Hi there all, I have used Polyworks on many projects over the last 4-5 years and have found it great for sub-millimeter type data and really not great for terrestrial scanning projects. For sub-mm data processing it is really efficient at capturing, processing and validating your projects and is one of the most robust softwares for this type of workflow.

Polyworks: Compared to the big 3 (Geomagic, Rapidform, and Polyworks) it is the least useful. There are a lot of features in the other two that dramatically simplify the point cloud manipulation and parametric modeling compared to Polyworks (I personally would never recommend purchasing Polyworks).
