The Complete Book of Pontiac GTO gives you a year-by-year, model-by-model exploration of the world's first muscle car, all in full color photography, most of which has never been published. When Pontiac created the original muscle car—the GTO—it reshaped the automotive world like a four-inch piston going through a three-inch cylinder bore. Everything changed the moment John Zachery DeLorean and his crew of hot-rodding miscreants bolted a big engine into a smaller car and created the 1964 GTO. Make no mistake: DeLorean and his partners in crime were genuine outlaws. The GTO broke so many of General Motors' corporate rules that the people responsible should have been fired. And they would have been, except the car was a hit. The Complete Book of Pontiac GTO explores every iteration of the first car created specifically for baby boomers. With rare photography from the

archives of Hot Rod and Motor Trend magazines, this book is the complete resource for fans of the world's first muscle car.

1961 Pontiac Body Shop Manual Detroit Iron

In 1963 Pontiac's Chief Engineer John DeLorean and his two favorite staff engineers, Bill Collins and Russ Gee, came up with an inspired way to keep Pontiac cars in the performance limelight: bolt a big engine into Pontiac's upcoming Tempest intermediate body. Thus was the GTO born. Through cunning, resourcefulness, and outright trickery the minds of Pontiac managed to get this rocket into dealerships and out onto America's highways, and to introduce that most iconic of American automobiles, the muscle car, to the nation's most discriminating drivers. This is the story of the GTO, of the people who made it a reality and a sales sensation, of those who owned and loved the cars. And it is, above all, a story of the cars themselves, from the initial option package offered for the 1964 model year through the high-performance late-model standouts. With color photographs, drawings, and detailed stats, this book is not so much the story of a historic car as an illustrated biography of American muscle.

Pontiac's GTO is often credited as being the first muscle car. As model year 1966 ended, an astounding 96,946 GTOs traversed Pontiac assembly lines, which set a high-water mark that would cement the GOAT as the most salable muscle car that was produced during the golden age of performance. Author David Bonaskiewich examines this model year in precise detail, taking into account every cosmetic change and optional hardware that warranted this sales boom. The Coke-bottle styling for the remodeled GTO certainly tipped the scales for some consumers. However, as they say, "The devil is in the details." This book delves into those details, showcasing the vast array of optional equipment across its three bodystyles (hardtop, sports coupe, and convertible). Thorough examinations of the drivetrain, interior, suspension, brakes, and wheels and tires are exhaustive, which unveils exactly why the 1966 GTO was the most successful muscle car ever assembled. Tune up those Tri-Power carburetors, turn on your favorite tune, and twist the key with 1966 Pontiac GTO: In Detail!
