The lives of scientist Alan Turing and author William Burroughs are turned upside down in this off-the-wall sci-fi caper from Rudy Rucker. What if Alan Turing, founder of the modern computer age, faked his suicide to escape assassination by the secret service? What if he then became the lover of Beat author William Burroughs? And

what if they then mutated into giant shapeshifting slugs, fled the FBI agents tracking them, raised Burroughs's wife—killed in a tragic drunken mishap—from the dead, and, finally, tweaked the H-bombs of Los Alamos to use them for a very different purpose? Turing & Burroughs is a wild beatnik adventure: compulsively readable, hysterically funny, with insane warps and twists—and a bad attitude throughout.

"Juicy Ghosts" is a fast-paced adventure novel, with startling science, engaging dialog-and a happy ending. The novel treats near-future versions of telepathy and immortality. It's also a redemptive political tale, reacting to the chaos of the 2020 US presidential election. The tone is hip, bright, and darkly comic, with

generous helpings of Rucker's SF surrealism. Romances interweave the tale.

Mondo 2000 Macmillan

Recently voted the greatest fantasy of all time, after *The Lord of the Rings* and *The Hobbit*, Gene Wolfe's *The Book of the New Sun* is an extraordinary epic, set a million years in the future, on an Earth transformed in mysterious and wondrous ways, in a time when our present culture is no longer even a memory. Severian, the central character, is a torturer, exiled from his guild after falling in love with one of his victims, and journeying to the distant city of Thrax, armed with his ancient executioner's sword, Terminus Est. This edition contains the second two volumes of this four volume novel, *The Sword of the Lictor* and *The Citadel of the Autarch*.

Though he is also a mathematician, computer scientist, and essayist, Rudy Rucker is best known for his ground-breaking science fiction. The companion volume to *Seek!*, Rucker's selected nonfiction, *Gnar!* brings together three dozen of the writer's best science fiction short stories. His first major story collection in 17 years, the volume includes a number of previously unanthologized stories, including tales cowritten with Marc Laidlaw, Paul Di Filippo, and Bruce Sterling. Classics such as "The Fifty-Seventh Franz Kafka," a timely meditation on the paradoxes of cloning, are side by side with works of

pseudomemoir like "The Indian Rope Trick Explained." The Rucker formula - cutting-edge physics, a wild but perversely logical imagination, and a decidedly punk attitude - illuminates this new collection.

Infinity and the Mind Macmillan

After the Singularity, everyone and everything is sentient and telepathic. Aliens notice and invade Earth. In Rucker's last novel, *Postsingular*, the Singularity happened and life on Earth was transformed by the awakening of all matter into consciousness and into telepathic communication. The most intimate moments of your life can be experienced by anyone who cares to pay attention, or by hundreds of thousands of anyones if you are one of the Founders who helped create the Singularity. The small bunch of Founders, including young newlyweds Thuy, a hypertext novelist, and Jayjay, a gamer and brain-enhancement addict, are living a popular, live-action media life. But now alien races that have already gone through this transformation notice Earth for the first time, and begin to arrive to exploit both the new environment and any available humans. Some of them are real estate developers, some are slavers, and some just want to help. But how to tell the difference? Someone has to save humanity from the alien invasions, and it might as well be reality media stars Thuy and Jayjay. From a two-time winner of the Philip K. Dick award, and one of the founding fathers of cyberpunk comes a novel about a very modern nightmare: the most destructive computer virus ever has been traced to your machine. Computer programmer Jerzy Rugby spends his days blissfully hacking away in cyberspace — aiding the GoMotion Corporation in its noble quest to create intelligent robots. Then an electronic ant gets into the machinery ... then more ants then millions and millions of the nasty viral pests appear out of nowhere to wreak havoc throughout the Net. And suddenly Jerzy Rugby is Public Enemy Number One, wanted for sabotage, computer crime, and treason — a patsy who must now get to the bottom of the virtual insectile plague. "Rudy Rucker warms the cockles of my heart ... I think of him as the Scarlet Pimpernel of science fiction." — Philip Jose Farmer

Downriver Avon Books

In a time not far from our own, Lawrence sets out simply to build an artificial intelligence that can pass as human, and finds himself instead with one that can pass as a god. Taking the Three Laws of Robotics literally, Prime Intellect makes every human immortal and provides instantly for every stated human desire. Caroline finds no meaning in this life of purposeless ease, and forgets her emptiness only in moments of violent and profane exhibitionism. At turns shocking and

humorous, "Prime Intellect" looks unflinchingly at extremes of human behavior that might emerge when all limits are removed. An international Internet phenomenon, "Prime Intellect" has been downloaded more than 10,000 times since its free release in January 2003. It has been read and discussed in Australia, Canada, Denmark, Germany, Japan, Mexico, the Netherlands, Slovenia, South Africa, and other countries. This Lulu edition is your chance to own "Prime Intellect" in conventional book form.

Million Mile Road Trip Transreal Books

"Rucker's four Ware novels—Software, Wetware, Freeware, and Realware—form an extraordinary cyberweird future history with the heft of an epic fantasy novel and the speed of a quantum processor. Still exuberantly fresh despite their age, they primarily follow two characters (and their descendants): Cobb Anderson, who instigated the first robot revolution and is offered immortality by his grateful "children," and stoner Sta-Hi Mooney, who (against his impaired better judgment) becomes an important figure in robot-human relations. Over several generations, humans, robots, drugs, and society evolve, but even weird drugs and the wisdom gathered from interstellar signals won't stop them from making the same old mistakes in new ways. Rucker is both witty and serious as he combines hard science and sociology with unrelentingly sharp observations of all self-replicating beings. This classic series well deserves its omnibus

repackaging, particularly suitable for libraries." — Publisher's Weekly. "Rudy Rucker is one of the modern heroes of science fiction, one of the original cyberpunks. The early cyberpunks only had a few writers who could be meaningfully called punks — writers like John Shirley and Richard Kadrey — but there was only one who could truly be called cyber: Rudy Rucker. Rucker is a mad professor, a mathematician and computer scientist with a serious, scholarly interest in the limits of computation and the physics and mathematics of higher-dimension geometry. But that's just about the only thing you can describe as 'serious' when it comes to Rucker. He's a gonzo wildman, someone for whom 'trippy' barely scratches the surface. His work is shot through with weird sex, weird drugs, weird brain chemistry, and above all, weird science." — Cory Doctorow

Spaceland Eos

An artist in a wild biotech future confronts aliens from another dimension—and finds a new way to get high—in this rollicking, psychedelic SF novel from Rudy Rucker. Biotechnology has replaced machines, and genetic modification is commonplace. At the forefront of this revolutionary change is artist Zad Plant, who works with living paint, lives in a talking home grown from plants, gets around on a giant roadspider, and has a sentient rat—complete with Kentucky accent—as a sidekick. Unfortunately for Zad, his career's on the skids, and his wife Jane has thrown him out. Enter qwet—quantum wetware—that changes Zad, making him cosmically high and giving him telepathy, and soon enough, a psychedelic revolution begins. Yet when mouths begin appearing in midair, eating people, Zad and Jane must travel through a wormhole to learn how to save their world. . . . Night Shade Books' ten-volume series with Rudy Rucker collects nine of the brilliantly

weird novels for which the mathematician-turned-author is known, as well as a tenth, never-before-published book, *Million Mile Road Trip*. We're proud to collect in one place so much of the work of this influential figure in the early cyberpunk scene, and to share Rucker's fascinating, unique worldview with an entirely new generation of readers.
