Based on the latest syllabus of the Indian Nursing Council,
Communication and Nursing
Education is written primarily for students pursuing B.Sc. in nursing.

It covers a wide range of topics such as curriculum development, classroom management, teaching-learning process and evaluation methods for didactic and clinical settings. While there is an entire chapter devoted to the in-service education, issues like interpersonal relationships, human relationships and communication are also comprehensively discussed. The text is supplemented with the most up-to-date teaching and learning techniques and includes a large number of examples and flow charts to facilitate an easy understanding of the key concepts.

Industrial agriculture is responsible for widespread environmental degradation and undermines the pursuit of human well-being. With a projected global population of 10 billion by 2050, it is urgent for humanity to achieve a more sustainable approach to farming and food systems. This concise text offers an overview of the key issues in sustainable food production for all readers interested in the ecology and environmental impacts of agriculture. It details the

ecological foundations of farming and food systems, showing how knowledge from the natural and social sciences can be used to create sustainable alternatives to the industrial production methods used today. Beginning with a discussion of the role of agriculture in human development, the primer examines how twentieth-century farming methods are environmentally and socially unsustainable, contributing to global change and perpetuating inequalities. The authors explain the principles of environmental sustainability and explore how these principles can be put into practice in agrifood systems. They emphasize the importance of human well-being and insist on the centrality of social and environmental equity and justice. Sustainable Food

Production is a compelling guide to how we can improve our ability to feed each other today and preserve the ability of our planet to do so tomorrow. Appropriate for a range of courses in the natural and social sciences, it provides a comprehensive yet accessible framework for achieving agricultural sustainability in the Anthropocene.

Bangladesh is committed to achieving universal health coverage (UHC) by 2032; to this end, the government of Bangladesh is exploring policy options to increase fiscal space for health and expand coverage while improving service quality and availability. Despite Bangladesh ' s impressive strides in improving its economic and social development outcomes, the government still confronts health financing and service delivery challenges. In its review of the health system, this study highlights the limited fiscal space for implementing UHC in Bangladesh, particularly given low public spending for health and high out-of-pocket expenditure. The crisis in the country ' s human resources for health (HRH) compounds public health service delivery inefficiencies. As the government explores options to finance its UHC plan, it must recognize that reform of its service delivery system with particular focus on HRH has to be the centerpiece of any policy initiative.

CAREER GUIDANCE Elsevier Health Sciences Lippincott NCLEX-RN Alternate-Format Questions, 7th edition is designed to help anyone preparing to take the RN licensing examination.
