“ A highly successful organisation is built on the strengths of exceptional people. No matter how much technology and mechanisation is developed, no organisation could survive and prosper without them ” . --- Luszez and Kleiner, 2001 The most important corporate resource over the next few years will be talent: smart, sophisticated business people who are technologically literate, globally astute, and operationally agile. And even as the demand for talent goes up, the supply of it will be going down. This seems to particularly hold true in case of the IT-ITES (Information Technology and Information Technology- Enabled Services) industry in India which requires high quality and highly skilled labour force to cater to the rapidly increasing global demand for software services but is currently facing an increasing shortage of skills supply. Moreover, due to shortages of skilled workers, high turnover rates, and rapid business growth in the service sectors, it has been noted that recruiting, selecting, and placing applicants are among the top three priorities of human resource professionals. Since the IT industry in India is faced with these three challenges, recruitment and selection comprises an important human resource practice in this industry. Further, in this industry, human resources comprise both the raw material and the 'technology', and are therefore of prime importance. As India completes the transition from being an agrarian economy to being a full-fledged, first-world economy, operating at the leading edge of contemporary technology, the IT sector is emerging as major driver of the economy. The Indian IT industry comprises of domestic software and services firms as well as foreign firms looking to consolidate their presence in India owing to the increasing cost pressures in US and Europe. This has increased the need to setup in-house development

centers or outsource to third-party service providers in low cost countries such as India. IT and IT enabled services include a wide range of services from back-office data entry and processing to customer contact services, corporate support functions, knowledge support functions and research and design activities. As per the latest Forbes Research, India now controls 44 per cent of the global offshore outsourcing market for software and back office services. As per Nasscom estimates, it is projected to grow to 51 per cent. If this growth is sustained, Nasscom has estimated that there will be a potential shortfall of above 2, 10,000 IT and ITES professionals in India by the year 2012 and demand will out-pace the supply. Though the Indian IT industry is in a strong position to leverage this global software opportunity (as India currently has one of the world ' s largest, most qualified pools of scientific and engineering manpower), this growing global demand is not only for numbers but also for appropriately skilled, industry-oriented professionals as companies are further scaling their operations and offering high value-added services which involve higher levels of technology and more specialized, higher-end services. Hence, firms which want to maintain their competitive advantage have to carefully recruit and select the most suitable out of the large pool of available manpower. Moreover, according to a recent study by McKinsey & Co., although the potential supply of talent in low wage countries such as India is large and growing rapidly, only a fraction of the job candidates could successfully work at a foreign company on account of their limited suitability i.e. though there are many candidates with the technical skills to fill a position, they may not have the cultural skills to “ fit in ” with the organisation. The same issue is also faced by large globally competitive domestic Indian firms who are competing for the same pool of talent and skills as their foreign counterparts to remain competitive and survive in global and domestic markets.

The irreverent guide to investing, Boglehead style The Boglehead's Guide to Investing is a DIY handbook that espouses the sage investment wisdom of John C. Bogle. This witty and wonderful book offers contrarian advice that provides the first step on the road to investment success, illustrating how relying on typical "common sense" promoted by Wall Street is destined to leave you poorer. This updated edition includes new information on backdoor Roth IRAs and ETFs as mainstream buy and hold investments, estate taxes and gifting, plus changes to the laws regarding Traditional and Roth IRAs, and 401k and 403b retirement plans. With warnings and principles both precisely accurate and grandly counterintuitive, the Boglehead authors show how beating the market is a zero-sum game. Investing can be simple, but it's certainly not simplistic. Over the

course of twenty years, the followers of John C. Bogle have evolved from a loose association of investors to a major force with the largest and most active non-commercial financial forum on the Internet. The Boglehead's Guide to Investing brings that communication to you with comprehensive guidance to the investment prowess on display at Bogleheads.org. You'll learn how to craft your own investment strategy using the Bogle-proven methods that have worked for thousands of investors, and how to: Choose a sound financial lifestyle and diversify your portfolio Start early, invest regularly, and know what you're buying Preserve your buying power, keeping costs and taxes low Throw out the "good" advice promoted by Wall Street that leads to investment failure Financial markets are essentially closed systems in which one's gain garners another's loss. Investors looking for a roadmap to successfully navigating these choppy waters long-term will find expert guidance, sound advice, and a little irreverent humor in The Boglehead's Guide to Investing.

Choosing an attorney can be one of the most important decisions your patrons will make. The MARTINDALE-HUBBELL LAW DIRECTORY will help them make an informed selection. This definitive resource has been the place to turn to for information on lawyers & law firms in the U.S., Canada, & other countries worldwide. The new 25-volume MARTINDALE HUBBELL LAW DIRECTORY makes finding the information you need easier than ever before. Organized alphabetically by state & city, the Biographical Volumes, are divided into three sections. The first part of each volume - the Practice Profiles section - provides a comprehensive listing of lawyers & law firms - virtually every active attorney in the U.S. The second section in each volume contains Professional Biographies, providing expanded information on lawyers & law firms. It includes not only a listing of each firm's attorneys & their backgrounds, but fields of law practiced, names of clients, & references. Services, Suppliers & Consultants, the third section in each volume, provides contact information for expert witnesses, title search companies, private detectives, & other specific legal-related services. The next volume features a Corporate Law Department section providing information on the in-house counsel of major corporations; a Law School section & a Government section. Next follows the Alphabetical Index Volume & the Areas of Practice Index Volume. The next three volumes, the International Law Directory, contains the most comprehensive listing available of international attorneys. It offers information on attorneys & law firms in over 130 countries worldwide. Finally, the Law Digest contains concise, up-to-date digests of the statutory laws of the 50 states, the District of Columbia, Puerto Rico & the Virgin Islands, the

federal government, Canada, & some 65 other countries. The MARTINDALE-HUBBELL LAW DIRECTORY is a definitive reference work for both the legal professional & the general public.

Does your stockbroker look out for your best interest? Not likely, says author Rick Ferri. In his hard-hitting books, Ferri reveals Wall Streets darkest secret: most stockbrokers and financial advisors are not investment wizards out to make you rich, but rather peddlers of expensive investment products designed to make money from you, not for you. Ferri exposes the dubious sales practices of brokers and other financial consultants and explains why many of their recommendations are doomed to fail. He then provides clear and useful advice that readers can use to turn what they earn into a secure financial future.
