comes either from dominating classes in a progressively determined history or from a post-Copernican freedom of the superior man to create it. In *From Physics to Politics* Robert C. Trundle, Jr. uncovers the relation of modern philosophy to political ideology. And in rooting truth in human nature and Nature by modal reasoning, he resolves the problem of politicized truth. Our concepts of scientific truth, logic, and necessity are essentially connected. Modern philosophy restricts our understanding of necessity to the political dreams and aspirations of Enlightenment intellectuals. As a result, these intellectuals refuse to acknowledge as factual or meaningful whatever is not intelligible within the practical goals of

establishing science as a system of enlightened ideas. The effect of these ideas is that in our time metaphysical principles, speculative truths, our understanding of science, and the nature of logic have become subordinated to ideological dreams. Fascism, Nazism, Marxism, political correctness, and moral relativism are not historical aberrations but essential consequences. Trundle's work is groundbreaking and daring, and his underlying thesis demonstrates why scientific truth demands a modal defense. The defense not only integrates science, ethics, and politics, but shows how -truth- may be ascribed to moral and scientific principles in contrast to a modern philosophical tradition. Since this tradition is the origin of

---

political ideology, it has led to an irrational politicization of truth. The book will appeal particularly to those interested in political history, histories of philosophy, the philosophy of sciences, and ethics.

Thomas Sowell's classic analysis of the opposing visions behind today's ethical and ideological disputes

Controversies in politics arise from many sources, but the conflicts that endure for generations or centuries show a remarkably consistent pattern. This revised edition of a classic analyzes the centuries-long debates about the nature of reason, justice, equality, and power. It distinguishes between those with the "constrained" vision, which sees human nature as enduring and self-centered, and the "unconstrained" vision, in which human nature is malleable and perfectible. A Conflict of Visions offers a compelling case that these opposing visions are behind the ethical and ideological disputes of yesterday and today.
