When the Range Rover Sport was launched in 2005, it was aimed at a new group of customers who in many cases would never have considered a Land Rover product before. These customers wanted and could afford a luxurious vehicle that was expensive to run; but they also wanted a very personalized vehicle that did not have the rather grand and conservative connotations of the full-size Range Rover. Brasher and more glamorous than its older sibling, the Sport was soon adopted by celebrities and others who expected to be noticed. Range Rover Sport - The Complete Story is the first book devoted

specifically to the first-generation Range Rover Sport. It tells the story behind the development and launch of the vehicle; it explains the market reaction, including contemporary press reviews; provides details of each model with technical specification tables and colour and trip options; lists production figures and VIN identification and dating; details prices and sales figures for the UK, USA and Canada and finally, includes a useful chapter on buying and owning.

Porsche ABC-CLIO

The 356 Porsche, A Restorer's Guide to Authenticity IV takes a part-by-part, year-by-year approach to what an owner or prospective buyer should look for when evaluating a 356 Porsche. For each year, from 1950 through 1965, the author examines every change, documented or not, of each model – and now including major mechanical components. Included are the most accurate and comprehensive chassis number and color/upholstery listings anywhere.

The 356 Porsche IGI Global Among the many holdings of the Ludvigsen Library were the works of Rodolfo Mailander, who photographed races, motor

shows, new-car introduction and other events in Europe from 1950 through 1955. This handsome portrait-format book presents Mailander's photography, selected and with commentary by Karl Ludvigsen, of Porsche cars and people through these years. Spread over 250 pages are some 300 images taken by a man who was intimately involved with this world. By far the majority of these photographs have never before been published. Ludvigsen provides a knowledgeable and entertaining commentary on each, together with a year-by-year overview of the activities of Porsche during these exciting early years. The early Fifties were the dramatic formative years of Porsche, which was founded as a sports-car producer in 1948. The first-ever Porsche car scored a race victory that same year. Porsche's first effort at Le Mans in 1951 brought a class victory, and Le Mans was destined to remain a major target for Porsche's racers in the future. With the arrival of the fabled 550 Spyders in 1953 Porsche scored class victories on all continents with such drivers as Stirling Moss, Hans Herrmann and Richard von Frankenberg. As well, during these years

Porsche developed and expanded its range of sports cars for the road. Included in the book are: - Exciting and evocative scenes from the great sports-car races, rallies, road races and hillclimbs: Monza, Berne, the Nürburgring, the Mille Miglia, Monte Carlo, Reims and others. - Behind-the-scenes views of the Porsche factory and the building of these great cars. - The Porsche road cars in their environment and at the great Salons of Paris, Turin and Geneva. - Porsche people, including Ferry Porsche, his engineers and his drivers. Contemporary Consumer Culture Theory contains original research essays written by the premier thought leaders of the discipline from around the world that reflect the maturation of the field Customer Culture Theory over the last decade. The volume seeks to help break down the silos that have arisen in disciplines seeking to understand consumer culture, and speed both the diffusion of ideas and possibility of collaboration across frontiers.

Contemporary Consumer Culture Theory begins with a re-evaluation of some of the fundamental notions of consumer behaviour, such as self and other, branding and pricing, and individual vs. communal agency then continuing with a reconsideration of role configurations as they affect consumption, examining in particular the ramifications of familial, gender, ethnic and national aspects of consumers' lived experiences. The book moves on to a reappraisal of the state of the field, examining the rhetoric of inquiry, the reflexive history and critique of the discipline, the prospect of redirecting the effort of inquiry to practical and humanitarian ends, the neglected wellsprings of our intellectual heritage, and the ideological underpinnings of the evolving construction of the concept of the brand.

Contemporary Consumer Culture Theory is a reflective assessment, in theoretical, empirical and evocative keys, of the state of the field of consumer culture theory and an indication of the scholarly directions in which the discipline is evolving providing reflection upon a rapidly expanding discipline and altered consumption-scapes by some of its prime movers.

Lemon-Aid New Cars and Trucks 2012 Delius Klasing Verlag GmbH

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Master a complete roadmap for emerging market business success and profitability! Emerging markets are generating unprecedented opportunities, but they are far more complex and risky than they may seem. Profiting in these markets

entails retooling business models, products, and strategies to exploit these differences, instead of falling victim to them. Too many American, European and Japanese companies continue to operate with a "developed world" mentality that seeks to merely adapt existing products and strategies, while underestimating the unique challenges of managing a business in radically different contexts. Operating in Emerging Markets draws from real-life examples and today's most valuable research to offer a step-by-step blueprint for improving profitability in emerging markets. Pioneering researchers Dr. Luciano Ciravegna and Dr. Robert Fitzgerald walk you through understanding the true risks and challenges; identifying and investing the right resources; developing the right strategies, products, and processes; and learning from both the successes and failures that have come before you. An indispensable resource for all decision-makers in companies that are (or plan to) operating in emerging markets; and for all graduate business students who may do so in the future. "Publications devoted to rapidly transforming economies are on the rise,

but the contribution is often marginal. This new book, *Operating in Emerging Markets*, authored by Luciano Ciravegna, Robert Fitzgerald, and Sumit Kundu, is an exception. It provides valuable insights into what makes these economies grow and prosper. Most importantly, it responds to the need for practical approaches to tapping emerging markets. Thus it should assist current and future managers in navigating these high-potential but high-risk countries." --S. Tamer Cavusgil, Callaway Professorial Chair and Executive Director, CIBER, J. Mack Robinson College of Business. Georgia State University
The Oxford Handbook of the Macroeconomics of Global Warming ASM International Dialogue on global warming has progressed from the Kyoto Protocol to meetings in Copenhagen and Cancun and will soon resume in meetings in South Africa. Some observers consider the Copenhagen conference a failure. EU representatives, in contrast, present an optimistic evaluation of achieving a global temperature rise limit of not more than 2°C by 2100. Geoscience researchers and lead investigators of the

Intergovernmental Panel on Climate Change (IPCC) have supported CO2 emission reduction pledges and contend that we can achieve the 2°C limit through international coordination. This position conflicts with evaluations of United States Congressional and Presidential advisors, who do not believe the Copenhagen CO2 reduction commitments can hold the global warming increase to below 2°C and who have not supported the agreement. Developing countries are alarmed, because climate change is expected to hit them hardest. The developed world will use energy to mitigate global warming effects, but developing countries are more exposed by geography and poverty to the most dangerous consequences of a global temperature rise. The Oxford Handbook of the Macroeconomics of Global Warming analyzes the macroeconomics of global warming, especially the economics of possible preventative measures, various policy changes, and potential effects of climate change on developing and developed nations.

Contemporary Consumer Culture Theory SAGE

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As

a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.
