The study of Ruskin's work and influence is now a feature of several critical disciplines. New

Approaches to Ruskin, first published in 1981, reflects this, gathering some of the most distinguished writers on Ruskin and joining them with others who have undertaken significant research in the field of Ruskin studies. The authors were all specially commissioned for this volume and were chosen to represent as wide a variety of approaches as possible to this key figure of nineteenth-century culture. This book is ideal for

students of art history.

The Camera Does the Rest Routledge
Drawing on the rich resources of Ruskin's drawings, architectural notebooks and manuscripts, Hewison offers fresh insights into both Ruskin and Venice and reveals how Ruskin's work and his connection with the city from youth to old age have helped to shape the image of the Venice we know today. Consuming Tradition, Manufacturing Heritage
London : Methuen London
From the Grand Tour to today's packages holidays, the last two centuries have witnessed an exponential growth in travel and tourism and, as the twenty-first century unfolds, people of every class and from every country will be

wandering to every part of the planet. Meanwhile tourist destinations throughout the world find themselves in ever more fierce competition - those places marginalized in today's global industrial and information economy perceiving tourism as perhaps the only means of surviving. But mass tourism has raised the local and international passions as people decry the irreversible destruction of traditional places and historic sites. Against these trends and at a time when standardized products and services are marketed worldwide, there is an increasing demand for built environments that promise unique cultural experiences. This has led many nations and groups to engage in the parallel processes of facilitating the consumption of tradition and of manufacturing tradition. The contributors to this volume - drawn from a wide range of disciplines - address

these themes within the following sections: Traditions and Tourism: Rethinking the "Other"; Imaging and Manufacturing Heritage; Manufacturing and Consuming: Global and Local. Their studies, dealing with very different times, environments and geographic locales, will shed new light on how tourist 'gaze' transforms the reality of built spaces into cultural imagery.

In a world where nearly everyone has a cellphone camera capable of zapping countless instant photos, it can be a challenge to remember just how special and transformative Polaroid photography was in its day. And yet, there ' s still something magical for those of us who recall waiting for a Polaroid picture to develop. Writing in the context of two Polaroid Corporation bankruptcies, not to mention the obsolescence of its film, Peter Buse argues that Polaroid was, and is, distinguished by its process—by the fact that, as the New York Times put it in 1947, “ the camera does the rest. ” Polaroid was often dismissed as a toy, but Buse takes it seriously, showing how it encouraged photographic play as well as new forms of

artistic practice. Drawing on unprecedented access to the archives of the Polaroid Corporation, Buse reveals Polaroid as photography at its most intimate, where the photographer, photograph, and subject sit in close proximity in both time and space—making Polaroid not only the perfect party camera but also the tool for frankly salacious pictures taking. Along the way, Buse tells the story of the Polaroid Corporation and its ultimately doomed hard-copy wager against the rising tide of digital imaging technology. He explores the continuities and the differences between Polaroid and digital, reflecting on what Polaroid can tell us about how we snap photos today. Richly illustrated, *The Camera Does the Rest* will delight historians, art critics, analog fanatics, photographers, and all those who miss the thrill of waiting to see what develops.
