Scholars consider sound and its concepts, taking as their premise the idea that popular culture can be analyzed in an innovative way through sound. The wide-ranging texts in this book take as their premise the idea that sound is a subject through which popular culture can be analyzed in an innovative way. From an infant's gurgles over a baby monitor to the roar of the crowd in a stadium to the sub-bass frequencies produced by sound systems in the disco era, sound—not necessarily aestheticized as music—is inextricably part of the many domains of popular culture. Expanding the view taken by many scholars of cultural studies, the contributors consider cultural practices concerning sound not merely as semiotic or signifying processes but as material, physical, perceptual, and sensory processes that integrate a multitude of cultural traditions and forms of knowledge. The chapters discuss conceptual issues as well as terminologies and research methods; analyze historical and contemporary case studies of listening in various sound cultures; and consider the ways contemporary practices of sound generation are applied in the diverse fields in which sounds are produced, mastered, distorted, processed, or enhanced. The chapters are not only about sound; they offer a study through sound—echoes from the past, resonances of the present, and the contradictions and discontinuities that suggest the future. What do Bono, Seinfeld and Apple have in common? Nothing. However, it's the nothing of Samuel Beckett, which is something. Bold and provocative, Beckett's works and even his image are a potent force in modern society. Shoes, marketing, baby names--all fall under his spell. This collection of new essays (one exception) finds him incorporated into virtually all aspects of popular culture--television, popular fiction, movies, tattoos, even sports--in a manner that seems to defy classifying. Is it image-making or image-taking? Why is our culture so obsessed with an obscure Irish writer most people have not read? Each essay provides a unique appraisal of Beckett's branding.

Teaching about the media and popular culture has been a major concern for radical educators. Yet in recent years, the hyperbolic rhetoric of "critical pedagogy" has come under attack, not only from theoretical perspectives such as feminism, anti-racism and postmodernism, but also in The Light Of Actual Classroom Experience. The Notion That Teachers Might "liberate" students through rationalistic forms of ideological critique has been increasingly questioned, not only on the grounds of its political arrogance, but also because of its ineffectiveness in practice. This book seeks to move beyond the limitations of these debates, and to explore positive alternatives. It contains a broad international range of contributions, covering practice from primary schools right through to higher education. The authors draw on diverse perspectives, including poststructuralism, postmodernism, cultural studies, anti-racism and feminism; yet they share a willingness to challenge radical orthodoxies, and to offer positive practical alternatives.

This book observes and analyses transnational interactions of East Asian pop culture and current cultural practices, comparing them to the production and consumption of Western popular culture and providing a theoretical discussion regarding the specific paradigm of East Asian pop culture. Wherever we look today, popular culture greets us with “texts” that make implicit arguments; this book helps students to think and write critically about these texts. *The World Is a Text* teaches critical reading, writing, and argument in the context of pop-culture and visual examples, showing students how to “read” everyday objects and visual texts with basic semiotics. This new edition is rich with images, real-world examples, writing and discussion prompts, and examples of academic and student writing. The first part of the book is a rhetoric covering argumentation, research, the writing process, and adapting from high-school to college writing, while the second part explores writing about specific cultural topics. Notes, instruction, and advice about research are woven into the text, with research instruction closely tied to the topic being discussed.
