In Stuttgart-Zuffenhausen, August 1939, the 60K10 project, under the supervision of one Professor Ferdinand Porsche, builds a car in anticipation of a race, Berlin to Rome, that will never take place. With this model, the idea for a light and aerodynamic car, with a small engine but remarkable performance was born. Nine years later this idea bore fruit and the company released their first automobile, the 356, created by Ferdinand's son, Ferry Porsche, which would launch the company into automotive history. Porsche - Cars with Soul tells the story of Porsche, from the unique perspective of the cars themselves, through the most significant events and races of the marque's celebrated history. It covers exhilarating accounts of races in which Porsche cars competed, from 1951 to 2015 and it tracks the development of Porsche models from the first model 356, to the defining model 911, and beyond. Beautifully illustrated with rarely seen full-colour and vintage photographs from the Porsche archives.

Regarded as one of the great automotive engineers of the twentieth century, Ferdinand Porsche is well remembered today for his

remarkable automotive designs including the Volkswagen Beetle and Auto Union Grand Prix cars. Yet there is another side to his extraordinary career, for he was an equally inventive designer of military vehicles and machinery. In this field too he excelled. Indeed the sheer versatility of his contribution is astonishing. Karl Ludvigsen's study is the definitive guide. He tells the complete story, focusing on Porsche's relations with the German armed forces and on the stream of advanced designs he was responsible for. Included are Austro Daimler's pioneering aero engines, the Kübelwagen, Schwimmwagen, Type 100 Leopard tank, Ferdinand or Elefant tank destroyer and the astounding Type 205 Maus tank. He also describes Porsche's creative work on aero engines, tank engines and even a turbojet for the V-1 flying bomb. Karl Ludvigsen's account confirms the preeminence of Ferdinand Porsche as a brilliant and prolific engineer, one of the most remarkable of his generation.
