All key CCNA commands at your fingertips Quick
reference for CCNA exam study customized for the
Cisco Networking Academy classroom Long-term
reference guide for the workplace and after passing
the exam Examples of how to use the commands are
listed for additional help This "CCNA Command Quick
Reference" contains all of the commands that are
taught in the Cisco Networking Academy Program
CCNA curriculum, with examples on how to apply
them to a real-world situation. This book is not meant
to replace any teaching materials but rather serve as
a supplementary guide to the course curriculum. As a
quick reference, it will provide students and
professionals easy access to the proper use of all the
commands that are presented to them within the
CCNA curriculum and exam. The book will cover
CCNA semesters 2-4 (as the first semester does not
introduce any commands.) This edition is based on
the current version 3.1 of the curriculum. The book
will parallel the flow of topics and structure of the
online curriculum; as commands are taught in the
curriculum, they will be presented in the Quick
Reference, showing the following: A.) The command
itself, along with keywords and optional sub-
commands B.) Where it can be used (showing the

prompt to give a frame of reference). Throughout the
book there will be Configuration Examples given to
the reader, which will summarize the previous group
of commands visually by having a diagram of a
network with command outputs, showing all of the
commands needed to create that network, showing
what commands to use, where to use them, and a
summary of why we are using the commands. This
allows the student to see all of the commands in one
location, instead of having to flip through a bunch of
different pages. Scott Empson is an instructor in the
Department of Telecommunications at the Northern
Alberta Institute of Technology in Edmonton, Alberta,
Canada. He teaches Cisco Routing, Switching, and
