* A unique take on the history of Porsche - all photographs are of highly detailed miniatures in 1:43 scale, each one taken with an iPhone, and each uploaded to Instagram with the hashtag #PorschePur #PorschePur... That's the hashtag that marked the start of this project. From the 356 to the 911 GT2 RS, from Porsche no. 1 to the Panamera Turbo S E-Hybrid Executive, from Le Mans to the Nürburgring, from the Rallye Monte Carlo to Dakar, from James Dean and Hans Herrmann to Mark Webber and Neel Jani - this book retraces the rich and varied history of the Porsche brand and its models. Included in this book are all the sports car models as well as the race cars with which the brand has earned its laurels in sporting competitions. The visual story is told by means of unique photography of highly detailed miniatures in 1:43 scale, photographed in the actual surroundings be it at the Nürburgring, in Hong Kong,

Los Angeles, Paris or any other place on earth. The camera used in all cases is an iPhone. The photos and the fascinating text were originated by long-standing motoring journalist, book author and communications professional Jörg Walz. His 'Instagram car park' has grown to become a unique automotive museum with space for more than 1,000 cars. A large proportion of this collection is showcased here in this unique book.

Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

In Stuttgart-Zuffenhausen, August 1939, the 60K10 project, under the supervision of one Professor Ferdinand Porsche, builds a car in anticipation of a race, Berlin to Rome, that will never take place. With this model, the idea for a light and aerodynamic car, with a small engine but remarkable performance was born. Nine years later this idea bore fruit and the company released their first automobile, the 356, created by Ferdinand's son, Ferry Porsche, which would launch the company into automotive history. Porsche - Cars with Soul tells the story of Porsche, from the unique perspective of the cars themselves, through the most significant events and races of the marque's celebrated history. It covers exhilarating accounts of races in which Porsche cars competed, from 1951 to 2015 and it tracks the development of Porsche models from the first model 356, to the defining model 911, and beyond. Beautifully illustrated with rarely seen full-colour and vintage photographs from the Porsche archives. CompTIA Data+ Study Guide Veloce Publishing Ltd

**Endorsements: ** 'Fascinating and meticulously researched.' The Spectator 'The connection between weapons and industrial design is strong at Porsche. This is the subject of an engrossing new book, Professor Porsche's Wars.' Stephen Bayley, Octane 'Ludvigsen approaches the legend from a new and surprisingly rich angle -- the Professor's contributions to military ordnance, the design and production of which occupied him continuously throughout his long career. He produces a compelling tale of a prolifically talented engineer dedicated to innovation and perfection stubbornly battling against the often seemingly impossible constraints imposed upon him.' The Automobile 'Crammed with information, original photographs, illustrations and drawings, we reckon it's an essential addition to any military vehicle enthusiast's reference library.' Classic Military Vehicle Regarded as one of the great automotive engineers of the twentieth century, Ferdinand Porsche is well remembered today for his remarkable automotive designs including the

Volkswagen Beetle and Auto Union Grand Prix cars. Yet there is another side to his extraordinary career, for he was an equally inventive designer of military vehicles and machinery. In this field too he excelled. Indeed the sheer versatility of his contribution is astonishing. Karl Ludvigsen's study is the definitive guide. Karl Ludvigsen tells the complete story, detailing Porsche's relations with the Third Reich and the stream of advanced designs for which he was responsible. Among them were the Kubelwagen, the Schwimmwagen, the Type 100 Leopard tank, the controversial Ferdinand tank destroyer and the colossal Type 205 'Maus' tank. He also describes Porsche's creative work on aero engines, tank engines and even his company's manufacture of the V-1 flying bomb, for which he designed a turbojet engine.

The 914 and 914-6 Porsche, a Restorer's Guide to Authenticity III Dundurn

Unleashed in 1982, the Porsche 956 became the most successful purpose-built race car in history. Over the following decade, the 956 and its later long-wheelbase version, the 962, would win five consecutive world championships, as well as every single classic sportscar race in the world a record number of times: the Le Mans 24 Hours seven times, the Daytona 24 Hours six times and the Sebring 12 Hours four times, plus 39 world championship events and 55 IMSA races, to name but a few of its remarkable achievements. Many of the successes were achieved by works-entered cars, almost always in the iconic white-and-blue colours of sponsor Rothmans, and they form the focus of an extraordinary body of work researched and written by author Serge Vanbockryck over the past 30 years. This is the first part of his project, a two-volume production about the Works 956s, with a second such title on the Works 962s to follow in the summer of 2020.

The Porsche 911's little brother... In 1969 a very special sports car was born. The 914 rose from a marriage of convenience of Volkswagen and Porsche, because both companies wanted a small, modern and affordable sports car in their product range, but for little cost. Thus, it was decided to combine the skills of both manufacturers. The result was a light mid-engine sports car with a lively road performance and even 50 years after its launch, it pleases the eye with a fresh design. Back then it was often ridiculed as a 'housewife Porsche' or 'Volks-Porsche', but now, the 914 has come out of the shadow of its big brother the 911 and has a huge fan base; today it lives on in the Boxster and Cayman models. This volume includes: the result of thorough research in the Porsche and VW archives; rich photography; all technical data; development, production, model history and racing appearances.
