for biophysicists, organic chemists, biochemists, and biologists.

Calvin's Calvinism Austin, Tex. : Jenkins Publishing Company "Adam Rapp's brilliant and haunting story will break your heart. But then his words will mend it. . . . Absolutely unforgettable." – Michael Cart On the run in a stolen car with a kidnapped baby in tow, Custis, Curl, and Boobie are

three young people with deeply troubled pasts and bleak futures. As they struggle to find a new life for themselves, it becomes painfully clear that none of them will ever be able to leave the past behind. Yet for one, redemption is waiting in the unlikeliest of places. With the raw language of the street and lyrical, stream-of-consciousness prose, Adam Rapp hurtles the reader into a world of lost children, a world that is not for the faint of heart. Gripping, disturbing, and starkly illuminating, his hypnotic narration captures the voices of two damaged souls - a third speaks only through drawings - to tell a story of alienation, deprivation, and ultimately, the saving power of compassion. A Comprehensive Guide for Investment Professionals Wm. B. Eerdmans Publishing The color photographs and illustrations appearing in select monographs over the past decade represent a significant advance in surgical commu nication. Previously, black and white renderings were standard because color printing had not been perfected and its cost was prohibitive. We be lieve the gradual change from black and

white etchings and reproductions to detailed color illustrations represents a tremendous twentieth century achievement. In our own urologic practices it became evident that the use of black and white sketches for teaching operative urology, while helpful, left too much to the surgeon's imagination. Even the dimension of depth, produced by varying the intensity of shading, often was inadequate in demonstrat ing subtle surgical details in a fossa or bed. Since color photography recently has been used to demonstrate oper ative techniques, we climbed on the bandwagon and photographed in color many of the major operative procedures. However, the reflection of light caused by normal tissue fluid significantly reduces the clarity of photo graphs. Not infrequently, the crucial operative step is obscured by light reflected on a trickle of blood. Even when meticulous care is taken to ir rigate and clean the surgical field, the tissue sheen obscures portions of the field. Color paintings by a gifted artist are not only unique, but can be extraordinary; the vividness with which subtleties can thus be portrayed cannot be matched by photography, black and white or color. Mercurial: The Definitive Guide Charles C Thomas Pub Limited The ten stories in "We Are Not in Pakistan" illuminate a paradox: love and fear draw us together, yet drive us to extremes of separation. Sixteen-year-old Kathleen

believes her family would be normal if not for her Pakistani grandmother. Olena, a Ukrainian woman living in Moscow, discovers that her husband's new posting will draw her dangerously close to her disapproving mother-in-law. Fletcher, a Lhasa Apso, finds himself in the middle of a game between his mistress and her commitment-phobic boyfriend. Tania tries to transform herself from an exotic dancer into the wife her doctor husband wants. Opposites clash and realign until the very last story, when Dr. Karanbir Singh receives an e-mail from a young woman who professes to be the child of his 1980s green-card marriage. Eliciting amusement, curiosity, and wonder mingled with sadness for a post-9/11 world, Shauna Singh Baldwin lures us toward the displaced men, women, and other animals who populate these stories. Noor is forced to bow, along with her mother, sister and brother, to her uncle's religious literalism and ideas on feminine propriety. While at the Sorbonne, Noor falls in love with Armand, a Jewish musician. Though her uncle forbids her to see him, they continue meeting in secret. When the Germans invade in 1940, Armand persuades Noor to leave him for her own safety. She flees with her family to England, but volunteers to serve in a special intelligence agency. She is trained as a radio operator for the group that, in Churchill's words, will "set Europe ablaze" with acts of sabotage. She is then sent back to Occupied France. Unwavering courage is what Noor requires for her assignment and her deeply personal mission —to re-unite with Armand. As her talisman, she carries her grandmother's gift, an heirloom tiger claw encased in gold. The novel opens in December 1943. Noor has been imprisoned. She begins writing in secret, tracing the events that led to her capture. When Germany surrenders in 1945, her brother Kabir begins his search through the chaos of Europe's Displaced Persons camps to find her. In its portrayal of intolerance, The Tiger Claw eerily mirrors our own times, and progresses with moments of great beauty and white-knuckle tension towards a moving and astonishing denouement.
